deploys sea and air cruise

From Richard Owen Moscow

Mr. Grigory, Romanov, a possible successor to President Chernenko, said yesterday that Moscow was ready for nego-tiations with the United States. But diplomats in Moscow said Russia's weekend announce-itient that it was deploying air-and sea-launched long-range cruise missiles would make a return to the negotiating table more complicated.

The Russians have already

stationed rockets in Eastern Europe, and according to Washington have increased their SS20s in European Russia - although Moscow last Friday annough moscow last runly denied this allegation after a Nato meeting at Stress in Italy.

Speaking in Helsinki, Mr Romanov blamed the collapse of the Geneva arms talks last November on the United States, and accused Washington of aggravating world tensions. But he added: "At the same time the Soviet Union affirms that it is still ready to negotiate

with the United States and conduct a dialogue on the basic problems of our time". Talks should be based on the principles of equality and mutual security". Mr Romanov said - a formula used by Mr Chemenko and repeated by the Politburo in a statement after Mr Andrei Gromyko's recent talks with Mr Reagan.

Mr Romanov, aged 61, was addressing a meeting marking the forticth anniversary of the armistice which ended the winter war between Russia and Finland. Normally considered a tough, rough-edged hardliner, Mr Romanov is Gentral Committee secretary responsible for the defence industries. He is the chief Politburo rival of Mr Mikhail Gorbachov, aged 53, the Kremlin number two.

He did not indicate where a

Owen and Hattersley put focus on jobs By Our Political Reporter

Dr David Owen, the Social Labour Government in its Democratic Party leader, yesterday put forward a national plan for jobs aimed at winning bipartisan support for a programme to take a million out of the dole queue in two years.

His proposals, costing 52,900m and involving a radical redrawing of the National Insurance scheme in order to encourage firms to take on more low-skilled workers were published on the day that Mr Roy Hattersley. the shadow chancellor of the exchequer, made an important speech in which he set out the

attempts to achieve a major reduction in employment, and outlined policies for overcoming

Mr Hattersley whose speech was part of the leadership's continuing attempt to inject a "new realism" into the presentation of the party's economic policies, spoke of the need for a high profit economy and for an agreement with the trade ions on planning incomes. Both contributions were

single 20th bomb that devastated the hotel could have been left for weeks hidden in its fabric and almost undetectable without extensive searching.

Mr Birch, describing the alert, which was sent on Wednesday night (the bomb exploded a second after 2.54am on Friday) said: "Nothing in the message pointed to any specific type of threat or pointed to Brighton. Our plans involved security precautions on a vastly more advanced scale than the

The message was sent by the Special Branch at Scotland Yard and was based on intelligence assessments from sources such as the Special Branch in Northern Ireland, the Garda Siochana and the security service, MI5. Mr Birch said the alert was the result of a general assessment.

The warning is based on a classification which uses different colours to indicate the strength of the warning and the precision of the intelligence. The alert on Wednesday was bikını black alpha and a senior Sussex police source said that it was of the lowest alert on the

The same source said the alert was issued because intelligence and police analysts felt there was a strong chance the IRA might try to strike on the mainland and regain some initiative after recent blows such as the arms cache found on a vessel last mouth.

If that is the case the bomb may have been placed in the

A security alert warning that Grand Hotel where the Prime the Provisional IRA might be Minister and her Cabinet about to start a campaign in colleagues were staying last Britain was sent to police forces, week, quite recently. But week, quite recently. But Commander William Hucklesby, of the Yard's anti-terrorist branch, said yesterday that the Birch, chief constable of Sussex, said yesterday.

But he denied it was anything

above the seafront in the The bombing means that a wreckage of the hotel, Mr new and much more urgent Hucklesby said the device, alert will have gone out to all about the size of a briefcase, was thought to have been hidden behind the tiling in the bath-room of room 628 or 629 on the sixth floor. The two bathrooms

Mr Huckleby said the device, powered by long-life batteries, was inserted by water cisterns

Birch spoke to reporters specialists and forensic scientists from Mr Hucklesby's branch in London were at work in the wreckage of the hotel for the third day removing tub after tub of debris for examination.

Mr Birch said that the body of Mrs. Jean Shattock, wife of the chairman of the Conservative Party's Western Counties area, had been found and identified by jewelry on the body. Mrs Shattock was in room 628 and she was found somewhere else on the sixth floor, having been blown some stance by the blast.

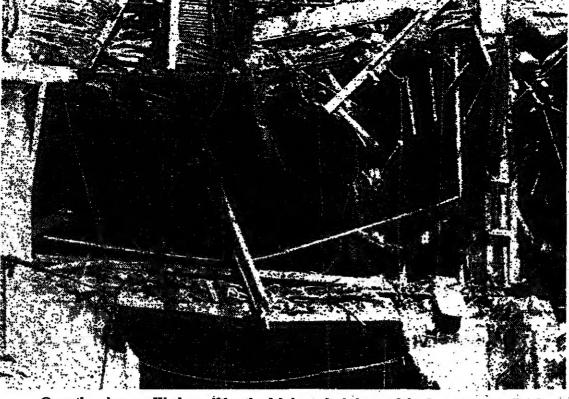

Last night Sussex police were still questioning two men arrested at the weekend but both are said to be unconnected in any way with the bombing.

One man was arrested at Liverpool as he was about to board an aircraft to Dublin. The second was arrested in Brighton after the first was brought there Highly accurate long-delay

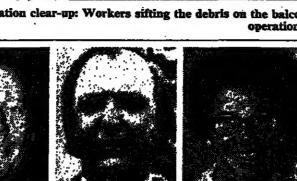

micro electronic bomb fuses, one of which is thought to have triggered the Brighton bomb and which were described as a new development by Com-mander Hucklesby, have been in IRA hands for almost eight years (our Belfast Correspondent writes).

The first were recovered by the Army in Northern Ireland in November, 1976, but they were not used operationally until July 29, 1977, when one was found attached to a bomb in a lavatory at the New

Closer watch on terrorist targets

By Our Crime Reporter

An important major review the Royalty Protection Group, of security for the Royal Family and VIPs is likely to be carried out by Whitehall and Scotland Yard in the aftermath of the Brighton bombing.
At its heart will be the

question of whether potential terrorist targets will have to move closer to total security, cutting them off even further from the British public and bringing security arrangements closer to the American example

In the past our years there have been security reviews in Britain after the attack on President Reagan in the United States and the incident at the Trooping the Colour, when a replica gun was fired at the

Personal bodyguards are provided for the Prime Minister, the Foreign Secretary, the Home Secretary, all Northern Ireland ministers and figures such as the Leader of the Opposition. All former Prime Ministers also receive protection and former Northern Ireland ministers, as well. The Army provides special security for figures such as the GOC in Northern Ireland, Sir Kenneth Newman, the Commissioner of the Metropolitan Police, has a

police protection officer. Responsibility for political figures and the Royal Family devolves on Scotland Yard's section of the Special Branch, for example, air.

and local police forces when they travel. The London officers take responsibility for personal security while the local force deals with the wider threat outside a VIP's immediate entourage.

The United States model is much more obtrusive and comprehensive and examples of its operation were on show during the economic summit in London in the summer. President Reagan's armour-plated car was flown to Britain, he stayed in the US Ambassador's house in Regent's Park, behind an extensive security wall, and only traviled along carefullyscreened routes.

Few chances were taken. Photographers were made to shoot pictures of themselves with their cameras to show they were real and not concealing guns. Timetables were carefully arranged and the President was followed by dozens of security

Nothing like that was seen at Brighton, but perhaps it will in the future.

The review, drawing on the current police inquiry into security, will have to consider questions such as whether the Prime Minister and the Cabinet should stay at party conferences or travel to and from them by,

Aim was withdrawal from Ulster

The Provisional IRA bomb attack at Brighton was intended to lead to the withdrawal of British forces from Northern Ireland by killing the Cabinet and precipitating a security and political crisis.

IRA strategists believed that the death of Mrs Margaret Thatcher and senior ministers would scriously damage Anglolinsh relations and lead to a new approach in British political circles.

Mr Danny Morrison, pub-licity director of Sinn Fein, said that he presumed his party's military wing still intended to attack "prestige" targets in

Insisting that he had no idea of the Provisional IRA's plans, Mr Morrison said that the military wing would say their tactic was working and that they could move Mrs Thatcher. He thought they had set off the bomb in the middle of the night because people in the building wold be asleep and most working class morals such as woeking-class people, such as maids, would not be in the hotel.

Mr Morrison admitted that he did not think the Provisional IRA would get a similar opportunity again, as he did not expect Conservative ministers to stay under the same roof.

The Provisionals believed that in the wake of the Prime Minister's death both London and Dublin would have out-lawed Provisional Sinn Fein. Interament-without trial would have been introduced and leading members of the political wing arrested to appease outraged British public opinion.

The effect in the republic, and particularly abroad, would bave led to British withdrawal within perhaps two years. **Active US**

role offered by Ferraro

From Nicolas Ashford Washington

Ms Geraldine Ferraro, the Democratic vice-presidential candidate, yesterday indicated that a Mondale-Ferraro administration would try to become more actively engaged in seeking a solution to the Northern Ireland dilemma than has been the case with the present and past United States

governments. She said during a television interview that she would favour the appointment of a special American envoy for Northern Ireland, whose role would be similar to that played by United

Thatcher written in the aftermath of the Brighton bomb attack has been published in The Hindu, one of the most widely respected Indian news-papers. The article virtually suggest that the British Prime Minister, whom it accused of ruling like a Tsarina, brought the attack upon herself by pursuing divisive policies. (our Delhi Correspondent writes).

TV-am inquiry after blast coverage

.Independent television programme controllers will today start inquiring into how they can improve coverage of a big

news event on breakfast teleresident of the wake of the lessons being drawn from the Brighton bombing.

The media inquest may be paramount in determining the future of breakfast television in

Britain, as the Grand Hotel bombing was the first big test of its capacity to cover an

By a Staff Reporter important story breaking over-Observers from the industry and ordinary viewers mevitably appland the BBC Television Breakfast Time programme's

ability to run effective footage from the outset, and its fortune in recording the most dramatic exclusive tape, of the rescue of Mr Norman Tebbit. Although TV-am and ITN emphasize that they faced extraordinary transmission

difficulties and that the BBC could afford to have nearly 200 staff for their conference coverage, they admit frankly that TV-am had no crews in Brighton and only one reporter and one presenter at the time the bomb went off. Mr Michael Hollingsworth,

appointed only ten weeks ago as TV-am's programme con-troller, yesterday accepted that "there is a lot to lears from the Brighton coverage".

Threat to **Felixstowe** expansion By Our Labour Reporter

An ambitious plan to double the size of the "free enterprise" docks at Felixstowe, Britain's busiest container port, may be blocked as a result of the national dock labour scheme.

To the annoyance of European Ferries, the company which owns the port, most of the land earmarked for development was discovered to be under the jurisdiction of Ipswich docks. which is covered by the Dock Labour Act, 1947. European Ferries do not operate under the dock labour scheme.

The company said yesterday that it is to seek immediate talks with the port authority at lpswich and the Transport and General Workers' Union in an attempt to solve the problem.

But Ipswich has registered its intention to oppose the extension on conservancy and navigational grounds, and the union made it clear yesterday that if the project went ahead it would expect the operation of the new terminals to come under the dock labour scheme. Clearly the 1,550 dockers at

Felixstowe, who have seen carnings rise as a consequence of being free of regulation, will have little sympathy with the national leadership on this issue. European Ferries made an £8m pre-tax profit from the

'Tracking' of offenders spreads as an alternative to custody

From Peter Evans, Home Affairs Correspondent, East

Unemployed people, former schoolteachers and ex-policemen are being employed as monitor the trackers to monitor the whereabouts of their offenders. Each tracker has two.

At least one of the contacts rough and some London the contact rough and contact r whereabouts of burglars and violent offenders as an alternative to custody.

Tracking, which has been tried out with offenders aged 15 and 16 in Leeds, looks set to spread across the country, Mr William Weston, honorary secretary of the Association of Chief Officers of Probation, told

The original experiment has been followed by one for adult offenders in Halifax. Now there are plans for an adult tracking scheme in Leeds and further extension of the idea to other parts of West Yorkshire. The county probation service in Hereford and Worcester also has a form of tracking for has a form of tracking for adults, according to Mr Weston, who is West Yorkshire's chief

the court, under a supervision or probation order, and administered by the probation service. The trackers are paid about £2.50 an hour for a 16-hour

Poison toll blamed on lack of staff

Many of the 19 deaths from food poisoning at a psychiatric hospital could have been avoided if more staff and basic nursing equipment had been available, the largest health

service union claims today.
The Confederation of Health Service Employees is critical of management of the Stanley Royd Hospital in Wakefield, West Yorkshire, alleging that the administration refused to isolate infected patients,

thereby adding to the toll. Infected staff were ordered by management to return to the wards, although they had not been given a clean bill of health, and patients were exposed to the risk of reinfection and secondary infection from staff, the union says.
"That was a death sentence

to elderly, frail patients," Mr Terry Foster, a Yorkshire area official of the union said. As more patients died, staff appealed for the reopening of

the Snapethorpe Hospital nearby, where infected patients could be isolated, but manage-ment refused to open the unit, which was closed last April as part of a cuts programme, the union says.

The union's allegations are likely to be challenged by Wakefield Health Authority.

Transplant report 'inaccurate'

A report and headline in the Daily Express which said a leading American liver transplant expert came to Britain to advise on a young patient was inaccurate, the Press Council says in an adjudication published today.

The council upheld a complaint by Mr J. R. P. Chapple, district administrator, Cambridge area health autho-

A report by Mr Peter Hardy carried headlines which said a top US doctor flew in to help the "liver boy" and "He will advise if new transplant is needed". It said Professor Tom Starzl would travel to Addenbrooke's Hospital, Cambridge, where the boy was a

Mr Chapple told the Press Council the headline and story were pure fiction. Dr Starz's visit had been arranged before there had been any talk of the operation. He was the guest of the Royal College of Surgeons and the purpose of the visit was to receive an honorary fellowship of the college.

The Press Council's adjudication was:

The Daily Express story, and its headline, concentrated on a central inaccuracy – that the purpose of Professor Starz's visit to Britain was to advise on the treatment of a liver transplant patient at Adden-brooke's Hospital, Cambridge. In fact, the main purpose of his visit was to receive an honorary fellowship of the Royal College of Surgeons

The reporter has told the Press Council that this fact was in his original copy but was edited out for space reasons. The Press Council finds that regrettable. Whatever the reporter's intention, the story as it appeared tended inferentially to disparage the work of the Cambridge medical team.

The complaint against the Daily Express is upheld.

Complaint on **Sunday Express**

upheld

A complaint that a Sunday Express article contained unfair and unjustified comment about a local government officer has lwen upheld by the Press

In the newspaper's Current Events column Henry Macrory noted the High Court awarded £220.000 to a four-year-old girl lucause a hospital error meant she would never be able to speak or walk. He compared this sum for a ruined life with the almost identical £200,000. including lump sum and pension he said was "picked up" by a "senior social worker" in London who lost her job - Miss June Simpson.

Miss Simpson complained that the amount of her "pack-age" suggested by Mr Macrory was quite incorrect and she was in fact a chief officer of the council. Mr Macrory did not check any details with her.

The report, commissioned by the Department of Health and

lished yesterday says.

Service sectors benefit as more workers go it alone to beat recession

A considerable increase in the Government because of its number of Britons becoming self-employed is disclosed in figures published today by the Manpower Servies Com-

The number "going it alone" has increased from 1,840,000 in 1979 when the recession began, to 2.250,000 by March this year. according to the commission's Labour Market Quarterly Re-port. In the 1970s the figures declined by 100,000.

The biggest increases have come in the service industries, particularly banking, finance and insurance, but also in medical and health work, and recreational, cultural and personal services. In 1983 self employment in those groups was half as big again as in 1979. Self employment in the construction industry rose by 70,000 in the four years to 1983, while at the same time employment in the sector fell by about 200,000. The figures reflect a radical change in work organization methods and a prefer-

to sub-contract work rather than employ labour directly. Self-employment also creased between 1979 and 1983 in the distribution, hotels and catering industries, recovering most of the earlier fails.

ence by construction companies

The statistics will be greeted with some satisfaction by the stated mission to encourage small business and the entrepreneurial spirit as the only lasting way of pulling the country out But the Opposition will point previous three months.

out that the main increases have come in the "soft" service industries, not in manufacturing. It will also argue that many of the self-employed will have been forced to go it alone and are not necessarily "thrusting entrepreneurs". The report shows that the

number of people in employment rose by 190,000 in the year to March, mainly due to expansion in the service sector. but also as a result of smaller losses in the production and construction industries.

A bleaker side of the statistics confirms that unemployment has been rising steadily in 1984. with an average increase of 14.000 a month in the three months to August, compared with 7,000 a month in the The number of people who

have been unemployed for more than a year, the "longterm unemployed" was 13 per cent higher in July than last year. There are now 1,200,000 in that category, nearly 40 per cent of the number without a

shortages are now becoming apparent in the new technology sector, the report says. Particular scarcity is recorded in electronics, computing and robotics.

as farmer sues over dead cattle By Patricia Clough

Dioxin fear

Allegations by a farmer in the Irish Republic that emissions from a multinational chemicals piant at Ballydine, co Tipperary, have caused the deaths of more than 150 cattle and damaged his and his family's health, come before the High Court in Dublin today.

Mr John Hanrahan, who farms 264 acres at Ballycurkeen in the rich Suir valley farming area, is suing Merck Sharp and Dohme (Ireland), which has a pharmaceuticals factory and waste incinerator at Ballydine

near by.
Dr Geoff Buck, a British scientist who has investigated the case, first with a team from Trinity College, Dublin, and later on behalf of local farmers, says the symptoms in Ballydine cattle were similar to those in cows at Bonnybridge in Scotland, where a farmer is preparing to sue Re-Chem International a chemical waste

Mr Andrew Graham, have shown low levels of the highly toxic chemical dioxin in soil and animal tissues from the farm, although it has not been established that this is the cause of the diseases or that the chemical was emitted by the

this month.

The possibility of dioxin is so remote as to be incredible,

Mr Hanrahan alleges that 156 of his cows have died or had to be put down particularly because of lung diseases. A number of cows are deformed and have given birth to dead or, deformed calves.

He also claims that paint and rustproofing compounds have been stripped from barns.

of their home temporarily because they often felt ill there. The company "totally rejects" the suggestion that it could be producing dioxin and disclaims all responsibility for Mr Hanrahan's difficulties, a spokesman said. The company had called in experts to check

a solvents recycling plant, and the incinerator which is used to burn some solvents operates only for 10 per cent of the time. he said. He denied that it burnt highly chlorinated substances, which can produce dioxin if not

destroyed correctly.

Mr Mackay said the county had spent £40,000 on studies by various government bodies into the allegations and none had indicated any link with the plant. His office was however recommending tighter monitor ing of its operations.

Mr Andreas Papandreou, who as a fully fledged leader of a Nato country

is ranked as a major prize.

As on other East-West issues, the Greek Government has not sanctions. Washington said if seen eye to eye with Nato on its treatment of Poland and has always opposed economic sanctions against the Warsaw Government. Now Polish officials hope that the end of the diplomatic boycott in the coming weeks will also destroy the basis of economic penalties. Mr Malcolm Rifkind, the

junior Foreign Office minister, is due to arrive on November 4 He should be followed by Herr Hans-Dietrich Genscher and signor Giulio Andreotti, the West German and Italian Foreign-Ministers. Herr Genscher's visit has

been the subject of long negotiation and, since the imbroglio over the planned and

Solidarity patch it up procession of Western subsequently abandoned East From Our Own Corresponde Warsaw appears to be in no hurry to announce the trip

Bearing gifts, a group of British miners last week travelled on a peace mission to Gdansk, birthplace of Solidarity, in the hope of explaining the coal strike to Mr Lech Waless, the Nobel Jaureate and leader of the barread Polish Linion banned Polish Union. In the event, Mr Walesa's priest, Father Henryk Jankowski, said at the weekend the Solidarity leader was too Ill

with angina to receive them and they had to be content with

banding over a miners' lamp and delivering a short message This seemingly unremarkable incident signified the beginning of an armistice between the striking British netween the surporters of miners and the supporters of Solidarity. The relationship between the two unions has been strained, reflecting the complex divisions within the Nationi Union of Mineworkers and the hesitant approach to foreign policy pursued by Solidarity since it was forced

underground.
Officially, the communist governments of East Europe British miners, led by Mr Arthur Scargill, against the Nationl Coal Board's plans to

close pits.

But for Solidarity supporters But for Solidarity supporters
the issues are less clear-cut.
For them, Mr Scargill, a
Marxist, is already on record
as saying the Solidarity is an
anti-socialist organization.
Whereas American trade
unions sent support to the Solidarity underground, little or nothing came from the British miners' union. Mr Walesa has criticized Mr

Scargil's running of the stike and has even talked approvingly of the need for "strong leaders" when referring to Mrs Margaret Thatcher.

But now the time for mending fences seems to have arrived. The British miners' visit coincides with a statement issued by the provisional coordinating committee of the Upper Silesian Solidarity branch that incorporates most of the miners still active in Solidarity supporting the British strikers It also appeals for understand-ing for the way trade unionists have to operate in "totalitarian

One Solidarity intellectual in Warsaw said: "It seems that the relationship to Solidarity is an embarrassing issue for the British because it highlights the divergences of philosophy between Arthur Scargill and the men he tennesteet."

the men he represents.
"Scargill is in the old West European miners' tradition of cultivating 'fraternal' links with official government run trades unions of the Soviet block - but these are precisely the unions that Solidarity wanted to displace. Now Solidarity calls for no more or less than union pluralism, the existence of several unions side by side, and I cannot see why Mr Scargill should object to that."

Peru reshuffle promotes anti-guerrilla experts

Lima (Reuter) - President Fernando Belaunde Terry of Peru has sworn in a new Cabinet which put two antiguerrilla experts into senior political posts. There are seven new ministers in the 19-man Cabinet. The reshuffle came as the Government prepared for next April's general elections amid a growing threat from Maoist guerrillas.

The strike has closed schools and creches, particularly important in a country with a high number of unmarried mothers and working women, halted the mail and closed swimming pools – a big loss for Iceland's population of 230,000 for whom swimming is an important pastime.

The few government-controlled liquor stores are closed. though many people, including the proprietors of restaurants and the growing number of discotheques had with remarkable foresight anticipated the dispute and stocked up accordingly. Iceland is not yet in danger of running dry.

Buses are no longer running and newspapers ceased publication in September when printers went on strike.

Despite the deprivations, life appears to have been little affected and there are few hortages in the shops.

The very success of iceland's tiovernment in taming run-away inflation has brought about the present industrial crisis. In a country which, had grown used throughout the 20 years to the early 1970s to double-digit inflation; the figures for 1983 came as a jolt to the system, reaching in one quarter an all time high of 132

Cumulative inflation over a decade was 3,500 per cent, interest rates were 47 per cent, the balance of payments deficit had got progressively worse reaching 10 per cent of gap in 1982 while foreign borrowing at a ratio of 48 per cent to gap, was too high.

Icelanders had not seemed too worried about high inflation until then. They had learnt to live with it and perpetuate it by wage indevation under which pay levels were adjusted in line with the cost of living every three months.

But faced with runaway inflation the Prime Minister. Mr Steingrimur Hermannsson abolished indexation for two years, perhaps for ever, devalued the kroner, and restricted wage bargaining, allowing only low pay increases.

Although the Government could declare the strike illegal, both sides agree this would deepen the crisis, as many workers would refuse to return to their jobs.

The Government is confident there is still strong support for its tough line on inflation and that the drastic measures were Jezzine. Israeli reporters in necessary to rescue the econ-southern Lebanon said the

America to step up its shuttle flights

From Nicholas Ashlord

Washington
The space shuttle Challenger's successful landing at the Kennedy Space Centre in Florida, the site from which the craft was innuched eight days earlier, means the US can now move ahead with a stepped-up schedule of shuttle flights.

The next mission, the fourteenth since the shuttle programme began, is due to begin on November 7. Another will take off on December 8

Landing as often as possible the shuttle's home base in Florida is a crucial goal of Nasa planners, It saves time and money by eliminating the ferry trip from Edwards Air Force base in Califorina, where the craft has to land if it cannot return direct to Florida, and by having it available to maintain a speeded-up schedule of one flight a month for the next year and a half.

The crew of fire men and two women, the largest ever launched into space, succeeded in carrying out an ambitious programme of experiments and space walks despite a series of minor technical breakdowns at the start of the mision.

During their eight days in space, the astronauts launched scientific satellite for monitoring the earth which will help scientists make better seasonal and yearly weather forecasts; used a space-borne mapping camera to map about 9 million square miles of the Earth's surface: and used an imaging radar system to construct photograph-like images of the

Washington speeds aid to Israel

From Moshe Brilliant Tel Aviv

Mr Shimon Peres, the Israeli Prime Minister, said on his return from Washington vesterday that the Adminis-tration had been "extremely forthcoming" without imposing any economic or political conditions or pressure.

Interviewed in Ben Gurion sirport on his arrival, he said the Americans themselves had initiated the arrangement that the \$1.2 billion (£975m) annual economic aid be transferred to Israel immediately, instead of the usual instalments. The transfer is intended to give a breathing space to the Israelis, whose hard currency reserves have been dwindling.

Mr Peres said the American eve on how to implement measures to secure the northern part of Israel and allow the troops to come home from Lebanon. The Israeli Defence Ministry was working on options and he expected that in three of four weeks they would he ready for submission to the Cabinet.

The Prime Minister said the United States agreement to cooperate in restructuring the Israeli economy was "a great opportunity" and carried hope. but by no means released Israelis from the duty to put their own bonse in order by saving foreign currency, reduc-ing consumption levels to increase productivity and other

belt-tightening measures. • LEBANON DEATHS: A Beduin tracker serving in the Israeli Army and an Arab guerrilla were reported killed early on Saturday fighting in

"Isn't it time you were measured up for an IBM Personal Computer?"

For businesses of all sizes: computers of all sizes.

We've always designed our Personal Computers so that they can adapt to different needs and working environments.

To that end, we make our hardware as flexible as possible.

And that's why we're so pleased to announce an extension to the range of Personal Computers.

For people who don't stop work when they leave the office, there's the IBM Portable Personal Computer.

It does almost everything a desktop Personal Computer can do, and you can use it wherever there's a mains socket.

The standard IBM Personal Compu-

ter is one of the world's most popular tool for meeting the challenges of modern times.

And because you can upgrade it like all IBM Personal Computers, it's suitable for anyone from a one-man business to a multi-national corporation.

If, however, you need to store large amounts of data, then it's worth looking at the IBM Personal Computer XT

From recording complicated accounts to handling large inventories of stock, the IBM PC XT can do it.

And finally the powerful and nimble IBM Personal Computer AT. It's perfect for

people who need even greater speed and memory capacity. Its new technology means that it can run almost all the programs written for the IBM Personal Computer, at up to three times the normal speed. And you can expand its memory to 41 million characters.

With all this to think about, perhaps the best part is that you don't have to worry about which model will suit you best.

Simply phone 01-200 0200 or clip the coupon for your nearest IBM Authorised Dealer or Retail Centre.

They'll help you cut our hardware to fit your needs.

Roger Kojecky, IBM United Kingdom Product Sales Limited, FREEPOST, Greenford, Middlesex UB6 9BR. (Telephone: 01-578 4399.)

Election fever takes hold as India gears up for December campaign

India has election fever, and the country's political temperature is rising. The date is not known - though it is presumed Mrs Indira Gandhi, the Prime Minister, has made up her mind but the opportunities for helding an election are becoming progressively fewer.

According to the constitution, the new parliament must meet by January 20 next year. Since counting of votes from such faraway places as the Himalayan villages of Ladakh er Arunachal Pradesh and the tiny islands of Andaman or Nicobar can take anything up to three weeks, it is widely expected that the election must be held by December 31.

The Prime Minister has to give 42 days' notice to the clectoral commission, so the carliest it could take place would be the last few days of next month. Essentially, if the election is to be held on time, it

will be in December. All the parties, therefore, are getting into election gear as fast as they can. Mrs Gandhi's Congress (1) is spending this week coming to grips with the continuing problems it faces in ensuring The elected

reelection.
General secretaries of the the party morale and organiza- registers.

From Michael Hamlyn, Delhi tion. But the key questions are to do with the selection of

candidates. It seems clear that the power to select the condidates - the scriously out-of-date registers, issuing of the Congress "ticket"

The latter would not contain so many of the illegal migrants parties and centralized in the hands of Mr Gandhi and his colleagues. The newly-elected MPs will therefore be considerably more in their power.

The Bharatiya Janata Party, of the parties with strong support of Hindu communa-lists, is holding its national council meeting. It has decided it will seek an alliance, through agreements not to oppose each other at the hustings, with the Communist parties, whose policies are likely to be diametrically different, but who

The Lok Dal of Mr Chaudhury Charan Singh and the Janata Party, led by Mr Chandra Shekhar, despite talk of their merger, have not managed to announce it offi-cially. Talks are reported to be

The electoral commission has announced that it is ready and willing to hold elections as soon party – foremost among whom is her son Rajiv – have been interviewing officials from Congress committees of the 20 has been recently heard, states. Many questions concern have got up-to-date electoral

In Assam there is some argument about whether it would be more appropriate to use out-of-date registers or many of the illegal migrants from Bangladesh who have caused much bitter bloodshed in the recent past.

Elections could well be put off in these two states. The last Assam election, 20 months ago, which is the more right-leaning caused more than 3.000 deaths. Punjab, despite the present apparent calm and diminution of terrorist activity, could still be burst wide open by a divisive election campaign.

There is also a constant fear

among opposition members that Mrs Gandhi might decide to do the same to elections in all the states. A long article in *The Statesman* indicated the possibility of a mid-November recall of Parliament, which would have the task of altering one word in the constitution. It would thus read six years instead of five for the life of a parliament, and Mrs Gandhi would have another 12 months

But Mrs Gandhi has said the elections will take place when they are due and putting them off would cause such an outcry that it could inflict the severest damage on the unity and integrity of the country which she has constantly pledged to Focus on women political prisoners

Mrs Ogur (left) and Mrs Yilmaz: Beaten, given electric shocks and hung from ceiling.

Tortured Turks seek asylum

Sema Ogur and Nursal Yilmaz were two student friends at Ankara University, active in human rights affairs and members of a banned youth organization, when they were arrested in February, 1981. The two young women were charged with "making communist propaganda" and held at Ankara Police Headquarters — Anala Police Headquarters — motorious in recent years as a torture centre — before being sent on to Mamak Military Prison, where they were again beaten, kicked, given electric

shocks and suspended by ropes from the ceiling.

Mrs Ogur's husband,

Mehmet, arrested at the same time and also severely beaten,

PRISONERS OF CONSCIENCE was forced to watch his wife's torture. She, in turn was made to witness his.

Today the two women are in London, waiting to hear whether their request for political asylum has been granted. They escaped from Turkey together, on black market passports, at a brief moment between trial and

Their cases are being high-lighted by Amnesty Inter-national, which commemorates its annual Prisoner of Con-

science Week this year by focusing on women political prisoners — women of courage" — who, they argue, are specially vulnerable to certain techniques of torture and suffer repercussions applicable only to them, such as rape and the risk of presenancy.

to them, such as rape and the risk of pregnancy.
For Mrs Ogur the torture began immediately after arrival at the police headquarters.
"During the first 21 days I was twice taken to hospital," she says, "I spent one night in the consequence would be a drive.

the emergency ward on a drip. I had been punched, the soles of my feet had been beaten and I had been left hanging in a crucifixion position. The pain was so bad that my screams drowned the torturers' voices."

Growing influx creates tensions

Hispanics begin to shake off apathy

States, a significant part of cuts in federal aid in the island, changing America, slowly awak. The third group, 5.5 per cent

The frontier is where Anglo

and Latin-Indian America rub. together, the meeting place and bridge between two immense and dynamic cultures. Mexicans have always sought a better life in El Norte. They poured in after the revolution of 1910-1920, screngthening the border country's accent in language, food clothing and architecture. In the past 20 years there has been a new wave of migrants, pushed by Mexico's swelling postulation and room economy. population and poor economy. Today a fifth of California's 24 million people, and more than a fifth of the 15 million people of Texas are Hispanic, mainly Mexican. More than half the people of San Antonio, site of the Alamo, are Mexican and the city has in its mayor, Mr Flenry isneros, a nationally-known

Hispanic political figure. In all of the United States there are 16 million Hispanics. more than 6 per cent of the population. They are more fertile and growing faster than any other group. Their average age-23-is far younger than the actional average of 31.5. The national average of 31.5. The figure of 16 million does not include illegal migrants, thought to number more than six

million.
The term "Hispanic" is a portmanteau covering four distinct groups with a Spanish language background. Three-fifths of them are Mexicans, often known as Chicanos, once considered descriptory, though considered derogatory, though now a sobriquet worn with

The second biggest group, 14. per cent, are from Puerto Rico. They enter freely because the island's people were given US citizenship in 1917. A great wave of them migrated, mainly 10 New York, after the Second World War and created Spanish Harlem. There is now a new

the past year there has been a large increase in the numbers of Nicaraguans and Salvadoreans moving in, legally and illegally to find political refuge and jobs. The Hispanic influx has

created tensions, especially in the South West, where blacks complain that Mexicans are taking their jobs and whites have moved out as browns have

moved-in. Anxiety over the new arrivals, especially the "wet-backs" (wet from wading over the Rio Grande), who come illegally, has led to the introduc-

HISPANICS IN THE US: Part 1

tion of a Canute-like control measure now struggling through

There is doubt whether it will be enacted or have any use. But-it has stimulated argument over the question of controlling migration into a country built and constantly renewed by migrants. The argument that Mexicans take jobs from Americans has been shown, generally, to be wrong. On the contrary, the newcomers - legal and illogal - help stoke the

economy. Nevertheless, the stir over-control is making more Hispanics politically conscious. Hitherto they have been apathetic, but they are strong in states like California, Texas, New York and Florida, which are significant in presidential elections. They are being courted and beginning to realize: they have muscle. How they will use it as their numbers grow remains to be seen.

Kangaroos fail to take a birthday leap forward

birthday party was really the most important Market event of all.

The Kangaroos are a pressure group devoted to smashing down the internal frontiers of Europe. A kangaroo is their mascot because of its symbolic ability to leap over things such as customs and immigration

EEC today that in the week of beir birthday the Kangaroos to worry about two cause and to consider a real body-blow to their campaign at the Grand Hotel in Brighton.

The first setback was the pparently irrevocable decision the British Government to follow the example of every other member state by charging value-added tax on imported goods at the dockside. Until now Britain has demanded payment of VAT only after the goods reached their final destination. This has greatly reduced formalities for goods coming into Britain, Two factors have made the

Government decide to join the herd. The first is that early payment will provide a one-off bonus of £1.2 billion in cash to the Exchequer. The second is that British industry has

The Kangaroes rightly complained that it is at celebrated their an unfair disadvantage with its second birthday EEC competitors because it has last week. The to pay its VAT on the nail party was a while its rivals age given a small affair at

will cause such administrative chaos that it will rival a dock strike in causing traffic jams.

The second setback is the apparently irrevocable decision of Bonn to go it alone in introducing exhaust emission standards for cars which essentially will shut West Germany's frontiers to imports of vehicles from other EEC

The bomb at the Grand Hotel may also blow up any early hopes of doing away with passport formalities inside the EEC. None exists at the moment between Britain and Ireland, although they are in force with the rest of the EEC The Home Office has always argued that this is a necessary

check against terrorists.

But, with the most dedicated terrorists coming in with no passport control at all, the rgument falls flat. If anything, there are likely to be further calls to end the no-passport between Britain and

So the two-year old Kanga roo is still a delicate young animal, threatened by extinc-tion. To survive it will need to show more cunning than is symbolized by its give-away birthday present this year - a

Sri Lanka fishing curfew

From Our Correspondent Colombo

A dusk-to-dawn curfew, from pm to 6am, has been imposed in Sri Lanka's northern territorial waters to prevent Tamil rebels from smuggling arms from Tamil Nadu, in southern India's northern province under cover of darkness, and also to prevent poaching in Sri Lanka's waters by Indian fisherman.

The state-owned radio, announcing the curfew yesterday, said fishermen in the north would be provided with other areas to carry out fishing

In the past two days Sri Lanka Navy patrol boats have rounded up 91 Indian fishermen from 17 trawlers for allegedly poaching in Sri Lankan waters. They are to appear before a High Court judge

There have been reports of demonstrations by Indian fishermen at Rameshawaram in

Delhi protests at | Striking unions threat of national Disney boycott

From Ivor Davis Los Angeles

Leaders of five striking unions at Disneyland's Magic Kingdom have threatened a national boycott of the organization. The union presidents, in a statement issued through their head-quarters in Washington, said the boycott by their four million members, would include Walt Disney World, the huge entertainment complex in Orlando, Florida.

Disneyland strikers, mean-while, put new picket lines round Disney studios in Burbank in an extension of the almost three-week-old strike. About 2,000 employees are involved in the strike which was called over wage talks. The unions said the boycott would take place if Disney officials did not come up with new offers. Disneyland officials said about 600 employees had returned to work and another 250 had expressed their intention of doing so. Disneyland has stayed

هكذامن الأصل

With today's criminals, it's more grev cells we need.

Much of London's crime gives every appearance of having been committed by mindless morons.

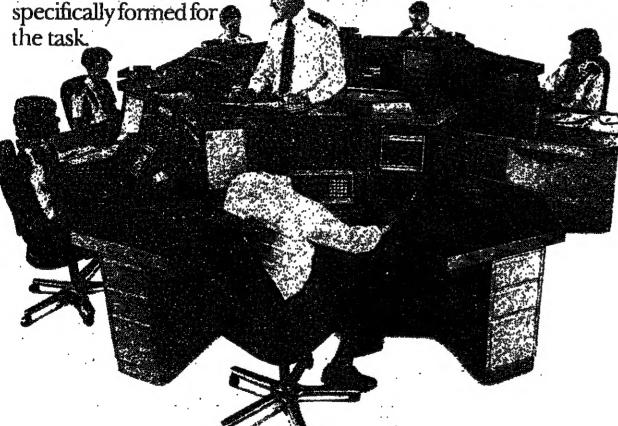

By contrast, some financial frauds are so complex, it takes some of our top brains months to unravel them.

Whichever end of the scale we're dealing with, a quick chase and an armlock isn't always the solution.

In our opinion, it's infinitely better to be one step ahead of the criminal rather than a couple of paces behind.

Brainpower or Manpower?

These days, we place a lot more emphasis on intelligence and keen observation work. And this applies just as much to the bobby on the beat as it does to the special units we have

Communication and information systems are now computer-based.

Like the criminal fraternity, we're always on the lookout for new ideas we can turn to our advantage.

The Neighbourhood Watch Schemes that are proving to be so successful are just one example.

Micro-chip technology is another.

A lot of routine investigation is now done by computer; tracing fingerprints, checking on stolen cars, cross-referencing information to find a common link-that sort of thing.

The traffic in central London would be even more of a nightmare if it weren't largely computer controlled.

Our central Command and Control complex and communication links with local police stations have all been computerised, too.

In short, the Met is a very sophisticated machine. And it runs on brain power as much as manpower.

Who needs brains on the beat?

Now more than ever, you need a bit more under your helmet than a neat haircut.

nearest and dearest.

You might be the first on the scene of a serious accident. You might be called to help someone who's collapsed

on the street.

You might have to crawl onto a roof with a suicidal lady who wants to throw both of you into the street below.

Even facing a mugger with a knife requires a bit of quick thinking before you put your self-defence training to the test.

Most people would say you'd have to be barmy to do it The reverse is nearer the truth.

A police officer's job calls for someone with a lot of common sense and a very level head indeed.

You can't be over-qualified.

The sort of qualifications we look for are at least five good 'O' levels. But if you happen to have a couple of A' levels or a degree, so much the better.

They'll help you go further, faster.

Everyone starts on the beat and anyone with ambition car go just as far as their ability or inclination will take them.

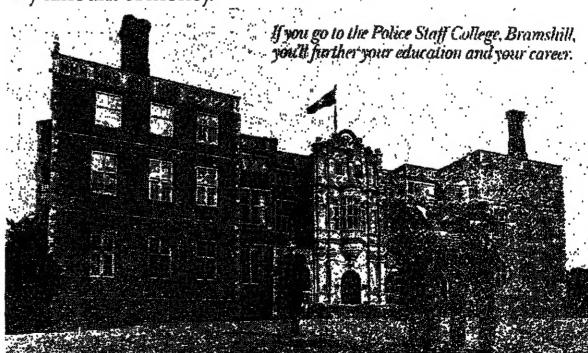

Raw recruit to Inspector in under five years is not unknown As you can imagine, competition is fierce.

Rest assured though, if you've got enough up top, that's where you'll end up.

What's the reward?

It's a well-paid job. But if your sole motivation is more same won't get past the two-day Selection Board.

In the Met, you'll have to do things others wouldn't do for any amount of money.

On the other hand, what could match the satisfaction of putting away a really nasty villain, helping to reduce the tensions in a multi-racial community, or cheering-up a lost toddler with an ice-cream?

In hard cash, the very least you'll start on at 181/2 (our minimum age) is £8,481, including a London allowance.

If you're a bit more mature, you'll be better equipped for the task. So over 22's start on more.

And for anyone with aspirations in that direction, a newly promoted Chief Inspector takes home a basic salary of £15.636 On a par with any manager outside the Met.

You'll have to be at least 172 cms tall if you're a man, or You might have to come between a wife-basher and his 168 cms for a woman. The Selection Board will see whether you measure up or not.

For further information, phone (01) 725 4575. Write to The Appointments Officer, Careers Information Centre, Dept MD600, New Scotland Yard, London SW1H 0BG.

Or visit us at our Careers Information Office in Victoria Street.

The new revolution – through evolution

His face, huge and bearded, looks unkempt, faintly grubby, like a sleeping

from the sides of bomb-pocked buildings, contains both menace and a kind of saintliness, a police poster face,

One would not be unduly surprised if the text underneath had read: "Wanted, Dead or Alive - Karl Marx, last seen Dean Street, Soho. May be armed." The slogan actually says: "On the thirty-fifth anniversary of the founding of the DDR we have fulfilled 74 per cent of our plan.

Ah ves Karl Marx As Eastern Europe celebrates its various birthdays, the anniversaries that mark the Soviet liberation or the establishment of socialism, Karl Marx seems have been left off the invitation list. His name is everywhere and is everywhere

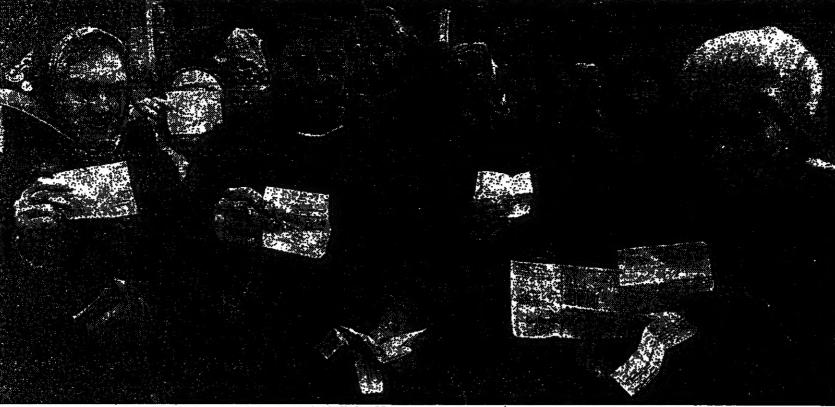

Would the old man be happy with the states that have been the standard-bearers of his ideas for the past 40 years? The centrally planned economy has failed to adjust to modern times and the communist leaders, with varying degrees of vigour and commitment, are smuggling bits of capitalism back into the system.

This is known as reform, or rather because the word sug-gests past failure, new economic measures, or set of measures or some similar combination. The game is Trojan horsemanship and Marx would not be

But at least one Marxist tenet survives, albeit thanks to a political paradox: the worker, given a starring role in the drama of history by Marx, is still a revolutionary force. Not. of course, in western societies where, most sociologists agree, he is homo conservativus, taking to the streets only in the cause of sectional interest, such as pit closures, but in the workers' and peasants' states of the Soviet

Only in Eastern Europe - in East Germany in 1953, in Hungary in 1956, in Poland in 1956, 1970 and 1980-81 have the workers posed a consistent threat to the survival of governments. Even when these uprisings are crushed, the working class continues to be the natural reservoir of discon-

One Cracow journalist explained the phenomenon in the most volatile working class in idiom of Acsop: "A rabbit goes the Soviet bloc. But workers into his local food shop and throu asks for oranges. 'No oranges', world are being put under or she can take delight in her ingliving standards.

Rationing warmth: The farming community in Poland have to present documents to claim their coal from the Government

comes the inevitable reply. 'Nie strain, ma'. The rabbit returns on the morrow. The answer 'Nie ma'. Unavailable. The answer is still,

When on the third day the rabbit demands oranges, the queue grows restless. Perhaps there really are oranges? Per-haps the shopkeeper is hiding them? The shopkeeper becomes aggressive. Listen, rabbit, if you ask for oranges again, I am going to take my sharpest nails and pin your ears to the wall." On the fourth day, the

rabbit reappears. 'Any nails?' he asks. 'Nie ma.' 'In that case'. says the rabbit, 'are there any

And so it is, even after the destruction of free trade unions and the banning of Solidarity, in Poland. The workers still put forward impossible demands in the confidence that they will one day become possible. At the same time they adjust to the repressive potential of the state. If the state can hurt you, then

don't provoke it. If the state has the potential but not the confidence to hurt you, then

faniasy - are there any oranges? in the workers' state.
Poland, of course, has the

carry on demanding.
It is this blend of realism are there any nails? - and - that characterizes the worker

Accustomed to decades in which the basic minimum wage provided a security blanket for all and when bonuses for "overfulfilment" of plans were almost inevitable, the worker has come to feel that whatever the quality

of his labour the can get by

comfortably The ambitious did work on the side, or joined the Communist Party to get accelerated promotion. The majority clocked in and clocked out.

In Erfurt, in East German Thuringia, one of the red banners says: "Me in Freund, der Plan" - My friend, the plan. In an Erfurt pub, Horst, a shift worker, described the odd sense of liberation, of inner emancipation that came from the old work system: "The point is, your brain stays at home. It's like the hippy nirvana. In the do the absolute day you

Then if you want to double your salary or if the boss is worried about dropping below the plan targets, then you put in overtime, if you're happy on the basic pay, then you go home, still fresh.

"Look at the waitress. She is freed from the profit motive. She knows that she is going to be tipped next to nothing by boys doing military service. So she has a choice - she can gossip

job, make waitressing into a performing art."

Restoring the link between the quality of work and the actual level of wages is at the heart of the economic reform. productivity, a structural against innovation and wage inflation are the three main factors that not only prompt the need to reform but may also sabotage it.

If in doubt, listen to the bad, black jokes that come out of any Czech or Polish factory. "They pretend to pay us and we pretend to work", is a typical after-work comment. "They can't pay us any less than we

Romania is going about its wage reform with the subtlety associated with the rule of the Ceausescus, · A so-called national agreement has introduced two changes - workers are remunerated on the basis of their factory's results - if the output is higher than planned the salary is automatically higher, if lower then automatically lower - and the elimin-ation of minimum wages.

The presumed aim is to persuade workers to work out of fear. This year, say union officials, about 70 per cent of industrial concerns have exceeded targets as a result. But the verbal evidence seems to be'

A basket-weaver writes, bemused, to western embassies asking for intervention at a high level. How can he keep up production when his supplies of raffia have not arrived?

Thoughout the bloc, subsidies are being phased out and prices of food, refrigerators, cars are going up. The worker is having to work harder and

At the same time, economic reform in its headlong sprint to earn hard currency for such heavily indebted countries as Hungary, Poland, Romania and non-aligned Yugoslavia, is allowing the social welfare state to run down.

Damp ancient hospital buildings where patients lie in the corridor, overcrowded classes, new housing estates with few shops and poor transport links, building projects that are started and abandoned for two or more years while fresh funds are found - the worker may well feel that the state is not honouring its part of the social contract.

The worker responds accordng to his confidence in institutions that are supposed to represent him, - trade unions, worker councils, employee consultation boards.

Often the worker ignores official "transmission belts". In countries where there is a high likelihood of sacking Czechoslovakia - or low politidiscontent is absenteeism or drunkenness or both.

In Romania or Poland the response is sometimes a work stoppage. The national agree-ment in Romania is said to have sparked off protests in a Brasov truck plant - the threat of instant dismissal resolved the problem - and in the mines in the Maramures province.

In Poland, in the post-Solidarity era, none of the official union have made use of the legal right to strike, but there have been unofficial stoppages.

The trend that is emerging is an increasingly alert and intelligent working population who, under pressure to produce more and carry the burden of "reform", are growing restless at their treatment by governments which claim to represent worker

The old formulae - bring the workers into the party, make them co-responsible - and the dodges - import oranges, stock up with consumer goods - are failing. Marx's worker paradise should have arrived by now, but the radiant future has been

Collision

to heights of 10km. He discovered "cosmic rays" - a continuous rain of high-frequency subatomic par-ticles that falls through the atmosphere to Earth and sometimes continues into it. Later investigations showed that the showers of cosmic rays originate when high-energy particles from outer space collide with the atoms and molecules of the

upper atmosphere. . These subatomic aliens are mainly the nuclei of atoms. For the most part they are protons— nuclei of the simplest atom, hydrogen, which is also the most abundant element throughout the universe. However, experiments have shown that the primary cosmic rays contain heavier nuclei, includ-ing silicon and iron which are formed at the hearts of huge stars, at least 10 times as massive as the sun. Such stars ultimately die in violent explosions known as "superno-vae", which may fling their contents, from hydrogen nuclei to iron, out into space to become cosmic rays. Some studies suggest that at certain higher energies iron nuclei become moré important, though not all researchers agree.

Universal mystery

The origin of the cosmic radiation remains a topic of great debate. In general, the magnetic fields that permeate

our galaxy should mix up the cosmic rays to the extent that they appear to rain down on earth equally from all direc-tions. But even the question of whether the rays all originate within our galaxy or come from still further afield is far from being answered conclusively.

Research teams from West neds an density.

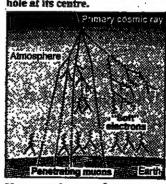

Germany and Brighton have reported evidence that Cygnus

X-3, a violent emitter of X-rays

Lyc Osmic within our Milky Way galaxy, might be a source of high-energy cosmic rays. But the possibility that the cosmic rays are messengers from more

A series reporting on research: COSMIC RAYS

A recent analysis of data collected by the University of Adelaide suggests a slight excess of cosmic radiation from the direction of Centaurus A. a. remarkably active galaxy visible from the southern hemisphere. At the very highest energies, the cosmic rays seem to come from the general direction of the cluster of galaxies in the constellation Virgo, which includes a giant galaxy. M87, believed to have a huge black

How cosmic rays form much that penetrate the earth

Tunnel vision

In the 1920s physicists studying cosmic radiation reaching the ground discovered that the rays contained a penetrating component, which could pass through several centimetres of lead. We now know that these penetrating rays are "muons" — subatomic patieles similar to destroys but particles similar to electrons hut some 200 times as heavy. Cosmic-ray muons can in fact carth, as an experiment in the London Underground at Hol-born has shown. More recently, Soviet scientists in particular have been keen to put this property of cosmic radiation to good use in studies of the composition of ground just helow the complex to grow the complex to compare the complex to compare the complex to t

helow the earth's surface. Muon detectors buried below ground can measure variations in intensity of the penetrating radiation, caused by differing amounts of absorbing matter above the instruments. They can reveal unsuspected natural tunnels and regions of varying

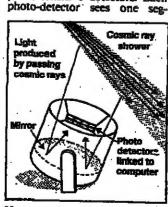

Eye of the fly

Cosmic-ray detectors come in all shapes and sizes, but many are big - big enough to capture and record the rare particles with the highest energies, for these are perhaps the most enigmatic and therefore the

most interesting. These ultra- ment of the sky, rather as a fly's high-energy particles generate compound eye does - hence the large showers of secondary name. cosmic rays when they strike the atmosphere. As many as 10,000 million shower particles

can reach sea-level. A standard technique is to use an array of several large-area particle detectors, spread over an area of several square kilometres. Each detector gives the density of particles at different points on the array. The results are combined to calculate the overall density, from which the energy of the primary particle can be estimated.

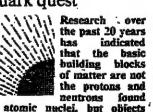

A different technique underdetectors, set up in the Dugway Desert in Utah. The targer of the two "eyes" consists of 67 mirrors, each 1.5m in diameter, supported in large dustbin-like containers. The mirrors focus the very faint light generated in the atmosphere by the passage of a cosmic-ray shower onto photo-sensitive detectors. Each

by the light they generate

A very different detector is, called MUTRON and is run by a group of Japanese researchers, This contains two 400-tonne iron magnets, to bend the paths of incoming cosmic-ray muons. It also includes 120 tonnes of iron in a "target" designed to intercept the muons and force them to react. Together the apparatus provides a powerful means of measuring directly the energies of cosmic-ray muons.

Quark quest

atomic nuclei, but objects known as quarks. The quarks make up the observed protons and neutrons by clustering together in bunches of three. So far no experiment has shown conclusive evidence for the existence of single quarks, but in the late 1960s Brian McCusker at the University of Sydney claimed to have found a quark in a detector studying

cosmic-ray showers.

McCusker's evidence has been criticized over the years; recently he has published a rebuttal of this criticism. By combining his results with those on other novel phenomena in the cosmic radiation he also estimates the number of quarks. arriving at sea level.

THE TIMES MONDAY OCTOBER 15 1984

MONDAY PAGE

Home and a heart for 27 children

Alan Franks meets the modern day equivalent of the old woman who lived in a shoe and her family aged from their twenties to three-month-old twins

The old woman who lived in a they arrive on the threshold of There's nothing special about shoe has nothing on Jeanette the Roberts family they will be us."

Roberts, who lives in East confused damaged and scarred. It all started when Jeanette. London. She has a family of 27 children. 18 of whom are still living at bome on a weekly housekeeping bill of £600. She is not married, although she was engaged more than 20 years ago. She broke it off because her flance wanted four children and she wanted none,

The oldest child is now 27. and the youngest are twins of three; Many have a mental or physical handicap.

For a while, the general assumption in the streets of the neighbourhood was that the house - two large four-storey buildings knocked through into one - was a children's home; congsters and adolescents of all shapes and sizes coming and going down the front steps, the house fairly pulsating with activity from root to basement and a district nurse living in.

Of course the extrordinary Roberts menage is a home for children, but not in the institutional sense. All the children are called Roberts and they all refer to her as Mum. Eleven of the present 18 are fostered, and the remaining seven adopted. The ones who do not belong to the second category would like to so so leanette herself would glashy go along with this even though it would mean running into the classic Cutch 22 of adoption, whereby the fostering allowance has to be foregone and the income of the house diminished.

Not only are the Robertses the phimale one-parent unit, they are also a model family, paradoxical though that may sound; for any new intakes are now considered by Jeanette, in consultation with the others. with a view to whether they would fit in with the existing structure. With three 17-year-olds, that age group is fully subscribed, But a haby? There is a fusty chorus of "Y-E-St" all around her in the living room. and she gives a rather stoical

All the children here come from broken homes. You ask one teenage girl to describe the environment from which she came, and she can I,do it. She is: articulate, almost gamulous, but it's no good. She thinks for a very long time and says: "I And then at last: "Hell." Twelve come from children's homes. with referrals from a variety of local authorities; the rest have either been orphaned or are the victims of parental violence and abuse.

Some have been through more moves in their short lives than they can remember. Maybe they have disrupted home after home, or maybe they have driven a wedge Whatever the history, the "People don't seem to accept chances are that by the time that we're just a big family.

The philosophy upon which Jeanette bases her household is devastatingly simple; it is to turn here who has worked his way through several couples. Now it's very difficult for parents to cope if it is their own children who suffer as a result of this; my children on the other hand, are stronger because of their experience. They expect that behav-iour from children coming into the family because they know what they were like themselves, The boy-I'm talking about - he knows very well that the others have been burt too.",

The lad in question warms to his life story: When I came here I was 10, and my first reaction was to get one over on them, you know, be the boss. I thought I was Jack the Lad, and a bit flash; I had to tone it down a bit. In the children's home I used to get up to all sorts of things - wreck the place, swear a lot. Yes of course I got told off, but'I didn't take no notice. Just

ignored it. Here Mum explained to me what I was doing wrong, and I learnt that I couldn't get away with it.

Is may all sound rather glib. like the confessions of criminals reformed through the influence of Christian piety. But it's hard to dismiss the evidence of your eyes, even on a brief visit to the family; the older ones are clearly not just playing with their younger siblines - they are looking after them, minding them, particularly the little Downe's Syndrome toddlers, in a way they might never do if the family were smaller and the mother therefore more avail-

By any standards Jeanette Roberts's is an extraordinary between a set of foster parents story, although neither she nor and their natural children. any of her family is having that:

who is 44, was a district nurse in her twenties, and began a children's club in the local that very damage into a source mission hall. Soon after this she of collective strength: "Take a was offered a one-bedroom flat difficult child who has come so that she could take in needy from a broken home. The first or deprived children in the thing he'll try to do is destroy evenings. During that time she the relationship between his was approached by Family foster parents. We have one Service Units to take in a very difficult child of 14, and then another of five. From there it was a move to a two-bedroom house and the whole thing began to snowball.

When I had six, I was asked to take a pair of two-year-old twins. I felt I just couldn't cope, but I agreed to have them for a month. When after that time a place hadn't been found for them, I couldn't bring myself to part with them, so they stayed. When I was up to 10. I thought no way can I take any more. The next time a child comes knocking at my door, I'm afraid the answer's going to have to be

It did not quite work out that way: the next child was Jeanette's own nephew. "It made me look at the whole thing all over again and, well, "A sweep of the arm round the

Only last month there was a new arrival, a 12-year-old boy who, one of the tabloid newspapers said wrongly, had slimmed down to make himself more attractive for his TV

appeal for a home.

When asked how she has coped, the answer is again very simple: "How I cope is, I enjoy it. As much as I give to them, they give back to me."
There is an air of democracy in

the place. Every morning there is a family meeting after morning prayers, when prob-lems can be aired. "It may be that a child is out of line in his behaviour, and I say: "Let's have a look at this," Or perhaps another child needs extra help. I'll give you an example. Two twins, one extrovert, the other introvert. The extrovert one was getting all the attention. I had been watching this for weeks and noticing that he was coming along great guns, while the other one was sitting playing on his own most of the time. So I pointed this out to the rest of the family. I only had to say it

integration is not always easy, and she reckons that children often need anything between six months and two years to settle down fully. Then there is the matter of money. Although there are the local absence of a father figure? "Not authority fostering allowances - anything between £13 and £80 a encourage them to establish week, depending on the refer-ring borough - and although Joyce, the resident district nurse gives her salary back to the household, the outgoings are minister next door. Don't forget phenomenal. Once there was a we've got the older boys of 23 slight miscalculation by the and 25 coming in to visit; these electricity board: it had under- are the children's brothers, so

once, and it soon evened up.

Happy family: Jeanette is pictured (centre) with some of her children and resident nurse-Joyce

Roberts's had four weeks to pay "I would agree that the ideal they already keep telling me. end they were helped out by the church down the road, which, like the Springboard Housing Association: is a staunch ally.

good relationships with men if they can. They have very good friendships with their teachers, for example, and with the charged by £1,000 and the there's that contact too.

family unit is based on a mother and father, but only provided that they are living in harmony and looking after their children. With any one-parent family, you substitute the absence with what you can, and the different needs are differently filled. There isn't any one person that plays the father role to all of them. There are lots of men around, who are important to

individuals. Is this, finally, full house? Well, if someone said can you take a baby, everyone here would probably want it because

them either as a group or as

Mum. habies'.

But if an older child came knocking on the door? "I've already had to do that heartbreaking thing of saving no . . . A pause. Not so much dodging of the question as a changing of the subject. "What I want is for my children to grow up and marry happily so they can give me masses of grand-

PENNY PERRICK

Why you can't bring granny to book

My own grandmother's need for something called *The Grand-Grandmothers Group of Argen-parents' Handbook - A Practical* tina would have convinced me. Guide to Enjoying the New Generation, would have been minimal. Unaware that there might be rules to this particular game, she just rushed in and rought me up.

In her unselfconscious atti-tude to her grandmotherly role, she was exactly like those black-clad and toothless grannics seen throughout the poorer parts of Europe who act as unpaid childminders so that their grandchild's parents can go out to work.

Unlike them, she wore bright red lipstick and beaded evening dresses and dyed her hair a vibrant orange unit) she was 84. She would not have recog-

nized herself in the Handbuck It acknowledges that the over-age age at which people in the estern hemisphere are called to grandparenthood is 47 ounger than Brigitte Bardot and Paul Newman - but it is illustrated with pictures of white-haired, bespectacled old

Helen Oxenbury paints the same doddery picture in her children's book, Gran and Grandpa. Her pensioned-off grandparents are indulgent and cosy, with all the time in the world to read stories and play hospitals.

This is a pleasing but unlikely scenario. Most women with young grandchildren are still working and, since the concept of grandmaternity leave is not part of our culture, few modern grandparents are able to be a constant, companionable presence in a small child's life.

In fact, an American study reported in the Journal of Marriage and the Family, in 1977, revealed that one-third of grandparents interviewed were remote, uninvolved or unconcerned with their role.

Can one blame them? For would a closer acquaintance with their grandchildren lead to future heartache, should the break-up of a marriage mean that the children born of it were bisked off to somewhere

eyond grandparental reach? Perhaps they are aware of another report, the one that claimed that out of 100 children interviewed, 47 had either infrequent access or no access to

the non-custodial parent. One wonders where that leaves the non-custodial grandparent. Wearing out their eyes you don't know the half of it. looking at old snapshots of lost birthday cards that come back marked "Return to Sender", one

If I didn't know from personal experience that the grand-mother-grandchild bond can be tina would have convinced me.

These are women who refuse to allow outrage to be tidied up, who go on and on in the search for grandchildren stolen from their parents under Galtieri's regime and given to his sup-porters as their real fathers and and flung into a mass grave.

Thanks to the grandmothers' efforts, 17 children have been identified and returned.

By now, a battery of psychologists and sociologists are probably debating whether this sort of tragic retrieval is in the best interests of the children. But their language is not one that grandmothers can under-

Although I was never in danger of kidnap, my grand-mother, until she died earlier this year, found it an agony to let me out of her sight. Her explanation was: "You are my whole world."

Remembering this, I understand the Argentine grand-mothers' refusal to forget, their need for vengeance and their unshakeable conviction that their unseen, unknown grandchildren are their, by right.

Those times were not to last Lord Curzon's days as viceroy were over, ending unhappily in some bitterness with Kitchener, London, in March. 1904, her and her mother, aged just 36, was dead. The tremendous heat of India and her formidable duties as vicereine, her daughter believes, had destroyed her · But India remained. As

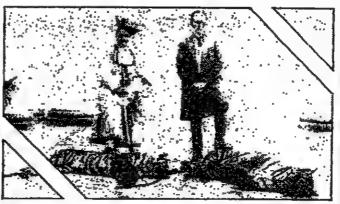

> sures: to these he had added a fine collection of his own. Everything he could bring back came to their house in London and to the various country houses he rented while his three daughters were young. Of these, the eldest. Irene, became Lady Ravensdale: the second, Cynthia, became Lady Mosley. "He remained obsessed by

India", she says. "He had been there first immediately after Oxford and declared: 'I shall come back here as viceroy". He talked about it all the time, even when he was dying. Then he had volumes and volumes of photographs and went through them with me." Whatever he forgot was filled

in for her by the letters and diaries, so carefully preserved, brought home in a leather trunk. "What amazes me is the way my mother, racked by headaches, in that fearful heat, when the plains were like a furnace, and in those clothes, could write at all. But that's what she did, day after day. And my father wrote everything himself, by hand, even lists of

underclothes, saving that sec-retaries couldn't spell." Today, with the photograph

Lady Metcalfe (left) and her father triumphant after a tiger shoot

drawing room table on its book appears. A Vicerot's India,* culled from two early memoirs of her father's.

The India that-Lady Alexandra created for herself has been a very different place. There was one last fling of grandeur when, after 13 govern-

Holly Hill raises the curtain for the new Broadway season

'Pacific Overtures' sails into town again

Highbrow, Middlebrow and Lowbrow huddled in a corner of the skyscraper bar. Middlebrow, who admitted to being sentimental, had chosen the site because an overview of the New York City's bright lights befitted their annual prospective on the new theatrical season. They looked around periodically to make certain they were not recognized. The memory lingered of the year that Pseudo-Intellectual died of shock upon discovering them enjoying each

other's company.

Lowbrow, a tired businessman, ordered a Martini. The professorial Highbrow asked for Glenmorangie and Middlebrow, a matinée lady, sipped the house white wine,

"I don't know why we agreed to trade categories this year", grumbled Low, "I was quite comfortable with Musicals and Comedies, and I've never heard of half the play revivals and British imports Mid usually reports on. My wife had to explain most of them."

"Why should you be in such a bad mood?" asked High. "I'm not complaining that I had to do your assignments. One advantage is that I assignments. One advantage is that it don't have to hear your scurrilous comments on Stephen Sondheim."
"Not necessarily", Low replied, "I faked 'flu to miss Sunday in the Park, but there is an Off-Broadway revival

of Pacific Overtures and the New York City Opera, which my wife loves is doing Sweeney Todd."
"Never mind", High said condescendingly, "here are some new musicals to cheer you up - though I

can't say they do much for me. There is a new version of The Three Musketeers, Diamonds are Forever, a Harold Prince staging of a celebration of baseball; Quiliers, about American pioneer women: Harlem Nocturne, a story in rhythm and blues starring André De Shields..." "Oh, he was that sinnous young

black singer-dancer who made me think of the snake tempting Eve when he was in Ain't Misbehavin", Mid interrupted. "And those are set to open before the first of the year", continued High.
"Later possibilities are Annie, Part II; Herman of Tony-winning La Cage aux folles fame, Treasure Island, with music by Jule Styne. Blockheads, a musical about Laurel and Hardy—that cape London sees first a

that one London sees first; a collaboration between the New York Collaboration between the New York Times columnist and humourist Russell Baker and the composer Cy Coleman called Baker's Broadway, Victor/Victoria starring Julie Andrews; musicals about the producer Mike Todd and about the vaudeville team of Harrigan and Hart, and revivals of Fanny and Gigl."

"Statistically, of course, two-thirds of those will never make it into town", Low commented, "They tried to get me to invest in Chaplin last year. Close escape."

"There are not many new com-edies". High concluded. "Most exciting is the premiere here of Dario Fo's Accidental Death of an Anarch-ist, though there is as much drama

Theatre in Britain

A play that never

offstage as on there because our imbecilie politicians are resisting pressure to lift the ban on Dario Fo entering the US because he is labelled a Communist. Two other Broadway comedies are a new version of Neil Simon's The Odd Couple written for women, and the sequel to his Brighton Beach Memoirs."

"Oh, I hope he has a success with the sequel", Mid exclaimed, "Neil Simon puts so much of himself into his plays, and in Brighton Beach his comic spirits seemed at last to have defeated his mean spirits. But since then his marriage broke up, and he didn't even get nominated for a Tony, for Brighton Beach and I wonder for Brighton Beach, and I wonder what that will have done to his

iting""
"You always know the gossip". writing? Low said with a chuckle.

"Well, if you want me to be serious, I'll tell you what dramas are coming up". Mid said, "Oh stop groaning, Low. You can always fake flu. But there is Martin Sherman's new drama Messiah - remember, hewrote Bent - at the Manhattan Theater Club, staged by the British-director David Leveaux."

"I knew you couldn't resist mentioning something British", Low chided. "Before I give you more, how about some good old American revivals? Like two by Tennessee Williams on Broadway - Gina Lollobrigida in *The Rose Tattoo* and Irene Papas in Orpheus Descending. Pius Frank Langella in Arthur Miller's After the Fall and

Hal Holbrook in Odets's The Country Girl.

Now here is your favourite part.

Mid. British imports include the Royal Shakespeare Company's tour of Much Ado About Nothing and Cyrano de Bergerac, which opened this weekend and Alec McCowen in Kigling. David Pownall's Master Class, will have an American cast, and you may get to see Alan Bates in A Patriot for Me to say nothing of Pack of Lies. Happy?"

"Except I've saved some of the best for last – High's usual report on Ioseph Papp's Public Theater schedule." Mid replied with a slight smirk.

Noseph Papp's Public I neater schelling. Mid replied with a slight smile. You'll be glad to know you can see Kate Nelligan. Low, at the Public playing Virginia Woolf in Virginia. Also Jessica, Fandy in Louise Page's Salonica. David Hare's staging of his A Map of the World and the Royal Court production of Tom and Viv. And, just in case you think I'm an And, just in case you think I'm an Anglophiliac, Mr Papp is presenting new comedies by Christopher Durang and Albert Innaurato, two of our most promising playwrights, Can

I still call them promising?

I think they're under 35 - barely

- so they can be promising. High

"I suppose it's false optimism, but I don't feel as gloomy about the theatre as I did this time last year". Mid said. "If I'm right, this could be a vintage year."

"Or the usual sound and flurry, signifying not nearly enough". High mused. "When shall we three meet again?"

Glorious product The book trade is up in arms, More so than at any time since 1962, when the net book

PUBLISHING

agreement was successfully defended in the restrictive practices court. The trade has got wind - a mudge here, a wink there - that the Chancellor of the Exchange plans to exercise his right with his next Budget to exempt books from being zero-rated, and to have Parliament levy Value Added Tax on them.

You know, books. Those sacrosance objects, little lower than the viscori of angels, of incalculable educational value. incalculable educational value. Every single one of them. How dare the Chancellor, and he an author binkelf and one-time editor of the Spaciator. Why, even during the Second World War, the them Chancellor wanted to place purcahse tax on books. Sir Stanley Unwin wrote a letter to The Times urging that is purchase ax was not levied as purchase tax was not levied on food for the body so books, food for the mind, should be exempt And so it was. But now we are in Europe. Other Europeans buy more books than we do and pay VAT.

The faces of publishers have become empurpled - those that were not already - and little deputations are visiting influential individuals and pressure groups. Letters on official letterheads have become the order of the day. The Chancelor must be stopped; does he are realize that no one will have not realize that no one will buy a book again? Look what happened in the Republic of Ireland. But the analogy breaks down, because most books sold in Ireland are published in

Britain.

Now, I believe that to levy
VAT on new books is a silly,
short-sighted, pusillanimous
idea and may the letters of
protest — especially those, if argued - and the deputations succeed in halting the Chancel-lor, in convincing him and his civil servants to change their minds. Books may be different in kind from boots but not all books, not these days most books; and it is naive and demeaning to the profession of letters to suggest otherwise. It is surely nonsense to suggest, as is being hotly suggested, that the publication of serious titles will die the death, or be mortally wounded, in one fell tax swoop. or even suffer much in the short

If a pow novel by one of our better writers, of the sort submitted by its publisher for the Booker Prize, is published by any of our responsible Collins or Heinemann modest Deutsch or miniscule Peter Owen - it is unlikely to sell more than two or three thousand copies, unless it pulls down the prize. Of that number, no more than 10 per cent is

likely to be bought by the

individual, private book-buyer. The price of such novels this autumn seems to be £8.95. which is less than you pay for best seats at a West End musica or even at the highly subsidized National Theatre or Royal Shakespeare Company. If only a few hundred, even a few thousand, people attended a play or film or series of concerts, theatres, cinemas and orchestras would be out of business. Although the theatrical industry lobbied strenuously to have VAT removed from theatre seats when first im-posed, the industry failed and is now doing rather well.

to purchase the most worthwhile new novels. Fewer buy new collections of poetry, and not many more buy serious non-fiction. A look at the bestseller lists makes it all too plain that the books doing well, apart from dictionaries, can hardly be described as of cultural or educational importance; and if a book finds some buyers at £8.95 it will surely find them at £1.00 or £1.50 more. Books, especially those still

Repeat, only a very few people in this country avail themselves of the opportunity

well edited, printed on good paper and sturdily bound, are of amazing value and rather than bleat about VAT it would behave the publishing industry to discover why the average sale of the better titles is so low, and why the cynicism of the trade pretends that mediocre books are in themselves of some

One of the smoothest, most competent of British publishers, Clive Bingley, wrote to the Bookseller magazine a couple of weeks ago to say more or less this. As a result, the retiring chairman of the National Book League, Matthew Evans of Faber and Faber - not hitherto known for his intolerance of views opposed to his own called for Mr Bingley's resignation as treasurer of the NBL Mr Bingley, apparently, has obliged by resigning. His letter has resulted in a shoal of blimpish emotion and little argument being expended in the Bookseller's correspondence columns; the surliest letter coming from the president of the Publishers' Association.

Books are more important than VAT. If only the trade would understand that and

Big Bird Music Theatre

Oval House

In a rare moment of self-questioning John Cage once spoke of he difficulty he encountered in making performers free without making them foolish. It is a difficulty that crops up whenever his chance-composed music is being interpreted, and it certainly did not fail to crop up on Friday night when Big Bird Music Theatre, a Bradfordbased company, brought their own Circus on John Cage to London as part of a national

Big Bird have won impressive commendations for their earlier productions, notably of commissioned works, neither requiring the group to stretch

> mandments was based on a nice idea, though one too simple to sustain by itself even this tenminute sketch. We are in a nightclub in Nazi-occupied Czechoslovakia. Three girls sing a short jazz number, which elicits a cold protest from the only customer on the grounds that they are not obeying the rules for jazz laid down by Goebbels. The customer enumerates the rules, apparently taken from documentary evidence, and the girls alter their

style accordingly, until their original song has changed into Christopher Fox's On Dark-

- perhaps one should say forms, for the 25-minute work offers an extraordinary, almost pedaness/Radiance was even thingogical procession of chorale preludes, passacaglia; fugue, even a miniature theme-andvariations. The ear relished this variety, and with Peter Donohoe investing the solo part with a poet that swept the metrical complexities into a magnificent lyrical flow the concerto sucubroughout .

Muldowney's starting-point, his "chorale", does pose a problem though. It haunches his agrument well enough, but its curious banality is a barrier to its metamorphosis into a satisfactory finale. So the word fades just when one wants the intriguing threads and allusions to be drawn together. One follows the spider's web inwards, only to find the centre blown away.

The contrast with Rachmani-nov's "The Bell", descending with magisterial inevitability from the silver tinkle of birth to the dolorous knell of death, was considerable. Mark Elder elicited a vibrant, superbly taut performance from orchestra and choirs (BBC Symphony Chorus, London Philharmonic Choir). The bells of terror might have swung more brazenly with a more full-throated, Slavonic choral tone, but there was a glorious, compensating warmth in the wedding peal, where Nelly Miricioiu floated a gorgeous descant over to the ensemble. However Yuri Masurok, weighty and impassioned, rightly provided the dominant memory in the great finale which seems to be the sum-

ner, and so rather too heavy a burden of responsibility was placed on the Cage antics in the second half. Admittedly, therewas a certain charm in seeing Cage's indeterminacy turned into an excuse for party games, with performers picking numbers out of a drum or throwing dice in order to be told what to do next. The circus also included some modest accounts of the composer's greatest hits: the Aria for many-voiced soloist, the hare-brained stunt Water Walk, the inevitable 4 33" and some of the early Satielike piano music. But the accomplishment has to be a lot keener and the style a great deal Paul Griffiths

BBC SO/Elder Festival Hall/Radio 3

He wraps a childish tune in ripe harmonies, filtering them through clouds of sumptuous orchestration that are precisely calculated so that the provocative naivety of his basic theme is never obscured. He appropriates with cheerful edecticism recognizable traits of half a century ago - Berg and Weill would have felt flattered, and Gershwin too, perhaps.

Splashes of dreamier nostalgia come in the shape of muted waitzes, and from the surreal prominence of an alto saxophone in an otherwise conventional orchestra. Meanwhile the solo part is shaped into an impeccably idiomatic rhapsody.

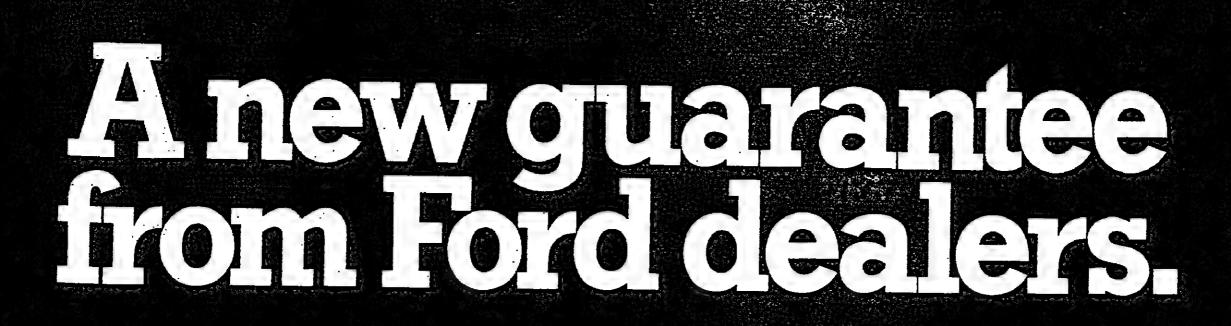

Dominic Muldowney has certainly ensured that his Piano Concerto, premiered at last year's Proms, does not lack

THE TIMES **DIARY**

In the right place

The renal consultant at the Royal Sussex Hospital, now treating Brighton's IRA bomb victims, is no stranger to Norman and Margaret Tebbit, nor indeed to Tory chief whip John Wakeham. He is Anthony Trafford, a former Tory MP for The Wrekin, who started in the House on the same day as Tehhit in 1970, Trafford, now a close friend of the Tebbits, tells me the Industry Secretary is back on form; "Norman was immensely relieved when told he was worst hit on his left side." Trafford, a contemporary of Wakeham's at Charterhouse, has doubtless cracked a few ripostes himself. less cracked a few fripostes nimsen.
Regarded as hy far the eleverest of
the 1970 intake, the right-winger was
much feared for his savage and
impertinent tongue at Prime Minister's question time by both the
whips and Downing Street. A friend
recalls how Trafford – who worked
at the Royal Sussey throughout his at the Royal Sussex throughout his Commons career — was once challenged by an Arab houseman at the hospital for supporting Mad Mitch. "Do you realize that Colonel Mitchell has killed so many of my compatinois?" "Well, docior," replied Trafford, "that makes you and Colonel Mitchell about even."

 Last Monday The Times printed a letter from accountant Alan Wells detailing a catologue of postal inefficiences. Within hours his phone went dead. "The penalty for criticizing the post office", he concludes, "is excommunication".

Courting trouble

The Royal Court theatre in London, currently showing its Tory sex scandal play. An Honouruhle Trade, is about to announce its new chairman to succeed novelist P. H. Newby, who has just quit after seven years. The new man is Matthew Evans, chairman of Faber and Faber, who just happens to be Newby's publisher. A veteran of the Addermasion marches, Evans tells me he is in sympathy with the theatre's left-feminist image and sees his first duty as ensuring its survival; the theatre's £500,000 Arts Council grant was almost axed this spring. and is safe only until 1980. If he is to curry favour with friends in high places Evans may find it more politic to seek out some Labour scandals - if indeed they exist.

Tie-breaker

At a Mirror Group meeting with his Scottish executives, Robert Maxwell declared: "What I want to see is people taking off their jackets, rolling up their sleeves and getting on with the job." The managers murmured agreement. Maxwell quietly repeated the proposition wrong with you? I said take off your The one who didn't was Liam Kane, deputy managing director of the Daily Record. But then he could afford to: having just heen promoted to deputy managing director of the Mirror Group in London – a job he was due to start next month - he has quit for a better paid job in advertising.

Digging deep

A News of the World advertisement. which a colleague found under her kitchen lino is sure to bring a wry smile to Arthur Scargill. Dated February 19, 1950, it reads: "Want work that's worth while? - you'll have a job for good in Mining." The ad quotes miner "Loll" Monarty of Bank Hall Colliery: "You can earn good money in Mining and you know it's a job with a future." The minimum wage for adult under-ground workers is £5 5/- a week. killed face-workers between £9 and £10. "Best of all, you know your future's secure in the Country's coal mines! JOIN THE MINERS NOW!"

BARRY FANTONI

Incredible to know a world without

Home truths

Arthur Scargill and cronies may live to regret the resignation last week of Roy Ottey from the NUM executive. Ottey, who quit because he was "not prepared to break the law." is writing his biography, in which he will pull no punches on the present dispute. He is critical of the NUM's failure to call a ballot of his executive colleagues who advocated a ballot then inexplicably voted confrontational policies and bypassing of democracy. His book will begin with the General Strike of 1926, when Ottey was two. Looking back to that strike he says: "I think My God, what have we learnt? We haven't learnt much when we inflict and perpetuate this on each other. It's tragic." There will be no shortage of willing publishers.

Message of the Brighton bomb

by Enoch Powell

Since the Brighton bomb went off, the air has been thick with the ringing words of those who declare that nothing will make them bend to demands backed by terrorism. It would be as well if it were understood what these demands actually are.

It was on Wednesday morning, as I

checked my car with extra care before switching on the ignition, that I remarked to my passenger: We are due for a major precisely now". That was neither a guess nor a coincidence. How could I be so sure?

In recent weeks the press, especially the Belfast and Dublin papers, have carried increasingly detailed trailers of what will recent out of the meeting foreshadowed next

come out of the meeting foreshadowed next month between Mrs Thatcher and the Irish premier, Garret FitzGerald. The trailers had indicated that it would be a historic meeting and would set the coping-stone of a parliamentary tier on the Anglo-Irish structure erected at preceding summits to "pave the way for a federal constitution linking Ulster to the Irish Republic", as Conservative candidates at the 1979 general section were warned in a Central Office. election were warned in a Central Office

In the last few days there was a sudden change. The softening-up process, conducted by leaks and hints mainly from Dublin, but also from Stormont Castle, dried up, and the also from Stormont Castle, dried up, and the opposite message began to trickle out: nothing doing, these things take a long time, don't expect too much. By Tuesday evening Irish journalists at Brighton were forecasting that "FitzGerald will come out of it with nothing". What had happened?

Mrs Thatcher has recently been directing her mind to the summit. As she did so: officials were quick to become aware of a growing distaste on her part for being taken further on the same ride by the same tigers. It was news which, in accordance with practice, confidentially of course, they communicated for guidance to their op-

posite numbers in Dublin. In case anybody is surprised by that, The Times of December 6 1980 carried the classic description of how the contents of a private conversation late one evening between Mrs Thatcher and Mr (now Lord) Whitelaw reached Dublin in the carly hours of the same night and spread consternation there.

In Dublin there is a seamless web which links respectable officialdom and politics with a decidedly unrespectable underworld. The altered briefing going out to the press was one symptom of the recent "message received and understood". Another was the

Brighton bomb.

The terrorist organizations, like restaurateurs, maintain an à la carte menu, from which dishes can be ordered at any time. They need to, because their special dishes call for skilled and careful preparation over months rather than weeks. Once a dish is on the menu, it is the work of a matter of days to bring it to the table. Such a dish was served at Brighton on Thursday night. These Thyestean repasts convey a message, encoded but easily decipherable by those to whom it is addressed; "Watch your step, don't falter now, make 'political progress' -

This has all happened before. What cost

Airey Neave and Lord Mountbatten their lives in 1979 was the intention, filtered through to Dublin, of the Conservatives under Mrs Thatcher to change the course of British policy in Ulster. The encoded warning was there in the unpublished full communique of an Anglo-Irish meeting on October 5 1979 held "in the aftermath of the murder of Earl Mountbatten" (Mrs Thatcher's phrase, Hansard, July 20 1982, col. 112): "The Ministers [British and Irish] also discussed the prospects for political progress in Northern Ireland. They noted that the British government hoped before long to be in a position to put forward positive proposals for political development The Irish Ministers emphasized the importance of an early initiative."

One link in the chain remains to be put in place: what interest has the IRA in salvaging the political operation of FitzGerald and Co? Little enough, no doubt; but the Provisionals and the Irish National Liberation Army do not always operate as principals; they take on work for other interests too.

So I pose the question: who is so interested and why, in the summit paving a political "way for a federal constitution linking Ulster to the Irish Republic"?

i will leave a clue to the answer in the form of another question; what context is it in which governments and statesmen are prepared without scruple to see murder used, if necessary, for their ends?

C The Newtone Links, 1984 The author is Official Unionist MP for Down

Caroline Moorehead on a long fight to reshape industrial thinking

Design: a change for the better?

There is nothing new in the cry that the British cannot design anything well: long before the Great Exhibition of 1851 people were saying that you couldn't look to British designers for imagination or reliability. But Managing Design. a report to be published today by the Council for National Academic Awards (CNAA), reveals how serious the problem has recently become: because of its poor become: because of its poor performance Britain is failing to hold its own in manufactured goods

whether cars, refrigerators, shoes
or heavy duty vehicles."

In the words of the reports's principal author, Louis van Praag, chairman of Sabre International Textiles: "We are now so far behind that many British companies are fast approaching their last opportunity. If they don't learn to exploit design, they are rapidly going to be overtaken by companies overseas who liave learnt. We have no time left, After all, if it wasn't for North

Sca oil, we would be bankrupt.

If his words sound melodramatic, he has figures to fall back on. Last year, for the first time, Britain had a negative balance of payments in manufactured goods, of £2,148m. While our export share of world trade has fallen from 25 per cent to 9 per cent. imports have grown from 6 per cent to 30 of total sales. Eightyfour per cent of our record players/tape decks come from abroad; as do 80 per cent of our scissors and 43 per cent of our electric cookers.

Education is clearly only one way of trying to prevent a slide into further disaster, but education is the one the authors of the report believe crucial. At the moment they are aiming directly at the post-graduate business courses inside polytechnics, with a new and highly detailed curriculum, hoping eventually that universities will follow, and once the country is turning out managers educated in design the whole alarming downward trend in manu-

facturing can be reversed. The message that there is general indifference to design is repeated everywhere. Business schools teach accountancy, public relations and cash flow, but very rarely design management. "The product", says Geoffrey Constable of the Design Council, is simply taken for granted." Those brave enough to put on courses in design find "stony silence", he says, "while courses on VAT are supported like the devil". Big companies frequently have public relations experts at board level, but rarely any design man-agers on their staff. The design process", says Kenneth Grange of Pentagram Design, "is today's poor cousin. It's yet another extraordinary example of the British talent to

Merrick Taylor (left): "For 20 years the accent in British industry has been on control rather than creativity." Kenneth Grange: "Another example of creative fountains allowed to trickle away." Right, John Butcher, at last a minister who takes an interest

"Over the past twenty years all emphasis in British industry has been on control and none on creativity", says Merrick Taylor, who attributes his success as chairman of Motor Panels, the largest European manufacturer of truck cabs, precisely to an obsession with design.

"With today's higher aspirations and the loss of our protected markets, we cannot go on ignoring the fact that we have to enter the age intellectual investment.

In the USA there are 60 scientists and engineers in research and development per 10,000 labour force; in Britain the figure is about 30. Everywhere else, the money spent in this field is growing; in Britain it is declining. "Is it surprising." asks Louis van Praag. "that our good designers are all going to work abroad?

What does design actually mean? Not, it seems, surface appearance. The report gives 11 separate definitions, from "goal-directed problem solving activity" to "performing a very complicated act of faith". Louis van Praag prefers

"fitness for purpose." A well designed product, be it a tractor or a shoe, is something that works it fulfils the wants, tastes, needs and priorities of those who use it. And it performs better, he says. "because it is imaginatively engineered. It is a successful fusion of market requirements, aesthetics and technology". Furthermore, the

apparently as visually illiterate as-British industry" - hence their preference for Italian fridges and German cars.

Managing Design is something of a one-man victory. Fifteen years ago Louis van Praag found that he was taking designers into his knitwear business and then training them to be managers. Realizing that this system could not operate in very large companies, and perceiving widespread ignorance about the need for design throughout British industry, he approached the National Economic Development Office, which duly ran a design conference. It was so unenthusiastically received that only the presence of Princess Margaret drew enough

listeners to fill the seats. Then came what he calls the "desert years." As successive ministers entered the Department of Trade and Industry, he went to call on them. Some saw him; some did not. Not one did anything. One day John Butcher arrived as Parliamentary Under-Secretary. Like his predecessors he had responsibility for design matters; unlike them he was interested. Furthermore Mrs Thatcher had begun to express loud concern about design. Money was now found - from the department, from the CNAA, of which Louis van Praag was now a member of council, and from the Design Council which sent off a researcher to see what was happening abroad.

What he came back with only

have amazing creative fountains and British public knows it: "British confirmed the gloomy picture. regarded as a normal part of a company's activities. In West Germany product requirements vere so thoroughly researched before manufacturing began that they rarely failed to find their

market. Louis van Praag then went back to John Butcher and asked for money, this time to devise a curriculum to offer business courses. At the same time, he approached the CNAA and asked that it reverse its entire tradition as a purely validating body and become a prescriptive one instead.

Will anything actually happen? For once, there is a spirit of optimism. Butcher says that he welcomes the report in that "it represents a first step in the process of creating a new generation of managers in the UK - managers who are fully aware of the way good design management can increase market share and profits."

More importantly perhaps, it looks set to make a mark not merely because the CNAA has actively endorsed it, but because of overwhelming enthusiasm from the schools of business studies through-

out the country. When Louis van Praag called for three volunteers to take the curriculum and start the course in 1985, 50 polytechnics replied. Leicester, Leeds, and Kingston-upon-Thames were chosen. Others are cager. But will the universities and industry **Anne Sofer**

The rose that has lost its bloom

Before the events of the early hours of Friday morning. I was reflecting, in preparation for writing this column, on the English national column, on the English national character: that combination of eccentricity and sang froid we like to think is our reputation abroad, that pottering complacency which Cecil Day Lewis described 50 years ago: You who like peace, good sticks, happy in a small way. Watching birds or playing cricket with schoolboys. Who pays for drinks all round whom disaster chose not.

disaster chose not...
There is a question mark over it all. Is it true now? Was it ever? Is our

current economic decline, and the polarization of politics, producing something altogether more strident? Before returning to the answer and to the bomb at Brighton, let me digress to another recent comment on the English character, Umberto Eco's novel *The Name of the Rose*.

The hero of this mystery set in an Italian abbey in the early fourteenth century is an English friar called William of Baskerville and he has every good quality that most of the French, German and Italian charac-ters in that atmosphere of cruelty and bigotry patently lack: unbiased compassion, a facility for lateral thinking a robust scepticism and a sense of humour.

He is a man before his time, endowed by the hindsight of the historical novelist with ideas – secularism, democracy, technological progress which were not to take off until centuries later. He is the inquisitor who turns away from his calling because he perceives that evil can reside as much in the mind of the inquisitor as with the heretic; the naturalist who is also a sharp judge of human nature; the advanced political radical who nonetheless engages in diplomatic manipulation with great adroitness and gusto. In his role as detective he is Sherlock Holmes. Lord Peter Wimsey and Phileas Fogg rolled into one. It is indeed a flattering picture.

The book was widely taken to have a contemporary political message a vibrant plea for freedom, moderation and wisdom said L'Express. The final message, as the great abbey burns down, consuming not only its priceless and irreplaceable library but also the bodies of numerous slaughtered monks, is delivered by William with uncharacteristic passion:
"The Devil is not the Prince of

Matter: the Devil is the arrogance of the spirit, faith without smile, truth that is never selzed by doubt ... Fear those prepared to die for the truth, for as a rule they make many others die with them. ... Perhaps the mission of those who love mankind is to make people laugh at because the only truth lies in learning to free ourselves from this insane passion for the truth."

And that brings me back to Brighton. The warning against bigotry, arrogance and heroics is apposite enough, and it is particularly grim to realize that the blasted formed based and the blasted that the blasted Grand Hotel and the bodies in the rubble - 500 years after all William's dreams of human progress have been fulfilled - are the contemporary version of the burning abbey and the murdered monks, victims of the same sectarian strife within the same

It is also depressing to conjecture on the effect this appalling incident will have on government policy. To be resolute against terrorism is the be resolute against terrorism is the obvious and right response. But to be grimly resolute about absolutely everything else, including an economic strategy which is clearly not working is a betrayal of that very flexibility, ingenuity and tolerance that Eco appears to have seen as characteristics of the English at their best. The IRA will have achieved nothing for Iraland; what they may nothing for Ireland: what they may have achieved is a hardening of the heart against the lengthening dole

It has often struck me as ironic that Margaret Thatcher and Arthur Scargill are both thoroughly English, not Scots or Welsh or even Jewish or half American as so many of our national leaders have been. They are not your born-to-rule Norman-stock aristocrats either, but genuine up from the grassroots provincial English. Yet nothing could be further from the flinty character of either than that famous phiegmatic scepticism, that best-of-a-bad-joh, live-and-let-live, better-luck-next-time, no-hard-feelings Englishness which is what we think we are like. We look in the mirror and do not

We look in the mirror and do not recognize what we see.

The theological question which dominates the latter chapters of The Name of the Rose (and which generates all the destruction) is "Does God laugh?" Interpreted, this seems to mean "Are there any ideas so sacred that they cannot be mocked?" and also, "Is the human tendency to laughter and ridicule a hase or a divine instinct?" base or a divine instinct?

I am told (though I have seen no evidence for it) that Mr Scargill has a keen sense of humour, no such stories circulate about Mrs Thatcher, But can one imagine either of them, English as they are, ever allowing themselves even the tiniest grin or chuckle at their own convictions? Or even a passing perception that they, like all human beings, are capable of absurdity?

The author is SDP member of the GLC/ILEA for St Pancras North.

William Oddie

Theological lib we can do without

"Chauvinist. Betrays Women" read the front-page headline over a recent article in the Catholic Herald. The article turned out to be not a report of some gross act of mass clerical misogyny but a respectful account of a talk, given by the American Christian feminist theologian Rosemary Radford Ruether, to the "Catholic Women's Network", in the environs of Westminister Cathedral.

There was no report of the subsequent conference discussions: nor could there have been, since being male the Catholic Herald reporter was excluded; so was a BBC team covering the event for the Sunday programme on Radio 4. -

This exclusion led to vaguely critical comment in an otherwise wholly deferential account in the radical Roman Catholic journal The Tablet, which described the ban as "somewhat ironic"; no one, how-ever, was at all suprised by it. It has long been clear that the Christian feminist movement is, perhaps inevitably, deeply torn between an innate tendency towards revolutionary paranoia and secretiveness on the one hand and, on the other, a desire to present an image of a movement which is open and responsible and devoted to gentle reason and progress.

Which is the real face of Christian feminism? The question needs more and more urgently to be answered as feminist influence grows within the churches, or at least within the various liberal/radical establishments and bureaucracies which infest modern Christendom.

the real Rosemary Ruether?" Ms Ruether is without doubt the most influential feminist theologian still within the church (others, such as Mary Daly, now describe themselves as "post-Christian"). More and more she seems to be emerging as the leading guru of Christian feminism, not only in America, but in Britain too. It is important to know, therefore, how much of the Christian tradition would actually remain if she and her supporters had their way.

Considerably less, it has to be said, than emerged from any of the press reports, or from Ms Ruether's calmly reasonable interview, for Radio 4. What none of the nonfeminist observers was permitted to see was the deep hatred and disgust for the Christian tradition which she has shown elsewhere, in literature intended primarily for internal consumption by the Christian feminist movement

To take one example, what does she think that husband, children and faithfulness within Christian marriage should mean to a woman? Apparently this marriage for the wife means that "Only the male to whom she has been legally handed over may put his seed in her body...

stolen from her and she is reduced to an instrument of his virility . . . Only through the second birth of baptism, administered by the male clergy, is the filth of mother's high remedied and the offspring of the woman's womb made fit to be a child of God . . . She must obediently accept the effects of these holy male acts upon her body. . . ?"

Above all, Christian feminists object to the word "Father" used as a name for God: the invariable usage of Jesus himself, and also (by his command) of his disciples. "It is hardly possible", in the words of Catharina Halkes (originally billed to appear with Ruether at Westminster). to call to mind a single feminist theologian, whatever her phase of development may be, who does not find the image of the Father-God a challenge and a direct confrontation". "If God is male" trumpets Mary Daly, "then the male

For the radical feminist, reality is what "feminist consciousness" says it should be. In the reconstructed feminist history of mankind (or "herstory") the perception of God as a father has been a principal factor in the alleged dehumanization of women by men. This domination is reinforced, according to this view, by the maleness of the Son. who, in dominant Christian tradition. has been represented by an exclusively male priesthood.

Nowhere, in fact, can we see the long-term feminist strategy against the essential Christian doctrine of the Fatherhood of God and the A convenient way of putting the complementary Sonship of Christ question would be to ask: "Who is more actively prosecuted than in the more actively prosecuted than in the movement for the ordination of women in the priesthood.

For many, this is a simple matter of justice for women, and the women's ordination movement has been brilliantly successful in maintaining this belief. But the movement has, nevertheless, a hidden agenda. In the words of the Anglican Bishop of New York, a feminist

"God as Father and God as Son invoked by a male minister . . creates in the unconscious, the intuitive, the emotive part of your belief an unmistakeable male God. However, when women . . . preside at the Eucharist . . . this unconscious perception will begin to be redressed and the femininity of God will begin to be felt."

This revolutionary development may, though I very much doubt it, be the general wish of the storm-tossed Anglican faithful. But it has to be said, at the very least, that they should be told that this is what they are being asked to support. The

William Oddie's What Will Happen to God? will be published on Wednesday by the SPCK.

Spiegel, spoiling for another fight

Hamburg Der Spiegel is a sharp-tongued, aggressive weekly news magazine, the most influential in West Germany and arguably in western Europe. It embarrasses governments, breaks news as well as taboos and is used to lawsuits from its opponents. Only once has it invoked the law of libel, in taking out a suit against Sir James Goldsmith, chairman of Cavenham Communications, in 1981. But a week ago Spiegel settled the case and in fullpage advertisements in Britain and Germany Sir James has been claiming vindication.

Why did the magazine sue and why did it settle? To Herr Rudolf Augstein, the founder and publisher, an important issue was at stake. Sir James had asserted in Now! magazine, quoting General Jan Sejna, a Czech defector, that the campaign by Der Spiegel to discredit Herr Franz Josef Strauss was "orchestrated by the KGB". If that had been allowed to pass unchallenged. Herr Augstein said in an interview on Wednesday, the magazine's credibility would have

suffered irrevocably. Spiegel's lawyers thought they had an open-and-shut case. The magazine, raided by the police in October 1962 after publishing an article saying that parts of West Germany could not be defended in the event of a Soviet attack, knew every detail

of what became known as the "Spiegel affair". This led to the downfall of the Adenauer government and the resignation of Herr Strauss, then West German Defence Minister. "We know that the KGB could not possibly have foreseen or determined these events," Herr Augstein said.

But Spiegel reckoned without the complexities of British libel laws or the persistence and wealth of Sir James Goldsmith (he said in a statement after the settlement that a libel action was "the privilege of the rich" and in future he would provide aid to help third parties pursue meritorious cases). It became clear in the Hamburg headquarters that Sir James was ready to go on for a long time, calling so many witnesses and demanding so much evidence that things would have become impossible for Der Spiegel. Herr Augstein said he was not ready to testify for six weeks, produce 128 back copies of the Czechoslovak party paper Rude Pravo, 14 Pravdas and 189 copies of Neues Deut-

schland, the East German paper. What was decisive though was his unwillingness to repeat everything his magazine had ever said about Herr Strauss, including raking up reports of some unsavoury escapades of Strauss's in New York. Strauss and Augstein, whom he held in prison for four months in 1962, are now on good terms.

And so Der Spiegel settled for a public statement by Sir James that he had never meant that journalists were "knowingly manipulated." In a sharp retort in the latest issue, however Spiegel points out that this was not what Sir James actually said in 1981.

it noted that Sir James had .commissioned 20 people to research and underpin his claims. The star witness was to have been the Soviet defector Oleg Bitov. Only when Bitov disappeared from Britain later to turn up in Moscow - did Sir James's lawyers begin to speak of a postponement, which turned into a

It is a grudging settlement, and there are few charitable words for Sir James in Hamburg. The magazine publicly accepted in court that Soviet covert propaganda posed a danger to press freedom, and it may have been "unwittingly" used by Soviet intelligence. But, one senior editor remarked, it could be argued that the Oueen was equally unwittingly used when she made a former Soviet spy her chief art adviser.

Der Spiegel feels dissatisfied with the outcome . It found strong support on Thursday from Herr Gerd Bucerius, the respected pub-lisher of the intellectual weekly Die Zeit. "Sir James Goldsmith should not try to manipulate us, he said. The basic charge however will be

hard for the magazine to shake off

altogether, for criticism of the Goldsmith kind has traditionally been levelled at it in Germany. The magazine brings this on itself by deliberately courting controversy. "We are always 51 per cent

against the government." Herr Augstein said - even when the Social Democrats were in power. Indeed former Chancellor Heimut Schmidt accused Spiegel of deliberately trying to destroy him and his coalition government in the months before it collapsed and of poisoning Bonn's relations with America. "We were merely pointing out what he was blind to see," Augstein said. For Augstein the Kohl govern-

ment is a natural and constant target, especialy as the chancellor pays little attention to his press critics and delights in ignoring what many Christian Democrats see as the supercilious carpings of a leftwing Hamburg press which still has to come to terms with the new conservative mood in Germany. But as the government begins to

stumble in its policies and cohesion cracks in Bonn, so the magazine's influence grows. It now prints 930,000 copies a week - "And I cannot remember a time when we had more influence," Augstein said. It is not an influence he will concede that the KGB has any part in, wittingly or not.

DE SAPIENTIA VETERUM

To the framers of the United States Constitution the phrase 'elderly American" was not a term of abuse. They associated age with wisdom and made their dispositions for the great offices of state accordingly. Entry to the Senate was reserved for men of mature years. The dignity and trappings of the office of president belonged, it was thought, to a man grown grey, made by his years a conduit of national experience. However much has changed since, the symbolic strength of the presidency still resides on the president's maturity. Whether - taking the reported test of Dr. Lawrence Klein of Georgetown University for imminent senility - the president can count backwards from 100 in sevens is of little moment. As the purveyor of the nations's aspirations, the focus of a renewed American sense of economic and diplomatic strength, (President Reagan's strong suits), the present occupant of the White House need fear no actuary's life expectancy charts.

Those who live by mass media effect shall perish in the mirror of a television camera - and during the past week President Reagan has undoubtedly been the victim both of his own performance in the televised debate with Mr Mondale and of the American press's appetite for seeking incapacity in political leaders. Of course the president's age and fitness to keep up (and

not just awake), matter, although Americans seem most uncharitable towards a man who survived an assassin's bullet. There is for a start an irreducible minimum of executive functioning which demands the president's alert attention - a volume of work which has multiplied several times since, with President Eisenhower, the White House was last occupied by a man of uncertain physical capacity.

Since Eisenhower the presidency has continued to agglomerate executive responsibilities: so much so that the president can, without exciting incredulous attention, claim personal responsibility for securing the American embassy annexe in Beirut. President Reagan has, unwisely, emphasized his omnicompetence, and so courted inspection of his mastery of detail. Instead, the president nceds to develop, especially for a second term of office, a limited conception of his powers to run parallel to his own strong instinctive idea of the limited nature of government in modern society. The core of the Reagan presidency has been his ability to mobilize American sentiment positive, in the mood of economic optimism, and negative, in the ambitions of the evangelical conservatives. What has been less impressive has been the translation of broad presidential objectives into policy, because of failings among the president's the wisdom of the ancients

advisers and immediate staff and barring a brief sequence of legislative victories in 1981, the absence of Congressional support. No one who has watched the flurry of half-digested measures adopted by Congress during the past few days, many with large budgetary impli-cations, could assert that the President has succeeded as a leader on Capitol Hill.

The "age issue" should not induce challenges to armwrestling matches with Mr Mondale nor photo oppor-tunities to capture Mr Reagan chopping wood on his ranch. It should, however, elicit from the president a better exposition than he has yet made of how much executive detail he really needs to know - and that necessarily involves him in a reappraisal of the quality both of his White House staff and his cabinet officers. Like Mr Carter before him Mr Reagan imported into Washington home state confidants and they have not all matched their tasks. For a second term. Mr Reagan does not have to promise the hyper-activity of a Lyndon Johnson or the administrative acumen that Mr Bush and indeed Mr Mondale both possess. A good president needs a vision of America, which Mr Reagan has presented. He needs as well some plan for spreading that vision through the marshy channels of American government. That is

THE CHILDREN HOME BRINGING

There can be few more devastating experiences for a parent than away to some foreign country by the other parent, whose aim it is to keep the child there forever. Sadly, the growing number of international marriages, the rising rate of marriage breakdown. and the greater ease of crossfrontier movement, have combined to make this an increasingly common phenomenon. In human terms, the damage caused by these kidnappings. both to the deprived parent and to the child, is incalculable: sometimes the child cannot be traced at all, and contact is lost for ever; sometimes by the time the child has been tracked down it has become too established in its new environment to be uprooted again; and all too often, even where the child's whereabouts are known, the process of trying to get the child back is long, costly and difficult, with a high chance of failure.

There is a tendency on the part of the courts of many countries (our own included) to want to investigate the merits of the custody dispute between the parents when the child is present within their jurisdiction, regardless of the fact that the child is only there in the first place because it has been snatched from its home. The deprived parent is forced to litigate at long distance, there are liable to be protracted delays, and all the

1:

time the child is settling down in its new home and the prospects to have his or her child spirited of a return to the previous status quo are receding. The scales are heavily weighted in the abductor's favour.

> The Child Abduction Act, which came into force last week, makes it a criminal offence for a parent, guardian, or custodian of a child under 16 to abduct that child to a foreign country without the consent of the other parent, guardian, or custodian, or the permission of the court. It should produce a three-fold effect: deterrent, by discouraging would-be child-snatchers: preventive, by enabling the police to . intervene speedily before the child has left the country; and remedial, by permitting extradition of the abductor where appropriate arrangements are in Welcome though the Act is, it

should not be regarded as more than a partial solution to the problem. Often, the bird will still have flown before the police can be alerted; and extradition, even where available, is only second best: it is cumbersome and gives no guarantee that the child will come back with its parent. Furthermore, the Act gives no help at all where a parent fails to return a child after access abroad. The absence of any effective international machinery for enforcing the child's contribution to the international return remains one of the greatest obstacles in the way of a child abduction.

continuing relationship between a child and both its parents after their marriage has broken down and one of them has moved abroad.

The only way this problem can be tackled satisfactorily is by agreement at an international level. Conventions for this purpose have been drawn up at the Council of Europe and at The Hague. Neither has yet been ratified by the United Kingdom. Under both conventions -administrative machinery would be set up in contracting States to assist in locating and returning abducted children, and legal aid would be available. Subject to certain important exceptions and welfare safeguards, courts would be required to return a child forthwith without consideration of the merits of the custody dispute, which would be left to be resolved in the country from which the child had been removed.

There would, of course, be a price to pay for the benefits which ratification would bring us: our own courts would have to be readier than they have been to return children wrongfully brought here. It is a cost worth bearing in order to secure the prompt return home of children taken from this country. We should ratify these conventions without further delay. The new Act should not be our only effort to stamp out the evil of

BROADCASTING TO CAPTIVE NATIONS

too real.

Siberia which followed were all

The purpose of the Munich-

based stations is to provide the

proclaimed the third week of

Stalin's post-war policy of

of this decision too.

An initiative in Americanfinanced broadcasting to the Soviet block which might at first glance seem no more than a minor administrative change will in fact have a significant impact on US-Soviet relations. Radio programmes in the languages of the Baltic states are now announced as broadcasts from Radio Free Europe rather than Radio Liberty, the sister station, likewise based in Munich, which covers the USSR.

Atlases show the small countries of Estonia, Latvia and Lithuania as three of the tifteen republics of the USSR, while Radio Free Europe is responsible for broadcasts to the East European satellites. But the Baltic states were independent between the wars, and the western powers did not recognize their forcible incorporation into the USSR as in any way legitimate. They are ruled de facto from Moscow, but de jure they should be independent countries; the survival of their pre-war embassies in western. capitals has borne sad but honourable witness to this point. In 1939 even the Soviet Foreign Minister, . Vyacheslav Molotov. denied that Moscow had any claim to these lands, dismissing all rumours of the impending Sovietization of the republics as foul fabrications by the burgeois media. But the terrible mass arrests, murders and exiling to

Sinning parsons

From Mr M.J. Crossley-Evans

Sir, I should like to correct a

statement made by Alan Franks in his article, "Murder most foul on the Sabbath . . . and the parson did it"

(Spectrum, October 3). He wrongly

states that when, in January, 1872,

the Rev John Selby Watson was sentenced to death for the murder of

his wife "he became the only Church

of England priest to be convicted of

When President

of the Soviet empire.

murder".
Two cases in particular spring to mind in the first the Rev James Hackman, Vicar of Wiverton, in Norfolk, being spurned by the mistress of Lord Sandwich, took his revenge by shooting her outside Covent Garden Theatre. After an unsuccessful attempt to take his own life. Hackman was condemned to death and hanged at Tyburn in

July as Captive Nations Week he promised to renew efforts "to encourage freedom, independence and national selfdetermination for those countries struggling to free themselves from Communist ideology and totalitarian oppression". Such undiplomatic statements were widely criticized: they certainly did not make his meeting with Mr Gromyko any cosier, and the Kremlin particularly objects to the expanding of broadcasting to the Soviet block.

The Lithuanian communist party leader Petr Griskevicius spoke at last month's plenum of the need to struggle more actively against bourgeois ideology, vestiges of the past and "local religious extremists". He demanded better education in the "spirit of internationalism". which is precisely the term used to explain the occupation of ighanistan.

If the West wishes to dissuade Moscow from further expansion, it is vital to show that a brutal occupation more than forty years ago is neither forgotten nor accepted as legitimate. The directors of the Munich radio stations have not merely tinkered with their administrative structure: they have sent a significant message of sympathy and encouragement to nations which are bravely preserving Reagan their heritage against all the efforts of an alien atheist regime.

> In the second case the Rev Richard Dod, Curate of Waverton, in Cheshire, was executed in 1672 having "lived lewdly with his maid and got her with child, and among them had made away the child".

I am, Sir. yours faithfully, M.J. CROSSLEY-EVANS, University of Bristol, Manor Hall, Bristol, Avon.

LETTERS TO THE EDITOR

Cause for nation to give thanks

From Lord Lauderdale Sir, Would it not be well for the established churches of England and Scotland to proclaim a day of general thanksgiving for the escape from assassination of her Majesty's Cabinet constitutionally drawn from a free parliament?

This is a constitutional rather than party matter.

The day could fittingly commemorate those killed and maimed in place of the main target.

I am, yours, etc. LAUDERDALE, House of Lords. October 14.

One currency for all

From Mr Christopher Jackson, MEP for East Kent (European Democrat (Conservative)

Sir, Your Economics Editor asserts (October 8) it is time for Britain "to act on a flourishing ECU", that is," presumably, to join the exchange rate mechanism of the EMS (European Monetary System). She is right, but surely it is time to look further still,

I have long been impressed by the advantages which use of the dollar brings the USA despite the large variations in wealth and resources between the states. One of the most potent moves the European Com-munity could make towards increasing its economic effectiveness, not to mention its weight in world economic councils, would be to adopt the ECU as its single currency - with pounds, marks, francs etc. remaining as domestic currencies while ceasing to have independent

existence. Europe's besetting curse of nationalism, of course, stands in the way, but throughout the EEC the need of our peoples for economic growth to reduce unemployment should now be allowed more weight against the forces of insularity and chauvinism.

Yours faithfully CHRISTOPHER JACKSON. Mediars. Oakhill Road Sevenoaks. Kent. October 9

Airline competition

From Mr Martin O'Regan Sir. An opportunity truly missed (your leader. October 8) is a view that is widely shared on the Government's White Paper on airline competition.

British Airways now comes to usgift-wrapped as a mighty Trojan horse; an airline policy without an airport policy privatization but without the hall mark of real competition.

British Airways still has more employees per aircraft (about 250) than any other UK operator, protected by an unacceptable cartel rrangement of pooling fares in Europe and reserved areas -- of operation.

We now face the British Telecom proposals - an issue of shares that has been devised and promoted on the wartime model of compulsory National Savings. But at least the Government had to make some arrangement to protect the consumer against that dominant supplier. Why not in aviation? Yours sincerely.

MARTIN O'REGAN. The Studio Cottage, Brighton,

Unchanging times

From Dr F. Dennington Sir. I congratulate -Mr Sarkies (October 6) on his acquisition of a copy of *The Times* dated October 1, 1912, but I feel that I have done better.

Recently my son gave me as a birthday present a copy of The Times dated September 15, 1898; both of us being 86 years old.

It made fascinating reading and what specially interested the was a telegraphic report on page 3 by your Correspondent in Santiago (Chile) to the effect that the dispute over boundaries between Argentina and Chile was irreconcilable whilst an editorial article on page 7 dealt at great-length with its origin, development and background.

On page 5 of today's issue of The Times your Diplomatic Correspon-dent hints at a probable agreement

I wonder, Sir, whether other great ewspapers. British or foreign, could claim a similar high standard of informative service to their readers over such a long span of time? ours faithfully.

DENNINGTON. October 6.

VAT on books From Dr T. D. Hobbs

Sir. Your reports that the Government is thinking of imposing VAT on books and magazines in the next Budget have dealt largely with the damaging effect that such a tax would have on publishers and booksellers.

The chief executive of the Library ssociation and the chairman of the Publishers Association have both expressed the view that a 15 per cent levy on books will result in even shorter print runs, with books going out of print even more quickly than at present and with many nonprofitable titles not being published

The effect on libraries, both public and academic (and, more importantly, on their users) will be equally disastrous. The dwindling number of people who buy their

response.

Pit closure dilemma

From Mr R. T. Arguile. Sir, Mr Francis McWilliams' sugge tion (October 10) that the NCB should be required to give notice of a pit closure:at least three years in advance seems to be a reasonable

one, but entirely unworkable.
In South Wales I have seen on opencast sites (where the seams can be followed by exposing them) coal scams which, within 30 yards, have split into two, or have thinned, or have disappeared entirely due to faulting or wash-outs, I have seen a scam which reared up like a gigantic Atlantic roller as it comes ashore.

You can see this with opencast workings. But below in the pits you are blind, despite probing ahead of coal faces. So what one day is a visible pit can, in a matter of weeks. become a very different issue.

At. Newman Spinney site, near High Moor Colliery Derbyshire, after years of experimental gasification by the NCB, in conjunction with the Central Electricity Generating Board, the small generating station was closed down as the results of the gasification gave such OOF results.

Because the seams had been "fired" and there was a risk to two adjacent collieries this site was worked opencast and the areas which had been burnt to produce eas were found to vary in size from a table top to a tennis court. Again faults and other geological reasons

had caused a scheme to founder. Finally, one notes your editorial (October 10) suggesting, once more, that the very profitable opencast

Migraine and allergy

From Dr.J. N. Blau Sir, it would be helpful for your readers who do not have access to the Lancer to know that the report (September 28) of the relationship between migraine and allergy was based on nine selected patients who were challenged with foods on three occasions, only one of which was, reported in the Lancet.

The proof of this pudding is surely in not eating the incriminating foods for some months and

having no migrainous attacks during: More haste . . .

From the Director of The Maritime Trust-

Sir. In Mr Tam Dalyell's letter (October 9) he asks where Lord Lewin got his information that the General Belgrano was capable of 30. knots. Jane's Fighting Ships shows that, as the USS Phoenix, her design speed at full power was 32.5 knots. Steam turbine-driven ships should, if properly maintained, be able to produce full power throughout the life of the ship.

The speed "over the ground" isby other factors, such as loading the sea state, cleanliness the ship's bottom and the effect of

Mr Dalyell may have been misled by the Belgrano's captain saying that

own copies of books and magazines will increasingly turn to libraries to

creational reading matter. With library budgets aiready cut to a minimum throughout the country.

the likelihood of library users finding the books they need will

become increasingly remote.

This state of affairs would be bad

enough if it only affected re-creational readers using their local public library (for which they will already have been taxed through

their rates). But the proposed tax

will also deal another serious blow

to the educational standards of the whole country.

or unwilling to afford their own books, will look to their university or college libraries (and, indeed, to

public libraries as well) to provide include copies of set texts at the very moment when these same

libraries will be faced with a 15 per

cent reduction in real book funds.

Libraries will not be able to reclaim the VAT, and it is improbable that libraries' funding authorities will offset the 15 per cent loss caused by VAT with a corresponding increase in book funds.

These effects will be felt by all

These enects will be left by an libraries alike public, polytechnic, special university, even Oxford and Cambridge colleges! The appalling and long-term effect that they will have on the educational standards of the country and therefore on the country's future prospects as a whole must be obvious to all: except; apparently, to a Government which is interested only in short-term gain.

Yours faithfully, TIMOTHY D. HOBBS, Sub-Librarian, Trinity College Library, Cambridge. October 5.

Lack of funds for

From Mr D. P. Burkitt. FRS Sir. I can fully appreciate the frustration experienced by those treating cancer with limited resources (report, October 6). Nevertheless "the gap between the level of services generally available and the level that it is now possible to achieve" is nothing compared to the on setting up courses in the design field and put together, with my colleagues, a mechanical design course. It goes without saying that a considerable amount of time and enormous current discrepancy between endeavours to prevent cancer and efforts and expenditure

directed to its cure.
Both in Great Britain (The Causes of Cancer, Doll, R, and Peters, R.) and in the USA (Diet, Nutrition and Cancer, National Research Council, Washington DC) it has been authoritatively estimated that approximately one third of all cancer might be caused by our eating habits and at least another third by smoking cigarettes. In other words, two thirds of all cancer might be attributable to our lifestyle and is therefore potentially preventable if we are prepared to make the

necessary changes.
The recent Government NACNE (National Advisory Committee on Nutritional Education) report was commissioned with precisely this end in view vet perhaps due to overriding vested interests, its publication was delayed for two

years.
With few possible exceptions of highly contagious illnesses, no disease has been significantly reduced in frequency by improving the quality of its treatment. Yet it has been estimated that in Britain nearly 100 times as much is spent on the cure of disease as is directed towards its potential prevention.

The estimated contrast between expenditure on cure and prevention in the USA is nearly three times as great. These two aspects of medical care are, of course, not mutually exclusive but inherently complementary to one another, yet if cannot be denied that the latter has been sadly neglected and its possibilities have been inadequately appreciated.

Yours faithfully. DENIS BURKITT. The Old House. October &

Youth service

From the National Secretary of the National Council of YMC As Sir. While the YMCA welcomes the idea of a youth volunteer service (features, October 1, 2, 3), it is no panacea for the fundamental issue of Sir. Your Agriculture Correspondent, John Young, reports (October, 8) that the firm of Dairy Crest has

youth anemployment.

Before such a service could be introduced to satisfy the demands of the young people likely to take it up there are major concerns which must be addressed.

The young people would need some sort of guidance and training to help them cope with the human situations they are bound to face. The voluntary experience must be one which encourages the growth of ... the whole young person - therefore the service must include a training

and learning element. The YMCA's own "Training for Life" scheme included alongside community service work-experience, training, life and social skills and residential challenge. With the Manpower Services Commission's move towards a narrower, more exclusively job prientated outlook, cutbacks have taken place.

Another concern is what lies. ahead for these young people after their service is completed. The recent YMCA-sponsored study (report, September 26) highlights the dangers of creating a gap between expectation and reality, which can often lead to depression, aggression and suicidal tendencies amongst distillusioned young people.

Your report is a tacit recognition of the key problem which is a growing energetic but directionless youth. The YMCA has long concerned itself with this through its training programmes and support of relevant research. Most recently it has set up 14 "Action Line" centres around the country to help bridge the gap in the provision for those of

17-plus. The YMCA's overall concern. underlined by our research, is that we are building up for ourselves long-term problems related to an increasingly large and alienated younger generation for which a youth volunteer service might provide short-term relief and assistance, is giving stronger commitment to the idea of community, but is no long-term cure of the problem. Yours faithfully, C JOHN NAYLOR:

National Secretary, National Council of YMCAs. 640 Forest Road, E17. October 5.

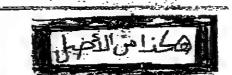

Pride of place_____

From Mr A. J. Lommerud-Olsen Sir. I saw a couple return to their car parked next to mine. The woman passenger approached her side of the. car. The man went to the driver's door, untocked it, glanced across the roof, walked dutifully around the passenger door, unlocked that, said, You drive!" - and climbed in. Discretion perhaps?

Yours faithfully, A. H. LOMMERUD-OLSEN. Dunchurch-Winton Hall, Dunchurch Near Rugby, Warwickshire.

153 Fox Lane, Southgate, N13.

From Mr Anthony Cutcher Sir. Such courtesy causes confusion. When I open their door first, passengers go to the other side, assuming the car to be left-hand Yours faithfully, drive. ANTHONY CUTCHER,

Exploiting a seam of goodness

IT is an accepted view of nineteenth century economic history that public concern eventually forced a bridle upon free running, free market capitalism because the social consequences - child labour, harsh factory conditions, and widespread poverty were repellent to the Victorian middle class conscience.

shopping development at Kingston upon Thames on November 27.
The Duke of Edinburgh, President of the Royal Society of Arts, will present the Albert and Benjamin Franklin medals at a dinner of the society at John Adam Street on It is to the same class and the same instinct that the Archbishop of Canterbury, Dr society at John Adam Street on Robert Runcic, was appealing November 27. The Duke of Edinburgh, Trustee of in his interview in The Times last week, and the similarity the Royal Academy Trust, will hold a reception at Buckingham Palace does not end there.

For again it is the workings of economic laws inherent in Trieste, Italy, on October 29 and, as President of the International Council of the United World Colleges, will visit the United World College of the Adriatic at Duino, on October 30. capitalism that are undoubtedly responsible for the sense of distress in communities affected or threatened by these laws.

They may be the driving force which will carry Britain through a new industrial revolution, as they did before; but all revolutions have victims. Marx said the victims would rise up, as some say will happen

today. The voice of moderate "decency," then as now, calls for the sharp edge of hardship to be blunted, and gives a warning of the dangers. They were listened to, before,

and Marx was thwarted. But there are two fundamental differences. The Victorian middle classes were highly motivated by religious beliefs. and Miss S. M. Worsey
The Duke of Kent was present at the marriage, which took place at All Saints, Hovingham, on Saturday, of Mr Martin Elwes, elder son of the late Captain Robin Elwes and Mrs J. H. Taylor, of The White House, Sowerby, North Yorkshire, and Miss Sarah Worsley, daughter of Sir Marcus Worsley, Bt, and the Hon Lady Worsley, of Hovingham Hall York. and took the Christian ethic of charity towards the downtrod-den as a self-evident truth.

That was their "carrot" the "stick" was a genuine fear of social upheaval which the state he who seizes the national could not overcome, if conditions were left to fester.

national megaphone.

Present-day middle-class society has a much less conscious sense of Christian duty. Secular man is a civilized being when the going is good, but the thickness of the veneer has yet to be tested in rougher

And the state may not quite feel the threat of the "stick", the possibility of civil insurrection, as acutely as the Victorians, With efflicient police, efficient armed forces, and all the apparatus of the "security state" tried and tested in less squeamish climates, there is hardly much room for doubt who would win,

Sedition profoundly worried the Victorians; today, even in the autumn of 1984, the politicians aschew it as a melodramatic exaggeration.

What counts in Dr Runcie's favour is that opinion is now far more volatile and rootless, and megaphone may never be able to tell in advance whether his is

ROSSITER

Peter Cotes writes; "Every inch an actor" could

be his epitaph. He fell upon each role without ever sacrific-

ing credibility for the sake of sensationalism. He was an actor

capable of considerable versa-

tility and the ability to "carry" a company and lend weight and stature to quite a few pieces of candy floss. It was right that such a one should have died

with his (stage) boots on.

I had first seen him in the title role of *The Heretic*, one of

his first major roles in the West

End. An adaptation from the

novel by Morris West, it opened, and closed quickly, at the Duke of York's after a press

panning, providing us, never-theless, with a bonus in the acting of Rossiter as Bruno.

who is burnt at the stake. That

it could so easily have become a melodrama, rather than the

compelling and dignified drama

some of us found it to be, was

almost entirely due to its leading actor - then still fairly

Besides his riveting perform-

ance of Hitler in Brecht's Arrum

Ut, he had been seen also in the

Laurence Olivier role of Fred

Midway in the comedy Scnu-

Detached on Broadway, making

a personal hit in what was a

the First World War and afterwards he served in the classes, and ring unconscious RNVR.
In 1921 he became an honorary dental surgeon at Edmburgh Dental Hospital, and from 1948 to 1961 he was consultant dental surgeon. He The great Victorian virtue was charity, the assumption that it graced the well-to-do to help the poor by time and money. Whether a late was a member of the Dental Board of the UK 1946-56, and

quickened is the big question Dr Runcie and other hishops It is a realistic aim, but certainly not radical. It assumes, as Dr Runcie made

clear, an abundant goodness about the British way of life that needs no drastic changing. As a strategy it succeeds if the public and Government heeds it. If it fails the church, and not just the church, will have to go right back to the drawing board, to see how to survive and function in a new sort of Britain, a nation fundamentally divided.

Memorial services

Sir Geoffrey Arthur The Queen was represented by Sir Ashley Ponsonby, Lord-Lreutenant of Oxfordshire, at a memorial service for Sir Geoffrey Arthur held in Christ Church Cathedral Oxford

on Saturday.
The Dean of Christ Church officiated, assisted by the Precentor, the Rev Ronald Lloyd. The Bishop of Oxford pronounced the blessing. A lesson was read by Dr P J. Cuff and an address was given by Sir

and are address was given by Sir Harold Seeley.

The Secretary of State for Foreign and Commonwealth Affairs was represented by Sir Edwin Arrow smith, the Diplomatic Service by Mr David Goodall and the Foreign and Commonwealth Office by Mr Keith Haskell,

Keith Haskell.

The Amir of Bahrain was represented by the Ambassador of Bahrain, the Sultan of Oman by the Charge d'Affaires, the President of the United Arab Emirates by the Ambassador of the United Arab Emirates by the Ambassador of Qatar by the Ambassador of Qatar the Amir of Ruwait by the Charge d'Affaires, and the Ruler of Sharjah by Mr. Hedderwick

and the kuler of Sharjan by Mr
Hedderwick
Oxford University was represented by the Pro-Vice-Chancelior. Dr A. H. Cooke, Warden of
New College, and the Proctors, and
Pembroke College by the Vicegerent
and Fellows. Among others present

Professor G. B. Caird A memorial service for Professor George Bradford Caird was held on Saturday at the University Church of St Mary the Virgin, Oxford, The Chaplain of The Queen's College, the Rev Peter Southwell, officiated, assisted by the Chaplain of Mansfield College, the Rev Charles The Rev Dr E. J. Yarnold and the

Rev Arthur Macarthur led the prayers. Dr Morna Hooker read the lesson and the Rev Professor Heary Chadwick gave an address.

Closing date & Enquiries Malcolm Barbe Jenni Clarke John Prince Sumon Taylor

Ten years ago, the multinational company, 3M, established what it

Savings to date, the company reckons, have totalled \$191m. The programme has generated more than a thousand projects and keeps out of the environment each year more than 140,000 tonnes of air pollutants, 10,000 tonnes of water pollutants, 1,900 million gallons of waste water and 230,000 tomes of sludge and solid wastes. Annual energy savings are estimated at the equivalent of 250,000

The company is proud that its approach took account of the various "generations" of pollution various generation regula tory agencies had begon to think in those terms. "First generation" pollution is the "First generation" pollution is the familiar image of a factory belching smoke or voiding toxic

filvents into a river. Second generation pollution is that caused by the product after it leaves the factory: one simple example would be an empty beer can littering the street. The pollution enters its third generation when the product, or the waste products of its manufacture or use, are disposed of, as in a landfill.

The persistence of toxic wastes once they have entered the environment - (dioxin, PCBs and heavy metals) however "clean" the manufacturing process, pollution controls must be complemented by basic changes in the nature of the technology themselves, whence the relatively recent emphasis on the development of "low" or "non-polluting" trehnologies. Some examples of 3P projects:

Solvents used in the manufacture of pressure scattle tipe were replaced with solventiess raw materials, reducing 1,100 tonnes of

\$1.5m. on one factory alone. On another tape-making line, an inert condensation type solvent recovery system recycles about 2,500,000 lbs of solvent previously emitted to the atmosphere at an anamal saving of \$750,000 in solvent, production and energy costs.

Science report

Pollution prevention pays handsomely

 Modification of a plant boiler to burn high-hydrocarbon exhaust from a maker saved a million dollars in add-on pollution control and is likely to recover \$270,000 of energy annually. Ammonium sulphite pro-

duced in reactors during the formulation of iron oxide, previously discharged through a waste water treatment plant into a river, is now concentrated in a vapour compression exponents and sold compression evaporator and sold as liquid fertilizar worth about 5271.000 a year, savings in pollution control equipment totalled \$1m.

3M notes that because it is "a

3M notes that because it is "a new products oriented company", products and processes are always being invented or modified. As a result, it has been comparatively easy to incorporate the pollution prevention concept into the technical activity of the company.

"It should be recognized that in some industries, however, the processes cannant be changed, or at least not easily, without disrupting production. Some companies are too small or lack the technical sophistication to engage in extensive product or process modification to eliminate pollution sources. In those cases, the Government should be able to provide guidance and assistance."

FINANCE AND INDUSTRY

Executive Editor Kenneth Fleet

Why Tory jobs boom fails to shorten the dole queue

So much credit is due to Mrs Thatcher for her calm performance last Friday that it seems almost indecent to analyse the words she found to use at her party enference. But "business as usual" cannot stop the Prime Minister: it dictates a normal critique of the defences she and her colleagues mounted on the outstanding issue of unemployment.

Through Brighton week, there were in essence two. That jobs are on the increase, even if the dole queue is still for the moment, getting longer. And that jobs would be multiplying faster if the British were not "pricing themselves out of

11-8

It was the second claim that grabbed the headlines, and started an argument which has a long way to run. But the first, statistical point ments a little prior investigation.

Putting the best figure forward Britains "employed labour force" rose about 250,000 in the year to March, 1984. Now that compares with a total increase of only 290,000 in the full three years of the previous Labour-governed upswing in the jobs cycle, from 1976 to 1979; a point which ought to induce considerable caution in the framers of Labour's next manifesto.

The "employed labour force" includes the self-employed, whose numbers were falling in the late 1970s and are rising now. This is a source of proper satisfaction to the Government. Between 1979 and 1983, the number of self-employed rose about 350,000 mostly in the new service industries. The financial sector alone notched up an extra 75,000. But later figures for self-employed are, in truth, pretty rough quessimates. So if we take the narrower, but more reliable measure of "employees in employment", the change this past year looks less impressive. The net increase in jobs in the 12 months to March, 1984, was only 190,000.

Still, that dose amount to about half the total increase in the number of employees achieved in the three year 1976-79. One must however, take some account of what went before during each of the jobs cycles. During 1974-76, employment (on this definition) fell only about as third of a million. During 1979-83, it dropped by well over two million.

This is a more dramatic difference than the unemployment figures reveal. In 1974-76, as employment fell, unemployment rose nearly twice as much. But in 1979-83. the rise in unemployment was nearly half a million less than the fall in employment partly because some people were redefined out of the unemployment statistics and partly because people simply faded out into what the statisticainas call "economic inactivity"

The distillchou between two long is important, because some of the disappearing unemployed have now been trickling back into jobs; and so the extra employment has not dented the doe queue apart from a brief respire last autumun. During the last upswing, too it did take a year before rising employment had an impact on the jobless figures. But there are signs reported by the Manpower Services Commission that the Tory jobs boomlet is slowing. Although manufacturing employment rose this summer for the first time in seven years, the service industries were not, it seems, creating new jobs at the rate

they were last winter. There is, moreover, a highly significant second reason why the extra jobs have not cut into registered unemployment; which is that the vast proportion so far have consisted of part-time work. In March, 1984. The big rise was in part-time working women, whose numbers went up over 200,000; the number of full-time scmale emploces was actually down on the

The trend to part-time work goes way back. In 1951, only 12 per cent of women workers were part-timers, and fewer than I per cent of working men. Today, nearly half of all working women are part-timers. and 6 per cent of men. On the one hand, this trend reflected the huge increase in the number of mothers doubling as part-time housewives and part-time wage-earners; while on the other, employers may, in the years of near-full employment, have turned to part-timers

The swing from manufacturing to servies has played a big part. In service industries it is more difficult, by and large. to stockpile the product of labour. A car due for delivery next month can be assembled at any time during the intervening 720 hours; but if you need a nurse or a counter clerk on Saturday mornings, it is no use employing either Monday to Friday. In the services, hourly or daily fluctuations in demand have to be reflected in fluctuating employment far more closely than in manufacturing - a fact unions which resist the use of parttimers (notably in the Post Office) would do well to take on board.

Of course, part-time working has increased, though less markedly, in manufacturing too, A recent Department of Employment survey explores the reasons in sosme depth, buit they boil down to costs. Even among women (who anyway earn less than men), the survey identified a 16 per cent difference in average hourly earnings across the econ-omy between full and part-timers; it also pointed up the use of part-timers are often excluded, and the gap widens did increase some administration costs, employers expressed an (unquantified) belief that they were more productive.

All this is grist to Mr Lawson's mill of

beliefs that there is an inescapable link between pay jobs, since they are appearing in the last required, lowest regulated, lowest-paid, sector of the British labour market - for largely non-unionized women part-timers. But it also knocks some of the gilt off the Government's figures for new jobs. That 190,000 boils down to a full week's work for only about half this number. Further evidence that the recovery is slow in relation to the economy's potential; but the changing balance of employment is also reason for the Government to ask itself two urgent practical questions about the social

First, about national insurance, which excludes from contributions those earning less than £34 a week, but imposes a swingeing marginal tax on those parttimers who just overstep this boundary, by charging contributions on their full carnings. As both part-time work and the level of contributions have grown, this has become a distortive incentive for employers to keep a growing share of the workforce below the threshold, and consequently, excluded from the security of the National Insurance system.

Secondly, about the rules governing benefits. The reason so many of the extra jobs have gone to women outside the labour force, and so few to men on the dole, has more to do with the social security system than with the traditional sexual segregation of men into manufacturing and women into services. Because he will lose benefit pound for pound, there is no point a man on the full householder scales of social security taking on any job which does not provide an income well above benefit level - no point, therefore, in applying for part-time work.

Since the vast majority of last year's extra jobs were for part-timers, it is no wonder they did not reduce the dole queue, or that the Labour Force Survey identified so many discouraged jobseekers among the unemployed. If ministers believe this trend will continue, then they must - for the sake of their statistics, if not for the sake of the long-term jobless change the benefits system so the those on the dole could seek at least partial satisfaction, and a higher standard of living, through part-time work.

conclusion.

should remain high. Recent evidence also empha-sises some powerful bullish domestic factors. The Bank of England's latest Quarterly Bullfactor. "Given the unusually What are the offsetting negative

heavy front-end loading of the PSBR, this means that funding is comfortably ahead of that likely to be needed over the year as a whole." The Bulletin went on, "there is thus some margin in hand against any pick-up in private sector credit demand in the months ahead."

funding needs for this year have been completed presents a very acceptable policy choice. Should they keep net funding during the second half of this fiscal year extremely low, thereby encouraging yields to fall but then accepting the possibility of this reversing when funding needs to be aggressive again around the beginning of the next fiscal year? Alternatively, should they overfund, albeit on a more modest scale than of late, thereby limiting the reduction in yields but, on a six month

Even if we assume the latter path, and this does seem the most likely, a background of minimal funding pressures and exceptionally high institutional liquidity must surely be seen to cin usefully summarized one be very favourable for gilts.

view, helping to stabilize the

vield structure?

factors? We would suggest four. There is a concern that the fiscal year 1985-86 will bring increased financing needs. The net direct and indirect PSBR costs of the miners' dispute in the fiscal year following a settlement could be greater than in the year of the dispute.

The inflation news is begin-ning to be negative. The reported inflation indices have yet to give any real cause for concern. But we have entered the "aggressive phase" of the

Sterling still appears to be vulnerable. The high level of industrial disputes and an expected fall in UK interest rates are again making their

Finally, there are beginning to be concerns voiced about the possible choices facing a tax reforming chancellor. The giltedged market, together with pension funds, are the two main areas of the savings market which still enjoy a high degree of tax privilege.

Despite a favourable flow of funds picture, there are still negative domestic factors. On balance, our short-term view is that UK bond yields can come economist of de Zoete & Bergn.

down provided that US bond yields are also falling. We do not yet believe that the balance of domestic evidence is suffi ciently favourable to allow UK yield changes to diverge significantly from changes in US yields. So our attention is still focused on US developments.

The direction of US policy is crucial. If, as we suspect, the evidence of a weaking economy gathers momentum, then the resolve to reduce the US budget deficit will reduce. The lesson for UK gilt-edged

investors may be not to look for the inevitable adjustment pro cess to begin with a change of heart on the US budget deficit. That does not seem to be on the cards. Look instead at the

squeeze an overvalued exchange rate can place on the US corporate sector which, despite the recovery, is still financially fragile. These pressures could lead to further squeezes on liquidity in the US credit markets and this in turn could provide the stimulus for a change of direction in US economic policy. This process could take months not weeks. In the meantime, it would be wise not to regard the US election as the signal for a

change in policy stance. The autor is a partner and chief

ORDINARY SHARES

in many ways, the oil sector looks attractive at present. Both BP and Shell are going through a period of relatively rapid profit growth, stand on prospective yields 30 to 60 per cent above the market average and have strong financial positions. The exploration and production companies are involved in a high level of drilling activity. which is resulting in a steady flow of discoveries and new field development

There is a certain amount of takeover activity, which is focusing interest on potential bid candidates, while the sector is a whole is an important seneficiary of the strength of the dollar. Despite these factors. share price movements in the ector are largely motivated by hort-term considerations, due to the fundamental importance of crude oil prices to both current level of profits and the market's perception of the longer-term outlook.

Against a background of a crude o been he deman OVET Howev crude depend fragile consequ tive to

mining oil share prices. There is a close correlation between the Opec production, the market would tighten in the fourth relative performance of the oil sector and spot crude oil prices. which are a good indicator of show its normal seasonal current oil market conditions although not a guide to future the oil sector railied steadily

Both shares and spot prices However, spot crude oil prices fell in the early summer when it remain more than a dollar a became apparent that fears barrel below contract prices about the Persian Gulf political and, despite a slow and steady situation had led the industry to decline in US crude oil stocks, overstock in the second quarter, there is no real evidence of any Opec responded by reducing its significant tightening in market

recovery in Opec production together with the hoped-for improvement in market conditions. In this environment, the sector seems likely to continue the modest rally that began in the summer, particu-larly with the relatively low ratings ruling at present, How-ever, once this has occurred, there seems to be little growth potential for the sector, given the certainty that there will be further periods of weakness in crude oil markets when fears about crude oil prices and the solidarity of Opec will be reawakened.

For investors, the correct strategy is to limit exposure to the sector when it is at or near relative peaks and to confine purchases to periods of relative weakness. Both BP and Shell look attractive by comparison with a number of their important competitors. Shell is the stronger of the two, but the improved outlook for BP's oil and gas production over the next five years and its higher ups raised to Breakn

Loan rates on the slide

Federal funds rates started to collapse last week. Only the intervention of the Federal Reserve on almost every day of

on Friday Fed funds were at the morning before rising to 10% per cent in the afternoon after the intervention by the Federal Reserve to make weekend matched sales effectively draining cash out of

While Fed funds were dropping fast, the yield on 90-day T-bills were also plummeting. At Friday's close the 90day bills were down to 9.92 per Treasury bond futures also

put up a good showing. finishing on Friday at 68% compared with a low in late June of 59. These are dramtic developments, pointing to a marked

drop in the level of interest rates. However, there is more to come. This is only the beginning.

pointing to the decline in nterest rates that is on its way and rejecting the consensus forecast of rising inflation and

Since late August Fed funds have collapsed, falling from fust under 12 per cent to 10 per cent. The yield on 90-day T-bills has also dropped, falling from 10.7 per cent in late August to under 10 per cent. The yield on the long-term Treasury bonds has fallen from

The peak in the yield on long-term Treasury bonds in June was 13.8 per cent, about 170 basis points above the

12.7 per cent in late August to

Forther declines in interest rates seem likely. The US economy is moving into a slower growth phase. Hence, demand for funds will weaken and their price will decline. Since the week of May 23, the total of business loans outstanding by commercial banks has risen from \$242.5 billion to \$244.8 billion, indicating virtually no increase in this term credit demand for more

than four months. The American economy is Fed's target of 4 per cent a year. Hence, we may expect the Fed to continue to provide an was the aggressive expansion of

reserves by the Fed last month that helped pash the funds rate and the 90-day T-bill rates

subdued. Last week's announcement of a fall of 0.2 per cent in big shock to the economists who have been predicting a strong upsurge of inflation during the second balf of this year.

To underline the disinflationary trend, the dollar has strengthened on the declining U.S. interest rates. Before the present downtrend in US rates gathered momentum, the dollar was worth about DM 2.9. Friday it was worth DM 3.1165. a rise of 7 per cent.

As the dollar strengthens, the disinflationary pressure increases. The rise in the dollar on lower US interest rates seems who have attempted to explain the strength of the dollar as being due to higher real interest

However, experience is show ing that the main attraction of the dollar is the attraction of the American economy itself, with its abundant growth and free market opportunities for mak-

booming stockmarkets - in-creased the value of funds under management from £3,972m at the beginning of 1979 to £13,251m today. Not all of this spectacular increase is due to a rise in share prices because there has been considerable real growth in investors and the iums invested.

The Financial Times index rose by 178 per cent over the period; standing at just over 480 in January 1979, compared with today's figure around the 850 level. But the value of unit trusts' funds under management has gone up by 337 per

Comparing the industry as a whole, with its huge spread of international investments, with the domestic indices as a crude yardstick but it does reveal just how successful the unit trust industry has been in terms of investment performance and in rounding up new customers.

It is difficult to judge the increase in numbers of unitholders because the statistics reveal only the number of accounts - not the number of investors - and there is much

duplication. The number of accounts has risen, from 1,950,000 in January 1979 to 2,157,000, which is well below the all-time high of 2,431,000 reached in June 1970.

"The number of individuals that the account-holder figures represent is probably no more than a million, which is very small for a population of 55m people", commented Mr Tim Miller, marketing director of the successful Framlington Group, who believes that one of the major challenges facing the industry is the need to expand the number of investors.

As part of its policy of fiscal neutrality, this Conservative government has done much to liberalise the world in which unit trusts operate. One of its first moves was to abolish controls on unit trust management charges; closely followed by the removal of Capital Gains Tax on funds' profits, making unit trusts effectively tax-free

effects for unit trusts.

Car think the

Unit trusts HE unit trust industry has never been better placed stronger when one of the main planks of the opposition's platform crumbled with the removal of life assurance premium relief on life policies. With the insurers still reeling revolution taking place in Unit trusts have from this unexpected blow, unit

trust managers are winding themselves up to face new marketing challenges. "It has become terribly

competitive and raises the general perception of unit trusts as an investment vehicle in the minds of the public," says Mr Miller.

The removal of exchange controls in 1979, which benefited fund managers generally, had particular knock-on

unit trust is that it provides a handy package for doing things that the individual would otherwise have difficulty in doing by himself," explains Mr Miller. The removal of exchange controls opened up foreign markets to UK inves-tors, but the high cost of dealing effectively precluded all but the very rich from taking advantage of this or would have done had the unit trust industry not leapt at the chance to wrap up ovesces equities in unit trust

attributable to the massive diversification and specialization which has taken place in

On the tax side unit trusts are as near perfect as possible ... and when personal pensions are liberalized it will be an exciting future? with its teams of doorstep the past five years. In January salesmen.

1979 there were only 384 unit trusts available to the general public compared with today's 658, covering such areas as health care, high technology, international emerging companies, and the like. Indeed, some are asking if specialization has not gone too far. Specialist funds produce

more volatile performances and the upshot has been a change in the profile of the average unit trust investor as younger more speculative punters have been enticed into the market attracted by high returns.

As a young expanding industry, with little in the way of overheads, the industry is well

The decision by the Unit Trus

Association to raise the front end commission on regular

savings schemes revealed a

number of important divisions

within the industry. There was,

and still is, disagreement about

the whole principle of higher commission rates and there is

disagreement about what effect it will have.

Regular savings schemes

have been sold by unit trust

companies in a low-key way for

some time. They enable inves-

tors to put small amounts of

money, say £20 a month, into a

trust of their choice but the

payments are not contractual so investors can stop paying or even withdraw money whenever they want. A lot of adminis-

tration is involved in this and

most companies say schemes are a service to investors rather

than a company profit maker.

than others

says: "Though our scheme was not profitable in itself it was a

valuable introduction to unit

trust investment for people who

would not otherwise have thought of this route." His

company intends to continue selling the scheme on this basis.

Other companies opposed to the new commission rate object

that while the schemes remain

non-contractual the fee structure will make it extremely unattrac-

tive for investors to withdraw in

the first five years or so. The

high initial charges will act very

much like the withdrawal

penalties on many insurance-

linked schemes. What effect will the new

ommission rate have on marketing? "If some companies

introduce it and it is successful in selling many more schemes, others will follow," says Mr Tony Smith of the UTA.

Whichever way they are

marketed, the industry is almost

certainly right that its savings

schemes are now more attractive than most of the choices on

offer. They are, after all, one of the most tax efficient investment vehicles around. Unit trusts pay

no capital gains tax. As long as the investment remains in unit

trasts of one sort or another the

consumers' money now taking place in the retail market? And what will be the effect of the revolution already under way in Unit Trust Association's agreethe City - in particular amongst ment on sales commission can the stockbroking community? remain intact given the direct

Most fund managers believe that the abolition of fixed. commissions for stockbrokers and the resultant search for income will force brokers to put up their prices to private clients. This can only make the unit trust route - already cheaper for small share deals - an even more attractive proposition.

On the tax side, unit trusts are as near a perfect investment vehicle as it is possible to achieve. And the likelihood of

Save & Prosper Unit Trusts A50-YEAR TRADITION INNOVATION

Founded in 1934, Save & Prosper Group was one of the pioneers of the unit trust movement. Today, our range of 29 unit trusts covers the world's major investment markets and sectors.

Over the years Save & Prosper has been responsible for many important innovations, from the launch of Investment Trust Units in 1937 through to Britain's first American Income & Growth Fund in February this year. With a high yield and a strong capital performance, the Fund has grown to over £17 million in just 6 months, and the offer price has risen by 12.6%.

Last year, our launch of the first Japan Smaller Companies Fund proved one of the most successful launches of 1983. During its first year the Fund grew to £25 million, and the offer price rose by 31.4%.

For further information on our range of funds please phone Sue Caplan on 0708-66966.

Now you can go to sleep counting your equities

capital gains can accrue unaffec-ted by tax which is only payable by the investor when he finally sells his units. This compares with the rival insurance-based schemes which must pay capital gains tax every time a switch is

Since the loss of life assurance premium relief probably the only investors to whom the traditional insurance-based maximum investment plan is of any special advantage are higher rate taxpayers.

left in a maximum investment

The savings schemes pre-viously lost out to insurance company schemes which had the advantage of 15 per cent life assurance premium tax relief. But with that gone the opportunity of selling more unit trust schemes - which improved years is a long time to wait. So for lower rate taxpayers to whom the final tax exemption is technology is now making cheaper to administer - is too not so crucial and who are therefore less willing to wait so strong to resist for some companies. Britannia will allong, insurance companies are most certainly go for the new commission rates, Save & Prosper is considering it. increasingly offering five-year investment plans. These only qualify for final tax relief after five years to basic rate tax payers. And as well as being subject to continual CGT charges the investor loses certain bonness if he withdraws More attractive his money early. The net result is a scheme similar to the likely The opponents of the new rates take a number of views. Mr Peter Scott of Gartmore

> As well as delivering a severe blow to insurance plans, the March Budget virtually pulver-ised another tax efficient alternative: tax-exempt friendly societies. By more than halving the sum assured allowed on friendly society schemes to a maximum £750, the Chancellor cusmed that annual contributions could be not more than around £100. This had the desired effect of making the plans so small that many

National Savings certificates are not strictly comparable to unit trust savings plans because they require a single lump sum payment, but the unjustly ignored Yearly Plan is intended as a regular savings plan. For a regular monthly investment over one year it gives a tax free return, like the certificates, an extremely attractive 9.06 per

It costs nothing in charges or commissions and the only drawback is that, like an insurance scheme, the investment must remain for the specified period otherwise full tax relief is not forthcoming.

societies which are also currently offering extremely attractive rates of over eight per cent tax free on their SAYE schemes. These, like unit trost and five-year insurance sayings plans are aimed mainly at basic rate taxpayers. But as one unit trust manager bastened to point out: "Historically the return on unit trust investments has been better than building societies because the return on equity investments has been higher As long as the investment is than interest rate returns."

This highlights the essential differences between unit trusts and most of the other investplan for the full tea years no unit payable on the proceeds. For and most of the other invariance in a 50 or 60 per cent tax ments just mentioned. Any band this kind of exemption is comparison with building attractive-but ten societies or other savings vehicles depends on which unit trusts you compare them with and over what period. Over the

technology funds will have done relatively badly but over longer periods most types of unit trust measure up well on performance. The basic question for the Investor, as Paul Bateman of S&P puts it, is whether you put your money in a capital risk type investment or not". So for the investor interested in equities, are unit trusts really

the best route? There is, of course, the option of "going it alone" - choosing and buying your own choice of shares with the help of a stockbroker. But this is time-consuming and virtually excludes most investors from foreign markets. The obvious alternative to unit trusts are the investment

trusts, which offer the same kind of professional manage-ment and widely-spread portfolio which the independent investor cannot provide for himself.

There is often not much to choose in performance between the two types of trust ever the short term. And a recent survey of investment trusts by brokers Wood Mackenzie concluded

Continued tacing page

investment objective and a likely middle of the road performance record. Unfortunately, long term performance counts for little in the unit trust industry and managers get more brownie points for appearing at the top of the one-year performance tables after a few years in the wilderness than a steady per-formance year after year. How many investors are aware that the best performing unit trust over the last five years was MLA with a price rise of 381 7 per cent? But anybody who has any interest in unit trusts will know that the best performer over the last 12 months was Fidelity Japan with a 60.6 per

Unit trust managers sometimes bank at being judged on the basis of short term performances alone, but are happy to take advantage of this in their advertisements when individual funds within their stable show up well. Any pretence of insisting that performance comparisons should be on the basis of five years or more was effectively buried a few years ago when the obligation to include the words "you should consider your investment as long term" in all advertise-

ments was removed. While performance compansons over shorter and shorter periods have contributed to the movement towards specialist funds, the major factor has undoubtedly been the need to investment adviser who

Too many specialists on the switchback?

become an increasingly import- trend towards an ever-growing ant source of new business.

ant source of new obsiness.

Ten years ago there were just over 300 unit trusts, now there are more than 600. In the intervening period the tax legislation affecting investments has changed dramatically and this has been instrumental in the growth of the industry itself. the growth of the industry itself. Unit trusts have benefited from the removal of internal capital gains tax liability on the funds themselves, which has enabled investors to switch between funds much more readily and move towards fiscal harmony means that many of the tax advantages previously offered by other investmen media have been systematically

withdrawn As tax efficiency has become less and less important in determining investment choice, so advantages of unit trusts have become more apparent. They offer a greater spread of risk and for most investors they represent a cheaper way of buying equities than through the Stock Exchange.

Inevitably, as advisers began to recommend unit trusts to their clients so their demands grew both in terms of service and the range of funds on offer, Naturally, as specific industrial and geographical sectors came favour and underlying equities began to show meteoric price rises, so the requests for specific funds concentrating on fashionable areas became more vociferous. And with financial advisers accounting for nearly two-thirds of new business for many unit trust groups, and sometimes as much as 80 per cent, there was still little

number of unit trusts. There are many who argue that the plethora of specialist funds is exactly what most investors do

By offering a widening range of funds, managers are secused of abdicating their investment responsibility so that today it is the investor himself who must make the fundamental decision as to which fund his money

should be invested. Professional advisers, however, clearly prefer a range of funds which they pick and recommend to their clients, And in the main they have won

Median performance of funds over last five years

the day as management groups have launched funds with increasingly narrow investment

A few years ago funds could generally be distinguished by geographical area. Thus there were Japanese funds. North American funds, and a huge number of UK funds, Now there are individual unit trust groups which within their stable include a Japan fund and a Japanese Smaller Company fund; these same groups may also have a North American Not everybody in the unit fund, an American recovery trust industry is happy with this fund, and an American Smaller

Companies Fund. What is the difference between the trusts? The managers can give an answer, but to most investors it is not immediately obvious.

UNIT TRUSTS

Officially, there are fifteen different categories of funds, but even this does not give a true picture of the variety of unit trusts. For example, there was a time when income unit trusts were invested in high yielding UK equities. Now there are American equity income funds and no doubt there will soon be

a Singapore Income Fund.
Clearly, the more narrowly defined the funds become the more volatile will be their performance. Such volatility encourages

switching and now there is a large number of unit trust advisers who will move their clients between funds with the aims of achieving superior hether they do any better for their clients by switching on a regular basis is difficult to gauge. But at least investors have the yardstick of the international fund by which to

judge their success.

Most unit trust groups run an international fund which supposedly has the world as its oyster, but for the most part this has not helped the managers achieve any notably better Derformance

As shown by the table, the median international fund has been outperformed by counterpart in the specialist American and Japanese sectors, and only just matched the median Far East fund. Had the relative investment performance of international funds as a whole been that much better the appeal of the specialist funds would have been more difficult

to justify. As it is, the proliferation of specialist funds is bound to continue as different investment sectors come in and out of Niall Sweeney

Arbuthnot takes its portfolio to court

So far as product innovation goes, 1984 is proving an interesting year for the unit trust industry. One key factor was the abolition of life insurance tax relief in the last Budget since when unit-linked savings plan sales have dropped sharply and thinking caps have been the order of the day in the

City's marketing departments. There has been an effort to construct new kinds of savings vehicles to cut the demand for regular savings plans and at the same time the battle for personal savines has been intense. The building societies have been offering investors high returns, as have National Savings, while the unit trust groups have been turning their

come. last spring. This was designed to offer investors a cheaper and new trust has been controversial because it is designed to defer indefinitely any capital gains tax liability and has departed from the Unit Trust Association's practice on paying

commission. But it is the eventual resolution of the tax situation which could have profound

attention to the customer who implications for the rest of the The portfolio

has "an But by far the most interest-ing development was the launch umbrella fund". Though it is of the Arbuthnot portfolio trust last spring. This was designed to there are four different portfolios - UK, the US, Japan and more tax-efficient way of Europe, plus more recently a switching funds between different world stock markets. The tors can switch their cash if they want to go liquid. The minimum investment is £1,000, with a minimum of £500 for each separate portfolio. The charging structure is quite different from the norm. The spread between the bid and offer price of the fund is only 31/2 per cent -roughly half the average in the unit trust industry. But the annual management charge is 2½ per cent against the normal 1 per cent. This covers the renewal commission to intermediaries. In each 12 months the unit holder can switch

portfolios free of charge. Arbuthnot argues that the structure of the portfolio trust is holders who like to switch investment between different markets than the conventional practice where you lose the arger difference between the

bid and offer prices. Whether an investor breaks even or benefits from the deal depends on how the switching facility is used. At least as interesting will be the results of a test case in the courts next month to resolve the tax status of the fund. Arbuthnot is contending that the portfolio trust is one trust and not a fund of funds type structure. Therefore, there should be no capital gains tax liability until the investor sells the holding in the trust itself. Arbuthnot contend that if the investor switches from the Japan to the US portfolio it does not constitute realising profits. Arbuthnot clearly plans to introduce other portfolios within the trust, making a "cradle to grave" kind of vehicle which could defer

indefinitely.

has been agreed that the test case in the courts will be fought on the issue of Stamp Duty . whether this is payable on switches inside the porfolio trust. The Inland Revenue bas agreed that this will establish also the tax status of the switching arrangements as far as capital gains tax is concerned.

other controversial aspect of the portfolio trust is the charging structure. Inter-mediates are to be paid annual renewal commission out of the larger management charge Since Arbuthnot left the UTA because of a difference over this there has been a significant change in the official line on commission. The Unit Trust Association has voted to allow its members to charge up to 20 per cent commission on regular unit trust savings schemes which have been around for years but rarely promoted.

Until the last Budget it was much more profitable to sell 621 carry the higher rates of commission payable on insurance. Now that unit-linked plans have lost their tax appeal, the industry has been casting around for an alternative product to fill the commission

Some groups like Save and Prosper have launched five-year unit trust savings plans based on an insurance policy. But now that the UTA rules on commissions has been relaxed, others are considering starting a new generation of regular unit trust savings schemes to be promoted by intermediaries who can be paid out of the permitted new higher com-missions. Others maintain they will stick with their existing non-commission plan.

While changes in regular savings schemes seem to have more to do with maximizing commissions than fulfilling the requirements of investors, the new breed of income plan on capital gains tax liabilities offer from some unit trust groups seems to answer a real demand for a simple way of genting regular monthly income plus the possibility of capital

> Monthly income schemes have been on offer for some time from groups like Britannia. Henderson and Gartmore. Basically, they consist of a number of different funds with different dividend dates arranged so that the investor gets a monthly payout, usually of varying amounts

changes in legislation planned by the Government is likely to take longer to come through than many other changes in the unit trust industry. But when it does, depending on its shape and form, it could have a bigger effect than all the others.

The Government has committed itself to loosening up the present arrangements for people's pension provisions, which will almost certainly mean breaking the monopoly of the vast pension fund industry and the insurance companies in the employee pensions field. Now the unit trust managers are wondering how much of a

wondering now much of a look-in they will set.

"It is not new for unit trusts to be used for pensions investment, particularly for self-employed plans," observed one that trust manager Rut if the unit trust manager. But if the Unit Trust Association has its way, unit trusts will become a major investment vehicle in all areas of pensions.

A large part of the Government's intentions is to make pensions "portable" so that the two-thirds of the working population which changes jobs

You can take it with when you go

employment.
The UTA says that if portable pensions do take off, unit trusts should be a permitted investment", says Tony Smith of the UTA. The Government's advisory docu-ment, so far its only indicator, mentions unit trusts as one among a number of possible investment vehicles for the new type of pension. Building societies and banks are others.

Unit trusts suit the Government's claims admirably, claims the UTA. They are easier for the public to understand than the impersonal workings of a vast pension fund, investors can easily see how money is this way it is likely that they will invested and what the units are be allowed a greater say in the worth at any given time. The way the money is invested.

once or more during their working lives do not lose out. Instead of leaving a trail of pension plans behind, these people would have one which moved with them to their new system of owning units rather than just a fraction of a pension fund is helpful in enabling investors to know exactly how much of a fund is theirs. But the degree of individuals control over their pension

control over their pension money has still to be decided. What the UTA would like ideally is a system like the one in the US. Portable pensions there are known as Individual Retirement Accounts and each account holder can choose, within certain limits, how to invest the money in his account. They are free, for example, to choose from the various savings and loan insti-tutions (the US version of unit trusts) as one area of investment. Alternatively the Government may decide that pensions still have to be operated through insurance schemes, but even

With this kind of personal choice the effects on the unit trust industry could be enormous. Here would be money that people had to invest by law, but which they might not be sure exactly what to do with. The potential size of the new market would run into billion of pounds sterling.

The response of the unit trust industry to this challenge is a matter of conjecture, but most participants agree that it would lead to an unprecedented marketing drive by the manage ment companies.

Many unit trust companies have shied away from the sales force approach on the grounds that it is unnecessary and expensive. But companies might have to change tune to compete with the sales muscle of the insurance companies if they are to win a fair slice of the new business.

There is, though, unanimous agreement among the manage-ment companies that the new pension arrangements would not lead to the sudden creation of lots of new trusts to absorb the new money.

Before making an investment in a unit trust you should expect the managers to tell you how well it has performed over the long term, The table shows that M&G SECOND General has a 28-year performance record to shout about. It has achieved its aim of providing growth of both capital and income. through investment mainly in British companies, including some with overseas interests.

\$1,000 invested at the Fund launch in June 1956 grewto a staggering £42,875, with income reinvested, by 1st October 1984, compared with £7,183 from a similar investment in a Building Society and £4,241 in National Savings Certificates. Over the same period you would have needed £8.081 to have kept up with the

cost of living.
You might, of course, have invested directly in blue-chip shares and in some of them you. could have done very well. However, you should remember that many of the respected household names of the 1950s, like British Motor Corporation, have been very disappointing investments. Today, only 12 of the 30 shares which made up the Financial Times industrial Ordinary Index in 1956 are still included in it. Many individual shares which are popular today may also turn out to be poor investments.

The advantage of investing in M&G SECOND is that it is a general Fund with a wide spread of shares under constant review by a full time

Unit trusts are not suitable for money you may need at short notice since the price of units and the income from them may go down as well

To encourage you to become a unitholder, we are offering a 1% extra allocation (rounded down to the nearest unit on all investments of £1,000 or more, increasing to 2% for investments of £10,000 or more. You may use existing shareholdings to purchase units; simply send a list of what you wish to exclusing, with the appropriate share certificates and the application form, leaving the amount to be invested blank.

On 9th October 1984 the estimated gross current yield was 4.09% at an offered price for Accumulation units of 888.1p. Prices and yields appear daily in the Financial Times. An initial charge of 5% is included in the offered price and an ran image charge of 2% is included in the different price and an annual charge of a maximum of 1% of the Fund's value – currently 34% – plus VAT is deducted from gross income. Distributions for income units are paid net of basic rate tax on 15th February and 15th August and are reinvested for Accordate tax on the contract of the con nour recruary and not august and are reinvested for Accomisation units to increase the value of the units. The next distribution date for new investors will be 15th February 1985. You can buy or sell units on any business day. Contracts for our chase or sale will be due for settlement 2 or 3 weeks later. Remuneration is payable to accredited agents; rates are available on recrues?

able on request. Trustee: Lloyds Bank Pic. The Fund is a wider range investment and is authorised by the Secretary of State for Trade and Industry.

Sheffield Wednesday.....2

To anyone who had seen Sheffield Wednesday succeed at Liverpool two weeks previously, their form was disappointing. The

opinion was confirmed by both their manager, Howard Wilkinson,

and captain. Mike Lyons, to the

general asignishment of onlookers

watching them for the first time in a season during which they are

threatening to emulate, at least, the achievement of Watford two

The comparison is inevitable, since Wednesday's long-ball style and early season promise are similar to those of Watford when they

finished runners-up in their liest season in the first division. They

may look like a team obsessed with fitness, byt Lyons revealed that they

spend only one day's training a week concentrating on the physical

aspects of the game. They would still have over-our Luton had

Varadi not been seemingly too chausted to despatch all the best

It was because Varadi had failed to oblige that Luton, ultimately,

might have earned an undeserved point. Runn, whose previous attempt had sailed out of the ground, pulled a goal beck in the

seventy-eighth munute when he thumped in a pass from Stein, who

later provided Hilaire with a chance for an equalizer, which brought only

With Hilaire about to enter that

period of the season during which he convolly goes into hibernation.

Luton must quickly discover how to get the best of their new signing. He would! have profited against a defence less resolute than Wednes-day's which was scarcely disrupted

by the departure of Oliver, whose first division debut lasted only until

the third minute, when he suffered a fractured 'nose and concussion.

Worthington, the substitute, was just the man to fill the gap at the

Wednesday's goals came in the thirty-lifth minute, when Chapman

intry-titte minute, when Chapman scored off an upright from Sterland's cross, and in the fifty-second minute, when Luton could only clear a corner back to Blair,

whose subsequent cross was vol-leyed in by Lyons. Thereafier, Wednesday made the mistake of believing their job was done.

a leeble shot.

chances with his usual alacrity.

Luton Town...

Of the 24 England team spearhead. The uncapped Barnes, Williams, Rix, Withe sheets that Bobby Robson has Lincker, of Leicester City, and and Moses - all scored for their Withe, of Aston Villa, have been summoned to fill the gap in the squad, but the natural replacement in the line-up in Hatcley, of AC Milan.

Hateley came on for Mariner against the East Germans, who were disturbed by his bulldozing aggression, as well as by the explosive speed of the other substitute, Francis. Yet Hateley has combined with Woodcock so far for a mere 90 minutes. during the memorable victory over Brazil at the start of the

recent tour of South America. Scoring, the art that England require most of all on Wednesday night, has been the most obvious failing since Robson took over. In the last nine matches, for instance, they have claimed five goals, and only two their last six hours at

Wembley.
The national side may be short of live ammunition, but there can be no doubting the accuracy of the marksmen who are lurking within the League programme. A total of 137 bullets hit their intended targets on Saturday and remarkably, out of the 44 domestic fixtures. only at Walsall were they firing

Robson will have noted that United and Ipswich Town Albion turn to the old Golden era proves Giles style to have worthy heirs

By Simon O'Hagan

West Bromwich Albion4 Nottingham Forest1

Johnny Ciles, the West Bromwich Albion manager, described his aide's performance as "one of the best I have ever seen from a team I have been involved with." Citles is not a man given to exaggeration. He has, however, been involved with some prelly good teams.

indeed, the way in which Albion not so much heat Nottingham Forest as dismanted them evoked memories of the Leeds United team of 10 years ago in which Giles, of course, was an integral part.

In those days, the single, hely blow of the long ball forward was a crudity unthought of, Now, we are told, it is scientifically proved to be exerting and effective. Well, per-haps, On Saturday, Albion were no The truckle was to become a flood. Brazil, at last playing to his capabilities, added a second goal give minutes later with the kind of superb individual effort so familiar less exening or effective for an expousal of the "short" game which amounted to a celebration of the joys of the midfield,

They regularly composed move-ments of 20 or so passes, each one cutting a little deeper into the l'orest defence until eventually it fell apart, This was glorious stuff, perpetual-motion football, with every member of the Albion side scenningly linked hy a cummon thread.

While the overall impression was of superb teamwork, it was possible to pick out individual excellence: a left back with the skill to match his adventurousness, and Thompson, who showed an engaging modests after each of his three Well-taken MANCHESTER UNITED G Balley, M Dusbury, A Albeston, Ji Moses, G McQueen, G Hoog, B Robson, G Strachen, M Hughes, A Brazil, J goals.

On a day of otherwise collective achievement. Albion went ahead in achievement. Albion went ahead in the twenty-third minute with a stunning solo effort from Mackenzie. After receiving a short pass from Whitchead, he beat Davenport and latt a swerving shot muo the lop right-hand corner of the goal from 35 yards.

Ten minutes later Thompson headed in after Cross had got the better of Fairclough, and from then on Albion played in a manner which left one feeling not so much elated as a six pleased. as privaleged.

Forest, who beat Albion 5-0 in this fixture last season, were overrun. Their goal, the result of a deflection from a shot by Bowyer, made the score 2-1 and quite distorted what had been going on. Thompson put everthing back into focus and left Giles with a clearer picture of good things the future may hold for Albion.

Brilliance of Barnes silences the bigots

John Barnes had the perfect answer to those racists who had been taunting him and Luther Blissett all afternoon - a goal in the eighty-second minute of quite stunning piddenness that sileneed even the most loud-mouthed of

higots.
If Barnes's second-half display
was important for Watford - their
first league victory lifted then from
the hottom of the first division, if
only on goal difference - it was also

with on goal difference - it was also significant in a broader context.

Barnes, showed other black players that the best way to deaf with racial abuse from the terraces is not to disappear from the game, but to impose oneself on it. So it was that Barnes became the game's central figure: those who taunted him were banished to the dustbin of

Chebea's problems - of hooliganism and of racialism among a minority of their supporters - are those of many other clubs. Chelsea do have a point when they complain that it is their problems that are highlighted, but that does not mean to say that they can be ignored, it is surely humiliating for black players to be singled out for particular abuse. How, I wonder, do Chelsea's own black players regard it?

The match itself was about uingers, and how to use them.

Chelsea had Nevin, who tormented Rostron in the first half. Dixon gave Chelsea a good start, getting away from Jobson (having his first league match at centre back) to score in

seven minutes. Chances came and went for Chelsea, with Coton in particular taking the credit. A number of fine saves included two in two minutes with his legs, first from Thomas, then from Dixon.

Watford, as their manager Graham Taylor said ofterwards, bad exceed in the circle manager.

racted in the right manner to adversity. They also took their chances. Two volleys, by Jobson (14) from a corner and Jackett (38) from a long throw, sneaked them a half-time lead.

Wasford rightly refuse to abandon

their attacking principles. After the interval they used Barnes better in the spaces down the left flank. Chelses did not use Nevin as well.

Chelsea did not use Nevin as well, and on that the match swung.

After Gilligam, an inadequate stand-in for the injured Reilly, had spurned one chance by Barnes, the winger himself won the ball from the lumbering Rougvie, turned and smocked a shot past Niedzwiecki. Dixon's second goal, from Nevin's cross after \$4 minutes, made little difference. Earnes, the son of an officer in the Jamaican. son of an officer in the Jamaicany army, had had the last word.

Justin Fashanu, the Notis County forward, was sent off ashis side slumped to the bottom of division two when they were beaten 2-0 by Cardiff City, yesterday, Fashanu was booked just before half-time for a foul and in the fifty-eighth minute was sent off by the referee, Alan-Ward, after disputing a de-

Cautious Howe's blindside dash By Clive White

Leicester City ... Don Howe, the Arsenal manager,

behaving very oddly. In trying to avoid the press after Sanurday's game he made a blind-side run for game he made a blind-side run for the team coach like a manager fleeing from another defeat. Unlike his team, he was promptly backed up against the swall by a useful-looking press attack. It was all for fear of hearing a certain prophesy that is taboo within his carshot.

Howe screws up his face and shuts his ears like someone trying to avoid the result of a match before he watches it on the television. As yet.

watches it on the television. As yet, we do not know the result, but the confident forecast is, whisper it, "Arsenal for the title." Gordon Milne, the Leicester City manager, was at first reluciant in his praise of

was at first reluctant in his praise of Arsenal, as if harbouring title ambitions of his own. But it soon poured out of him like someone on a truth drug.

Howe, will probably think we have broken the spell now. But it is Arsenal who are breaking down the barriers, opposition defences and supersitions "included. When Anderson headed in to his own goal after 35 seconds on Saturday, it did not augur, well for their first win at Filbert Street in 10 years. But there was a powerful feeling, which only the best sides can emit, that the match was not lost.

Arsenal equalized 13 minutes

Arsenal equalized 13 minutes later with an equalized 13 minutes later with an equalized 13 minutes later with an equality daft goal, A shot by Sansom struck a defender and looped over Wallington who, with time to plot it path, formble the ball for Talbot to score. Brainstorms subsided and Arsenal got down to winning the match comfortably and stylishly.

Perhaps Howe's fears about praise from the press are rooted in the belief that they usually get it wrong. This time last year Arsenal were being told to forget the flair and revert to their more boungly productive ways. Thank goodness. Howe shut his ears again.

Taibot is another who has turned a deaf ear to criticism, and is now giving work-rate a good name. Howe paus it down to keeping his mind occupied. Howe said: "He has involved himself wholeheartedly in the job of PFA chairman and it is good for his game." Tailou's involvement included two goals, two assists and a booking. In the

involved himself wholeheartedly in the job of PFA chairman and it is good for his game." Tailou's involvement included two goals, two assists and a booking. In the build-up to the second goal, he powered through a Hazell tackle as if it did not exat. Nicholas, in little space, curied the bull neatly out to Rix, who drove home: a low, penetrating shot.

The third owed listlf to a sudden break which left Leicester's defenders plodding far behind. Tailout showed finesse in setting if up for Anderson to strike a telling blow, in the crash impened, and before he could rejoin the right direction this imme.

Earlier, snother thrilling, Anderson in the fine was held up by a second crash in the foot of the person bad greated filescapits grucsonic lunge and put Alianson, standing in for Mariner, who was a late withdrawal, promisingly in possession and Feeley succeeded where Hazell failed. Nicholas's decent pensity shot was even more decently saved by Wallington, Justice was done fittingly in the light of the power of the power of the pensity shot was even more decently saved by Wallington, Justice was done fittingly in the light of the promise and save the late. Hazell failed. Nicholas's decent pensity shot was even more decently saved by Wallington, Justice was done fittingly in the light of the late o determiny saved by wateringth, Justice was done intingly in the righty first minute when Hazell bungled his control letting in shots from Woodcock and Alluson before Feekey muched the ball away impressively but illegally. Johnston's bruising reception

By Hugh Taxion

If Maurice dolusion was de-lighted with the rapturous welcome he received figur Celtic supporters on his return to Scotland, he was anything but pleased with the reception given him by uncompro-mising Hiberoisas defenders. He was treated not with respect for a new prince of Parkhead but to bruising tackles from behind, which are still considered legal in Scotland are still considered legal in Scotland but whose absence from English football had allowed him greater freedom in which to express his art.

freedom in which to express his art.

As he limped out of the ground after having played quietly but effectively enough in Cettic's 3-0 victory, which puts them into second place in the premier division, a point behind Aberdeen, the forward who had just been transferred from Watford for £425,500 admitted ruefully "After 15 months in England 1 had forgotten about the tackle from behind, but Hibernian showed me how quickly I must become used to how quickly I must become used to it again... Although Johnston had to receive.

treatment, he will be fit to join the Scotland party for the first World Cup qualifying match against Iceland at Hampden Park on

iceland at Hampden Park on Wednesday.

Although it took a dubious penalty, scored by Grant, to break down the stubborn Hibernian defence. Celtic emerged comfortable winners, with good goals from Burns and McClair reflecting justify the margin of their cancellority. Burns and McClair reflecting justily
the margin of their superiority.

Aberdoen remain in the leading
position after beating Dumdee 2-1 at
Dens Park with goals from
McDougall and Stark. Connot
scored for Dundee, who have now
lost 18 consecutive league matches
at home to Aberdeen.

Rangers too homent spiles back

Rangers too, brought smiles back to the faces of their supporters, although they left it late in snatching a win over St Mirran at Paisley Redford and Ferguson scored in the last four minutes to gain a 2-0 victory.

Dundee United slipped again in the league battle, which is rapidly developing into a three-horse race. Losing 2-0 to Heart of Midfothian, the team they beat in the Skoi League Cup semi-final, the anne-dictable United trail the leaders by cight points. Hearrs, whose goals were scored by Park and Robertson, have made a notable recovery from a dismal spoth and outplayed their rivals. Dumbarton beat Moreton 3-1 at Boghead and it was a deserved

CYCLING Hinault's attack brings no Counter From John Wilcockson

Like Napoleos, Bernard Hinsul's returned in triumph to France, vesterday after winning on Saturday. a Tour of Lombardy that will be spoken about for many years to come. It required Hinault to be at his very best to counter a brave attack 50 Kilometres from the fluish by Stephen Roche from Dublin and Charles Montet. The young Frenchman who won the Tour de l'Avenur treg weeks ago.

man who won the Tour de l'Avenur two weeks ago.

The Angio-French pair attacked on a steep climb and at one point were 40 seconds ahead of a small chasing group led by Hinault, Ludo Peeters of Belgium and Tommy Prim of Sweden, it looked as though Roche could well win his first. European classic, But Mottet Weakened-on the final hill and the pair were cought by the six chasers with 12 kilometres still to race.

Mottet was immediately left behind, and lost more than five minutes before the end, but Roche; hung in tenaciously with the other six riders but neither the Irishman nor any of the others had any reply to a bistering attack by Hinault just before the 10p of the San Fermo climb above Lake Como.

The Frenchman went on to arrive,

The Frenchman went on to arrive a in the late afternon sunshine of this in the late afternon sunshine of this northern Italian town almost a minute clear of Pecters, who outsprinned Toin van Yliet, a young Dutch hope, Print and Roche, The race favourite. Sear Kelly, did not have a brilliant day. He crashed just before Roche made his attack when a French rider, Robert-Forest, crashed on a steep descent, into the village of Argegoo. "Forest, panicked when he his some water on a bend," Kelly explained "and he applied both brakes, giving me no chance to avoid riding over him."

Kelty was then heavily marked after he had chased back to the leading group but he did not blame the crash for his defeat. He finished in seventeenth place in the main the crash for his defeat. He finished in seventeenth place in the main group, more than three minutes behind threath.

Kelly raced with dignity despite the cloud of suspicion and the string of reporters that have followed him since the news broke on Friday that he has been disqualified from the Paris-Brussels classic after a positive dope test. His appeal against the disqualification will no doubt retruine a long legal battle.

Whatever the result of his appeal,

By Sydney Friskin Buckinghamshire0'

If a newcomer to hockey had been asked to pick out the three Los An geles. Olympic players on the field at Hounslow yesterday, the task would have been difficult.

The three Olympians, Kulbirs Bhaura, Potter and Misimmin (New: Zcaland), all played for Middlesex, whose game had no pattern. Nor, for that matter, had Buckinghamshure's But with Kent and Berkshire: also failing to produce, a goal between them at Maidenhead, the outcome in this group is wide open. outcome in this group is wide open. Two teams will qualify for the South

Two teams will qualify for the South semi-finals.

Exchanges in the first half were fairly even. The best shot of this period was taken by Khehar, the Buckinghamshire captain, who! failed to beat the goalkeeper. By the end of it, Buckinghamshire had forced seven short corners against the four by Middleser. Then each side had periods of ascendancy, Buckinghamshire at the start of the second half and Middleser towards the end of it. the end of it.
It was then that Middlesex should

CA.

have won the match. With about five minutes left, Eaton's pass into the circle was picked up by Knibir. Bhaura: The goal was wide open but a shot delivered without control went astray. A little later Thomas missed the mark from a scramble.

But'incharachine were well missed the mark from a scramble.

Buckinghamshire were well served at outside left by Kuljit Dhak, who ran well, turned neatly, and centred all to no avail. Their best midfield player was Davatwal, while Meakins was outstanding in

while Meakins was outstanding in the Middlesex defence.

Yorkshire's day as Bath don a Somerset shirt and dry up

By David Hands, Regby Correspondent

Somerset Yorkshire

Yorkshire not only dented Somerset's hopes of another county championship final at Bath on Saturday: they also decented the prospects of the South and South-west Divisions who face the Australians next Saturday because, in the course of a gritty and exciting game, Hall and Trick sustained hamstring injuries.

Both injuries occurred during

the last 15 minutes of the game and, with neither Spurrell nor Mogg able to train fully last week, Jack Rowell, coach to the divisional side, will be interested to see who appears at the penultimate training evening at Bristol tonight. Neither injury, however, should detract from the merit of Yorkshire's win in the championship (sponsored by Thorn EMI) by a goal, a try, two penalty goals and a dropped goal to a goal and a penalty.

They played a magnificent first half during which they ran up a 15-0 lead, yet retained the capacity to absorb everything Somerset could offer during the final half-hour. They demonstrated the depressing - to the opposition - ability to stop the other side scoring then go straight down the field and score themselves.

They had the wit to accept every gift Somerset made them. Their dropped goal came after Horton mistouched, they kicked two penalties needlessly conceded and both tries, scored by Harrison on the right wing. came from Somerset moves which broke down with Palmer in the centre. They played for an hour like a club side while Somerset - the Bath first team plus Stiff - were all fingers and thumbs, creating chances but lacking the ability to put them

It will be sad for Yorkshire to lose Andrew to Cambridge and they may be without Underwood and Peacock for their next game, which clashes with the Combined Services encounter with the Australians. That, at least, would help to fit Winterstrain is better) into a back row whose flankers. Tipping and Peter Buckton, were outstand-

Even within the context of a team performance in which the tackling was savagely efficient, individuals such as Norton and Huntsman excelled. Andrew's vision for the game shone out of the end of Melville's delightful pass. The tussle between England's scrum-halves was absorbing both had to cope with poor-quality possession but Hill, while varying his game well, lacked the concerted support of his backs and his back row pected in a club unit.

Melville's much-repaired knee still gives him discomfort, but after each game he plays the recovery time is getting shorter. One game a week for the next couple of months and no undue exposure may see him completely restored.

The bonus for Yorkshire was their tight forwards. They pushed and wheeled Somerse at the scrums and shared the lineout. They were cohesive where Somerset, even in their loose rushes, were frayed at the edges. The only time Yorkshire relaxed was when Stiff crossed from a tapped penalty.

If Rees had got his hands on a deft chip from Hill which stood up in the corner, the last quarter would have been even more fascinating. It was typical of Somerset's day that the ball was

Britain will get its first look at Campesa, the exciting Australian wing, when the touring side open their programme against Landon Division at Twickenham on Wednesday (David Hands writes). However, the side will be without their two most synthesises of their two most synthesises of their two most synthesises. · la spite of their defeat spains

their two most experienced centres. Slack, the captain, and Hawker being unlit; so is Cox, the first-Northumberland at Gosforth on Saturday, Surrey have picked the same side to nicet Notts, Lines and Williams, the lock and vice-cap-tain, will lead a side notable for the use of the back division. They will have the experience of Moon. Gould and Ella to steady them while the Lozowski, who played at centre, suffered a knock to aggravate an old knee injury and is doubtful for the Loadon Division side to play the Australians at Twickenham a week

Moriarty dismissal a blow to Wales

First look at Campese

... By Gerald Davies

Lianelli ... Swansea12

Richard Moriarty, of Swansea, must wish he was still in Australia. must wish he was atill in Australia. While playing there during the summer, he earned himself an award for his high standard of sportsmanship. In contrast, at Stradey Park on Saturday, he was sont off the field three minutes from the end. His offence, it was said, was that of completing a tackle after the whistle had gone. It seemed an odd decision and hardly merited a sending-off.

With the likelihood of a period of suspension lasting not less than six weeks, he will now miss the Australian international, but this does not automatically, unlike the RFU regulation, rule him out of the five nations championship in

Earlier in the match. Phil May, the Llanelli captain, received his marching orders too, after misusing his boot, as they euphemistically say, and he will miss Llanelli's spatch, against the terrists. match against the tourists on November 20.

All this might suggest a brawl of a game. Nothing could be further from the truth. These were isolated incidents, with hardly an infamous deed in between. The game itself was tough and aggresive, and there is nothing wrong with that, but there were only rare moments of exchement, in fact, cynics might be moved to suggest that the incident involving May ought to have happened sooner. For it was only then that Lianelli came to life and, behind 10-12 were sourced on to hehind 10-12, were spurred on to win by a gool, a try, three penaltys and two dropped goals to four penalties.

Swanses are a disappointment this season. With all their players of swinses are a transport of recent good years intact, it is a mystery why they are playing so inceptly. Their only encouragement on Saturday was in the play of their 19-year-old scrum half. Robert Jones. There is the quality of the international player in him. He is quick round the base of the scrum and his pass, like Melville's needs little wind-up and is swift and accurate. He thrives on being busy too. Twice he was the sole coverer in defence to prevent tries by Lewis and Jonathon Guffiths.

Swansea never looked like scoring a try and it was the predictability of

a try and it was the predictability of Wyat's boot that accumulated their four penalties in the first half. There was more adventure in Llanelli and Gravell scored a lovely try after Pearce had created the gap. Indeed. Pearce had the better of the contest with Dacey and kicked a penalty and a dropped goal by half-time.

Moriarty: odd decision

As is the way of these things, the loss of May somehow worked in Llanelli's favour. In the twinkle of an eye, Pearce and Gravelle kicked penalties. Then Gravell, feinting this way and that almost during the opposition to tackle him, cut through the middle. He passed to his namesake, who sent Ellis over in the corner. Pearce converted. It was all over bar the shouting, of which there was plenty. Then Wyatt attempted to clear, the ball was charged down, and Pearce picked it up and casually dropped another

Australians delight Champions look like in a tedious game

RUGBY UNION: INJURIES IN COUNTY CHAMPIONSHIP DIMINISH PROSPECTS AGAINST AUSTRALIANS

Notts, Lines and Derbys....6 There must have been a few Australians chuckling into their lager at the Stoop Memorial Ground after Middlesex had laboured so tediously to victory over the newly-promoted combined counties side Saturday.

More than half the Middlesex

team are earmarked to form the London Division team to oppose the Australian touring team in their opening match at Twickenham next Wednesday, so the cosch, Alan Jones, and several of his Australian party turned up to see the action. There was not much of that and the visitors must have seen little to

worry them.

Matches in the early stages of the county championship can be a trifle unexciting and Saturday's truste was no exception as Middleaex lumno exception as Middlesex lumbered to victory by one try and two penalty goals to two penalty goals. Tempers did not become over-excited either, although the referre did have to warn both front rows on occasion.

One department in which Middlesex did excel was defence. The combined counties, despite inventiveness were not

their inventiveness were not allowed to penetrate to the line. The home defence withstood the waves

team in the making By Gordon Allan

resolute tackling.

Derek Morgan, the Chariman of the England selectors, stood on the terraces to get a closer look at the candidates for national team places. Gloucestershire, last season's county champions, were a team in the making, not the finishing article, at Bristol on Saturday. They beat Kent by a goal, a try and two penelty goals to a try, a dropped goal and a penalty, but made it look difficult, and with a keener eye for the possibilities and a mite more luck. The full-back, Stringer, the stand-off, Davies, and the flanker, Cooke, confirmed their standings, while Carus, at centre, seized his chances

intelligently.

Shortly before half-time, Cardus produced, two stratagems that brought the only try of the match. He found himself at stand-off during one phace of loose play and made the most incisive break of the match proteins the combined. match, reaching the combined team's 22. From the ensuing set scrum he profited from an opponent's error and found a weak spot in defence with a neat kick for Smith to score in the corner.

two-handed catching in the lineouts, and Orwin gobbled up work. The backs, forced by the speed of Kent's covering to run laterally, could only hint at their powers. Carr was carried off in the third minute with a back took handle took handle and replaced. Gioucestershire...

carried off in the third minute with a badly torn hamstring and replaced on the left wing by Richards, the Berry Hill scrum half.

Kent scored first with a 40-metre dropped goal by Coover, left-footed, behind a scrum. Gloucestershire replied with a try by Orwin at a tap penalty converted by Barnes, who kicked another penalty. Purchase gave Cokell the pass for Kent's try to complete a mifield dash by Skinner. Pegler made a try for Morley, and Colyer kicked a 40-metre penalty. Kent could have won.
It has been like that for some years with Gloncestershrie. At the start of every championship they scrape and scrounge for victory against comparative modest opposition, and yet more often than not go on to win the title in style. metre penalty, "Charlton Park? Where's that?" go on to win the title in style.

Kent, well drilled and stubborn, matched them in the forwards, flustered them in the backs, and, as a matter of urgency, put a halter on Barnes for much of the game. But they squandered chances. Twice they overlooked promising overlaps in favour of kicks, and Walters missed two fairly easy penalties. Perhaps they should have given Colyer all the penaltites, because later he landed a long one. Colyer had a good game, as did his scrum half, Williams, and the forwards. Willden and Skinner.

Pegler was all over the park for

Gloucestershire folk were asking before the match as they studied the Kent team in the programme. Now they know.

Club fixtures are devalued

Pegler was all over the park for Gloucestershire. Blackmore made

By Nicholas Keith

An unfortunate side effect of the county championship is that it tends to devalue club fixtures. Surely it is bars. Leicester do not suffer from such problems as their first team players largely choose to ignore county championships. They were at strength against Richmond, and this proved too much for the time that the dilemma between club and county was resolved, and it may be that the only way out is a reconstituted divisional championvisitors, who conceded six tries. Hare collected 31 points, seven ship.

Be that as it may, Saturday's programme included one intriguing fixture, between Wasps and Bistol at Sudbury, which in other circumstances would have been the match of the day. Bristol deserve great credit for ending the unbeaten of his side's tally of 55-21. Stuart Redfern and Evans each scored two tries; Williams and Youngs, in his second game in the first team after

English clubs had mixed fortunes in Anglo-Welsh encounters. Steve Boyle, the former Gloucester and Lions lock, well to the force for his new club. Moseley, in their excellent victory by 17-7 at Poutypridd. Moseley pisyed Jeavons on a flank and Shillingford scored a try from No 8. The other Moseley try scorers were Coodwin and Paper Meterif were Goodwin and Payne; Metcalf kicked a conversion, and a penalty. Unbeaten Postypool won con-

vincingly at Bedford 31-15, and Cardiff crushed Northampton 44-10. Landon Welsh continued their good form by besting Bridgesd at Old Deer Park.

have made a good start to the season with four successive victories. They run of four on December 11 at Twickenham. Oxford have acquired a useful lock in Neil MacDonald, who is 6ft 5in, and a former captain of the University of Cape Town. He scored one of Oxford's 11 tries in a scored one of Oxford a 11 tries in a 57-0 romp against United Hospitals. Cambridge have seven Blues from last year's side against Oxford's four, and Mark Bailey, their captain, had encouraging news yesterday about his strained foot.

He hopes to be fit again in a fornight and he spent yesterday watching ten second XV, while the senior side crushed Gay's Hospital 49-9, their third large score in course over the last year. Gala bad up front and worse behind By Ian McLauchlan

Johnson kicked a penalty goal
Johnson's success – and be kicked excellently out of the hand as well as off the ground – was the turning point that instilled inspiration into his side at a vitally important moment. Johnson was eventually to collect 12 of his side's points and with a second penalty goal and a dropped goal preceding his diagonal kick from which Storey scored a try, gave Northumberland a commanding lead of 13-3 at half-time.

A diligent, resolute defence now defended that lead as Surrey charged again. At length, Surrey's persis-In their most crucial game this scason. Gain were comprehensively beaten 24-9 by Heriot's FP. The home forwards scrummaged well to put the Borderers under severe put the Boueress inder severe pressure. In the loose, they also arrived quickly and in numbers, producing good ball which was well used by the alert Alan Lawson at scrum half. His partner, Murdoch, had an untidy game, trying to do too much on his own. Heriot's scored four tries through

great crean for enoung the inheaten run of Wasps although they were missing 12 first-team players. Unfortunately, Lee Adamson, of Wasps, was sent off for punching.

He now drops out of the London squad for Wednesday's game against the Australians at Twicken-

An equally meritorious away win

was achieved by Nottingham, who had 14 players on county duty but still won comfortably at Chelten-

Buglass (two). Bryce and Lawson, with two conversions each from Steven and Hewitt, Gala, badly beaten up front, had little or no thrust behind. Their passing was slow and their attacks predictable The main worry, however, must be in defence, which was too often unsure and at best indecisive. Liddle scored their points with three

Gomez of Mexico. decides to take
his courage in his hands and go to
Belfast to defend his fratherweight
title against Barry McGuigan in the
new year, he must be prepared to
put up not only with the fast hands
of the little Irishman but also the
voices of 9,000 Ulstermen in the
King's Hall.

The noise they generate is so
intense that it imprisons the thought
processes and ties up the opponent
as the Clones Cylone whistles
round him. Even NBC, who
televised the bout between McGuigan and Felepe Orozoo of Colombia, said the atmosphere was just
like when Ali met Frazier for the
first time at Madison Square first time at Madison Square Garden. The Americans, were delighted, thought not with the result.

He should stay away from them until he has fought a couple of men like our first choice. Angel Mayor."

Orozeo, a late substitute for the world-ranked Angel Mayor of Venezuela, offered even less resistance than did the adders against St Patrick. The Colombian was so thin and tall that one Irishman was moved to say. "You could spit through him." But B. J. Eastwood, McGuigan's markeer, said that the little Irishman would be ready to take on the champions whenever they decided to come. Eastwood is inclined to favour Pedruza, who is getting on after his 18 defences and is finding it difficult to make the weight. The Panamanian would certainly be less risky than Gomez, could spit through him."

Orozco was frozen from the moment he entered the ring. McGuigan came in already warmed up and in a business-like manner went to work. In the second round, two left hooks made Orozco's eyes stand out and he secund to be saying the Colombian contvalent of "Stuff this for a lark".

A few seconds later six punches—a left, a right, two lefts, a right and a left – sent Orozco to the floor, It was all over bar the screaming from the crowd and from Orozco's manager, who claimed that Harry Gibbs, the referee, had not given the

As Mickey Duff, McGuigan's agent in the United States, put it: "It is far better to be eaten on points by Pedroza 'than knocked out by Gomes." However, I have one reservation about boxing Pedroza at the King's Hall, If Pedroza gets a close decision, the grad manufactured

who claimed that Harry Gibbs, the referee, had not given the Colombian a full count.

The Americans were disappointed that Orozco had not put on a better show, even if the reason for his style being cramped was due to McCangan's pressurising him until he was able to come close chough to deliver those deadly blows. Cornelius Boza-Edwards continued his campaign as a full

Young pair meet their match

By Nicholas Keith

Linda Bayman and Mike Hughes don, from Sunningdale club, won the Worplesdon mixed foursomes vesterday by a handsome margin under blue and balmy skies. Then oung opponents from Hertford-shire. Nicola McCormack and Nei Briggs, have a combined age of only 39 and they never looked like mounting an effective challenge, although this was their second successive final.

Mrs Bayman, the English cham-pion in 1983 and runner-up this year, was pleased that she and her puriner had put their game together partner that put their game together at the right time. They were not under any pressure from the moment that Hughesdon put a three from to 10 feet at the second and Mrs. Bay man holed the putt. They found the made in the second and the second an themselves three up after four holes as Miss McCormack and Briggs dropped shots at the third and

Hughesdon struck another telling blow at the seventh with a nine iron to five feet and his partner holed for a birdie. At the eleventh Briggs managed a long putt for a par only to see Mrs Bayman calmly collect her side's third birdie and a dormie seven lead. Briggs, who was keeping his learn smiling with some lovely golf, holed another long putt at the 12th for a birdie. Hughesdon missed a three-footer for the match and did the same at the short 13th.

found the touch on the greens 73, 75 73, 73 Other sources 296 R Hast (GB) that has always made her stand 73, 76 63, 73 299; K Douglas (GB) 76, 73, 76, 74, G Housinans (Feland amazour), 72, 75, 74, BADMINTON

Complaints renewed over pay

By Richard Eaton

The call for equal pay for women The call for equal pay for women went up after Saturday's finals of the Masters, sponsored by Bruish Airways, at the Mountbauen Centre, Portsmouth Morton Frost reasseried himself as the world's leading player by beating Han Jain, the World Cup winner from China, in an event worth £2,700. Only ball the greatest less novailable in the that amount was available in the women's singles final, in which the other Danish No 1, Kirsten Larsen, upset the local applecart by beating Helen Troke 11-1, 12-10 in front of her borne country.

her home county.
The women's prize money is proportionately elightly less than is becoming usual for many other major world events and a good deal major world events and a good rest-tess than that given to another outstanding Dane when she won the Masters which inaugurated the open-era five years ago. It may have been this last factor which prompted Miss Larsen to start the ball rolling hy complaining, both to the press and to Nora Perry, the only woman on an open working group of the international Badminton Feder-

Frost: world's best again

She will pass on the complaint to the group in a couple of weeks time.

Mrs Perry, who in partnership
with Gill Clark disappointingly lost
15-5, 15-1 in the women's doubles final to Wu Diai and Lin Ying, the final to Wu Dial and Lin Ying the world and All England champions from China, has no grouses about the pay she received, but then curiously the proportion was about

two-thirds that given to the men's doubles, and more in keeping with

tournaments.
"I did not think it would be down
to a half for the singles." Mrs Perry
said. "We only play up to eleven
points and not fifteen as in the
men's singles so I'm not in favour of the same prize money But perhaps

the same prize money But pernaise three-quarters is right."

Miss Troke, like Miss Larsen, apparently feels differently "Surely badminton should be like other lines of work where there is equal pay for women." she said. Mrs Perry's problems may be trying to convey the divided views of the women to a group on which she is the only woman anyway and which the only woman anyway and which is very likely to refer the matter back to the Badminton Association of England.

Lendl beaten by Jarryd

Sydney (Reuter) - Anders Jarryd gave the Swedish Davis Cup selectors an enviable problem yesterday when he crushed Ivan Lendl in straight sets to win the Australian indoor championship. Jarryd's 6-3, 6-2, 6-4 triumph means Sweden have three in-form players challenging for the two singles places in the Davis Cup final against United States in December.

Mats Wilander, the world No seems certain to claim one of these places, leaving Jarryd and Henrik Sundstrom to battle it out for the other position Before Jarry's demolition of Lendl, Sundstrom had been seen as the obvious choice even though he is ranked two places below his compatriot at No 8 in the world rankings.

swim on land

Simon Barnes

Should a sport be conscion sexy? Such is the question alarmingly raised by the Silentnight Beds International for Modern Rhythmic Gymnestics: it would take a hard man to resist such a life, and

a hard man to reast such a title, and I did not even try.

Appetite T should say curiosity—
had been so sharpened by a couple of minutes of the sport squeezed into the television Olympic Games coverage that a gathering of thoroughly modern and unquestionably rhythmic gymnasts from eight nations at Wembley Conference Control on Schurday was enough to nations at wemney water the Centre on Saturday was enough to outweigh even the chance of watching Boy George appear at Chelsea op Saturday. Rhythmic gymnastics is the boom

sport that never was. The British Amateur Gymnastics Association had been confidently predicting an explosion of interest in the sport in the aftermath of Lov Angeles, But it. never happened.

The reason is simple: television

showed scarcely a moment of the sport. The athletics was at its height at the time; there was but a single channel covering the Games; Britain had no chance of a rhythmic may no chance of a raythmic gemnastics medal; and, as a novelty sport, synchronized swimming was irresistible. So the lithe rhythm-ladies got themselves squeezed out. It had to be admitted that a sport which is backedly altimize about to t had to be adultice that a sport to music, using it turn a hoop, a ball, a pair of dainty little clubs and 20 feet of satin ribbon on a stick, is to serious danger of going over the

It is performed by young women not little girls. They change their leotards for each bit of apparatus. and if it is not consciously sex), then I don't know what Lilia Ignatova, chucking her clubs around to music from Carmen ("Love is a rebellious bird that no one can tame) thought be was doing.

The way is open for rhythmic granastics to become a sport of dreadful pouring little crowd pleasers. Rhythmic granastics is, as the programme explained candidly, granastics with the beat cantaily, gyamastics with the same off. The worst thing that can happen is that you drop your hoop, apparatus gyanasts are, quite literally, risking their pecks. And so

SQUASH

Alouba shows no mercy to hapless Awad By Colin McQuallan

Eighteen months ago Gama-Anad persuaded his fellow Egyptian Aladin Alouba, who had settled for a career in banking, to return to a career in banking, to return to international squash Last night the former, world No 3 may have regretted his action when Alouba produced a magical performance to beat him 4-2, 9-6, 9-2 in the final of the South of England open championship at Brighton.

Awad, who has suffered a string Awad, who has suffered a string of defeats in the national premier league this season, appeared to be overweight. He once kept the world champion, Jahangir Khan, on court for a record two hours 45 minutes, but yesterday he had no answer to the cut, drop and lob tactics with which Alouba chimically destroyed him in less than half an hour him in less than half an hour

To emphasize the Egyptian domination of the Southern championships, sponsored by American Express. Abbas Kaoud defeated Nottinghamshire's John Hake 9-7 9-3, 10-8 for the over-35 title.

Cadmium can advertise Cole's juvenile strength

At the start of a week that will see him try to win the coveted Dewhurst Stakes at Newmarket on Friday for the first time with Waafi, Paul Cole, the Lambourn trainer, should pick up a shred of encouragement by watching another of his promising two-year-olds, Cadmium (nap), win the second division of the Dorking Stakes at

Sandown park this afternoon, Discussing today's race yes-terday. Cole told me that Cadmium will be hard to beat as long as they go a really good gallop because that will being into play the stamina that he has inherited from his sire,

was a sound two-length runner-up to Royal Coach in the Dorking Stakes looks much Chromacopy Stakes over a mile less cut and dried. In circumat Goodwood. So today's stances like this it often pays to distance with its stiff uphill follow a fancied runner from finish will not pose a problem. Henry Cecil's yard, so with Having seen another of his two-cncouragment from our Newyear-olds beat Abu Fawaz by market correspondent, I go four lengths at Lingfield Park along with Concorde Affair, recently, Cole knows where he who won his first race at as far as Stewart Brighton nicely.

Matthews's colt is concerned,

month. Promising though that newcomer Lord Hippo. The fact performance was - he finished that this colt, who has an sixth, beaten about five lengths abundance of fast Overbury Stud blood in his veins, was declared for a race as good as Saturday's Cornwallis Stakes at Ascot at the four-day stage was

At Pontefract, Miranda looks

a good bet to win the second division of the Whitley Fillies' Stakes after that pleasing run behind Tundra Goose at Newmarket a little under a fortnight ago, Norse Lad (4.30) should be hard to best in a similar sort of race at Warwick, Although beaten, he was not disgraced when going under by two lengths to Exchange Con-trol at Lingfield.

Doulab (far side) holds the late challenge of Cragside (nearest camera) by a neck with Safka (No 15) the same distance away third in Saturday's Cornwallis Stakes at Ascot. The winner is likely to be kept to sprint distances next year while the runner-up will continue his racing career in California. One Way Street ended her racing days on a high note by winning the day's other group race, the Princess Royal Stakes, and now retires to the Cliveden Stud of her owner, Louis Freedman (Photograph: George Selwyn).

Alydar's Best puts on classic display

prospects
David O'Brien nearly decided against running Alydar's Best as she had 10-hours journey from Ireland due to hydraulic problem on her aireraft. O'Brien, together with Christy Roche took the precaution of breezing the filly on Saturday morning at seven o'clock, then went back to the Curragh for the afternoon's racing and returned again to France the same evening. O'Brien finally decided that Alydar's Best was none the worst for wear so the was allowed to take her wear so she was allowed to take her chance in the Criterium.

Bought by the agents. Horse France, for \$625,000 at the 1983 Keenland Sales. Alydar's Best is now unbeaten in her only two starts. She began by trotting up in the Silken Glider Stakes at Leopardson

Alydar's Best became the second successive filly to win the Grand Criterium when she took France's top, two-year-old event at Long-champ yesterday afternoon. After a ding-dong barile, with River Drumaner throughout the-final furioug. Alydar's Best finally won by a short neck with No Pass No. Sale three lengths away third in finant of Envoul, completely lost his chance when slowly out of the stalls.

Alan Clore not only owns Alydar's Best but also Triptych, who won the previous Sunday's group one Prix Maroel Boussac, so the French based impressario now goes into 1985 with two fine classic prospects.

David O'Brien nearly decided against running Alydar's Best as she had 10-hours journey from Ireland due to hydraulic problem on her aireraft. O'Brien, together with Christy Roche took the precaunon of breezing' the filly on Saturday morning at seven o'clock, then went back to the Curragh for the afternoon's racing and returned again to France the same evening. O'Brien finally decided that Alydar's Best was none the worst for treasure of the mally decided that Alydar's Best was none the worst for treasure of the Curragh for the afternoon's racing and returned again to France the same evening. O'Brien finally decided that Alydar's Best was none the worst for treasure of the care of the ca

Stewart is full of praise for McHargue's riding

From Our Irish Correspondent. Dublin

Alec Stewart, the 29-year-old Newmarket trainer saddling his first runner in a classic race, and Darrel runner in a classic race, and Darrel McHargue, a former American champion jockey riding in what may prove to have been his last European classic, teamed up to win the Jefferson Surfit Memorial Irish

on Saturday.
This classic race was first opened op to older runners last season and the four-year-olds have certainly benefited from the changeover, with Opale following in the footsteps of another filly of the same age,

Mountain Lodge.

For McHargue It was some consolation for having lost the ride on the Doncaster St Leger winner.

Commanche Ruia, to Lester Piggott, McHargue certainly had luck on his

While this was going on, McHargue had come through in the centre of the course to take the advantage. Once George McGrath managed to get Empire Glory away from The Miller, however, he quickened appreciably in the last 100 yards but just failed to get up. McGrath said afterwards "II had managed to get the rail carfier in the

McGrath said afterwards: "If had roanged to get the rail earlier in the straight, I must have won".

Stewart said afterwards: "I have always admired Darrel McHargue's riding and I think it is a pity that a man with such takent should be leaving to return to America, Opale is likely to be retired to stud and will visit an Irish-based stallion."

Vincent O'Brien achieved conso.

Vincent O'Brien achieved conso-lation for his near miss in the St Leger when in the preceding event, the group two Panasonic Beresford

Secreto retired to stud When a half-share in him was sold to Calament Farm in July for an undisciosed sum, representatives of Laigi Miglietti, his owner, claimed that the price made him the most valuable horse in the world ever sold while still racing. Secreto will stand at Calament Farm alongside other sought-after stallions, Aivdar, Highland Blade and Raise A Cop. Sadier's Wells, stancer of the Ecüpse Stakes and Phoenix Champion Stakes, will not race again. Vicent O'Brien's colt will be retired to the Coolmore Stad. When a half-share in him was

Secreta, the Epsom Derby winner, has a broken bone he a foot and is to be retired. The colt was sent to be retired. The colt was sent to Calumet Farm, Kentucky, at the end of last month after a X-ray examination in Ireland, where he was trained by David O'Brien, proved inconclusive.

It had been hoped that the three-year-old son of Northern Dancer would run in the Washington DC international on October 20. Secreto heat the oldson favourite. El Gran

beat the odds-on favourie, El Gras Schor, by a short bead in the Derby and slso finished third in the Irish 2,000 Guineas. He cost \$340,000

side, for if Vincent O'Brien had not run The Miller se well as Empire Glory there is little doubt that Empire Glory would have beaten off the challenge of Opale in the

The Miller, the mount of Pat. Eddery, was a reluctant pacemaker, setting a sedate gallop for the first half-mile with Empire Glory always close up. In the straight the two O'Brien colts came close together and Edddry was left with little room to manocuvre.

Park Appealchases \$1m Park Appeal the unbeaten Irish-trained winner of the Cheveley Park Stakes, will be sent to America to contest the Breeders Cup Juvenile Fillies race at Hollywood Park on November 10. The race carries added prize money of \$1m and is over one mile and 110 yards on dirt. Park Appeal, who is trained by tim Robers was made favouritie for Jim Bolger, was made favourite for next years 1,000 Guineas after her Cheveley Park success.

Stakes, Gold Crest put up a spectacular display to beat Concert Hall and Stramer by five lengths. The placings of the second and third were switched by the stewards. Taking a line through Concert Hall. Gold Crest has a paper advant over his stable companion, Law

Society.
O'Brien, however, refused to accept the evidence of the formbook, saying that in his opinion Law Society was marginally su-

La crème de la crème

S.O.S. IN CHISWICK

Please help! Two months ago I accepted a PA/Secretarial job in Chiswick, and since then have been doing 40 miles to work and back. I am now a nervous wreck and my husband is about to divorce me! So I have resigned. But the MD I'm leaving still needs an excellent P.A. to cope with his needs (which are many) his lack of organisation (I've just re-done the filing system), and his copious shorthand typing and presentation work (he can't spell and has verbal diarrhoea). You'll need to be attractive, energetic and love the non-routine. He'll try your mind and your patience and sometimes you'll feel like swearing (which is an improvement on him because he always does).

Good salary and job that is more a way of life, (Open to

Good salary and job that is more a way of life. (Open to male & female applicants).

Call Maureen Hollins now on 01-995 1511

PUBLISHING £7,000 - £9,000

A leading international publishing house (with many extra business interests) has openings for well educated poised young secretaries in the 20-25 + range. Shorthand speeds are a must together with good social skills as well as a thoroughly business like approach to a creative but profit conscious company.

Please call Covent Garden Bureau 53 Fleet Street, EC4, 353 7696

Organise Conferences

Our client, a leading City firm of conference organisers is looking for bright, self-motivated people to join their team. Working as backup to the conference producers, your responsibilities will include liaison with speakers and guests, press and publicity arrangements, and some background research. Fast and accurate typing is essential. Age 20-25. Salary up to £8,000.

Please call 588 3535

is why there is a thriving industry in sponsorship of students on under-graduate courses. Almost 100 schemes are featured in this year's edition of Sponsorship* (published by COIC/MSC) and many personnel officers regard it as a vital (but expensive) instrument in recruiting their future management class.

In the race to pick up the best

young talents many major employers

ike to get off to an early start - which

Sponsorship features many big names in British industry, together with the armed services who offer particularly attractive sponsorship packages. A few of the relatively smaller companies are also included for example, Travers Morgan. Avdel and EEV

The motive for sponsoring students is fairly clear. Despite the level of graduate unemployment many companies complain about the shortage of elite applicants and in many cases the really talented third year students will be chased by half a dozen quality employers. To try to avoid that late scramble sponsors hope to stake their claim to these bright sparks at an early stage.

Early claims on bright sparks

Unfortunately some employers don't always get the benefits from their investment. Terms of the sponsorship arrangement vary from scheme to scheme but in most cases there is an understanding that the student will join the sponsor's permanent staff after graduation. But it is virtually impossible to enforce this and many employers now just shrug their shoulders with resignation as their bright hope joins the

British Rail, for example, is one of the largest sponsors in the country with more than sixty places a year. but they are so concerned about the drop out rate among their students that they are actively reviewing the

Richard Evans, who runs BR sponsorship, says employers run a number of risks when they get involved in sponsoring. Because we set high standards the students we sponsor are of a high calibre. They're so good in fact that a number of them go on each year to post-graduate work so they're lost to us. Then others, who explore other employment oppor-tunities, find that they can get higher salaries elsewhere from employers who are prepared to pay as much as necessary to get the best people. And our sponsored students, being both talented and with practical experience, make very attractive prospects so it's not surprising other people

It is gailing for employers to watch their sponsored graduates cheerfully offer themselves to the highest bidder.

THE BRITISH "

INSTITUTE

Edward Fennell asks: 'Who really benefits from the sponsorship of bright undergrads?

HORIZONS |

The Times guide to career choice

Why students go off the rails

The sponsorship arrangements has become a one-way street with virtually all the advantages towards the student. The advantages can be considerable because a student is paid a bursary of several hundred pounds a year (on top of the grant) while at college and a normal salary while on attachment to the employer during vacations or on industrial placements during a sandwich course. The financial benefits can add up to thousands of pounds over a four- or five-year course,

Even more useful is the work experience because most employers of graduates prefer students who have applied their skills in a practical context and gained an insight into the way industry operates. Recently sandwich placements have been harder to find, so sponsored students with guaranteed work experience enjoy a double advantage. By the time they graduate they are likely to be wealthier, more experienced, and with better job prospects than their non-sponsored colleagues.

Sponsors are naturally highly selective in the courses for which they will sponsor. Overwhelmingly the employers are interested in engineering courses: electrical and electronic engineering mechanical engineering production engineering computer science and computer technology. These are the disciplines for which sponsorship is available and it reads like a roll-call of skill shortages in British industry. There is a smattering of opportunities for business studies students but basically, unless you are an applied scientist or engineer then you are not likely to be in the sought after category.

New scheme for textile industry

On the whole, however, it isn't simply the technical discipline that the employers want from their students (although in subjects like electronic engineering the shortage of graduates is so dire that almost anyone with the right qualifications is going to be made welcome!) What most employers are really keen to get is technical skills plus management potential

This is borne out by one of the latest sponsorship schemes to arrive on the market. As prospects start to improve for the British textiles industry. Marks and Spencer has got together with lifteen of its major suppliers to sponsor up to nincteen students on textile and clothing

technology courses at Leeds Univer-sity, the University of Manchester Institute of Science and Technology and Leicester Polytechnic. The scheme offers bursaries and work experience with major textile and clothing manufacturers as well as excellent future career opportunities.

According to Hugh Walker, who is co-ordinating publicity for the Marks and Spencer scheme, the textile industry had been suffering from a shortage of people who were technically competent and had management skills. "Too often it seemed that there were people who understood the technology but couldn't manage or who were good managers but didn't understand the technicalities", says Walker, "So that's why these suppliers and ourselves have got together to try to grow the future graduate technologists with the leadership skills to take the industry back to prosperity".

Although this textile technology scheme is new it is characteristic of most other sponsorship arrangements. It is in manufacturing: in a technial skill which is little understood by the public at large; and in an industry whose success is crucial to the future prosperity of the country.

The fact that employers have to bend over backwards to get able young people to come into these career areas is an indication of the hopeless mismatch between demand and supply. (In fact one of the factors which is persuading British Rail to stick with sponsorship is the feeling that morally it should be encouraging students to specialise in engineering, and thereby swell the pool of technological competence, even though, as an individual employer, it is doing badly from the deal.)

Real interest in the business

Sixth form students who are interested in sponsorship should normally make applications this term for schemes beginning in the next academic year. Details vary so much that each sponsorship needs to be considered individually.

In some cases, as in the textile technology scheme, sponsorship is only available for students attending designated courses, in the case of most engineering schemes, however, sponsors are fairly open-minded about which degree course their students attend. But the key to successful sponsorship is real interest in the employer's business. As Richard Evans says for BR: "We don't just want engineers. We want people who have a genuine commit-ment to working in the railways." For both your sake and the employer's bear that in mind when you apply.

* trutable at £1.50 (cheques to MSC) in Papworth Industries, Papworth Exercial, Cambridgeshire CB 8RG.

2.30 Vietnam - The Ten Thousand Day War. Part one of a 26-

biographical film is nothing less than astonishing. The archive footage is designed to show that he has never cesigned to show that he has never been anybody's fool. The brief bursts of testimony from Lord Wilson, James Callaghan, Lord Brockway, lan Mikardo and others are designed to show that, in the sanitized tradition of This is Your Life, he was nobody's enemy either. Lord Shanwell provides his own corrective to this view lieuetics. corrective to this view. Injustice, above all, he avers, has always brought out the violent side in him.

THE LION AND THE DRAGON

(BBC 2, 9.30pm), the second of Christopher Cook's two films about the British in China between 1920 and 1939, can only be as good as the narrative skill of its storytel and the evocative power of its

black-and-white home movies. Last week, it was lucky in both respects, and so it is tonight, too. This time, the storytellers are the missionaries who took The Word to the villages, and the crews of the gunboats that steemed up and down the Yangtse, protecting British interests and residents during that dangerous period when Chiang Kai-shek's nationalists and the communists were at each others' throats. The were at each others' throats. The music of Elgar and Sir Arthur Sullivan, wistful and jolly, intensifies the film's curious atmosphere of remoteness in both time and space.

Radio highlight: the Monday Play, HOWLCROFT (Radio 4 8.15pm) which brings together a first-rate writer (Jonathon Smith) and a first-rate actor (Cyril Cusack)

French lorrymen are heroes of miners' rally

in the end, it was not Mr Arhur Scargill, the British miners' leader, but 30 French lorry drivers in their jeans and leather jackets who stole the show in the Kent coalfield where the biggest international rally so far in support of the seven months strike took place at the weekend.

To the considerable disappointment of the 800 members of France's Communist-led union, the CGT, who had ventured briefly on to British soil to hand over a huge consignment of provisions for the families of striking miners, the National Union of Mineworkers' President was in London at the Acas talks.

Absent, too, was Mr Norman Willis, the TUC General Secretary, who had planned to join the meeting in a packed welfare centre at the Snowdown

But the nonappearance of such luminaries failed to dampen the enthusiasm of the ranks of French dockers, steel workers, coal miners, and firemen who had driven in a mile long convoy of nearly 200 lorries and cars from Paris to Aylesham in Kent through the coalfields of northern France.

As the lorry drivers paraded across the stage in front of them, they rose from their seats chanting victory slogans and waving flags and cleuched fists in the smoke-filled air. It was left to Mr Malcolm

Pitt, the Kent miners' leader, tothank them for their generosity in donating more than 400 tons of staples like flour, tea, sugar and potatoes and a cheque for nearly £60,000 to a cause which he said had become a shining symbol of the "international working class movement.

The lorries, which were impounded overnight by the British Customs authorities at Dover were unloaded yesterday for their contents to be distributed among

In his Aylsham rally speech Mr Pitt, who had joined the convoy when it set off from Paris on Friday, omitted much of the Marxist rhetoric he bad used at similar rallies in the French capital and in Calais. There he had told CGT members in faltering French that Mrs Thatcher was "the parrot of President Reagan. peching on his shoulder and preaching the same militarist and imperialist policies."

"There is blood on British coal," he shouted, to chants of: "Thatcher is a fascist" from among the crowd.

Alongside him on a platform bedecked with French and British flags next to a shabby warehouse overshadowed by huge cranes on the Calais

The French convoy moves towards Aylesham, Kent, (left) where the lorries are unloaded by Kent miners

M Krasucki, CGT general secretary, speaking at the Aylesham rally. On his right is Mr Pitt, Kent miners' leader. Right Smiles and flags from the CGT men

dockside, M Henri Krasucki, the CGT General Secretary, was equally critical of the British authorities. "The police have formed special repressive brigades," he claimed, to unleash violence in the mining communities."

He added: . "British miners no longer have enough food to enough money to clothe their newborn babies or to bury their dead."

French miners and their

front doors to gaze at the long procession of CGT vehicles lumbering through their struggling villages north of Arras, were fed similar propaganda from a loudspeaker van. "Children between the ages of two and 14 are dying of hunger . . .

families who stood outside their

Mrs Thatcher has cut off family allowances for striking miners . . . the British struggle against pit closures is the same fight we waging to save French

coal pits," the disembodied

Outside the townhall of each mining village with names like Bully les Mines and Billy les Montiguy, the convoy stopped briefly to present the local mayor with a gilt medal to nmemorate the CGT's gen-

Copies of the medal, com-plete with red, white and blue ribbons, were later put on sale to union members at about £4 a time as they munched sausages and bags of chips in a carnival atmosphere on the quayside at

Invigorated by a rousing chiorus of the Red Flug and three cheers for the striking miners, the convoy of lorries then drove on to the ferry for the 20 miles trip to Dover.

Before returning home, M. Krasucki promised: "We shall back to make it an unforgettable Christmas for your children."

Hattersley and Owen put focus on jobs

Continued from page I employ low-skilled workers. A worker earning £100 would

bring the firm a net credit. Dr Owen said such a choice would transform the employ-ment prospects of low-skilled workers, discourage firms from giving in to excessive wage claims and discourage unions from making them for fear of bankrupting their employers.

Another part of the restruc-turing could be the abolition of employers' contributions for any additional employees taken

The other key elements of Dr

Owen's strategy were:

A big expansion of the community programme, in-creasing to 350,000 the places available for the long-term unemployed, and a two-year package of training and work experience for the under 25s. An expansion of the personal social services pro-

gramme including home helps to give 50,000 more women part-time jobs. Spending of £1,000m on

major construction and road programmes; an increase of £700m on housing building an modernization at a net cost of £6,400 per job could create 110,000 new jobs in two years. Expansion of the loan guarantee scheme to help small firms start up and expand, and broadening of the enterprise allowance scheme

Mr Hattersley, delivering the Anearia Bevan memorial lecture in Redditch, said that a Labour Government could put Britain back to work but only if it first understood and then surmounted substantial obstacles.

To overcome balance of payments constraints caused by the decline before the end of the decade of the North Sea oil revenues it would be necessary to increase non-oil exports.

Mr Hattersley argued that although "some adjustment" in the value of sterling might be necessay it would be unwise to place all faith in that remedy.

To overcome the availability investment constraint, Labour had to accept that it needed a high profit economy, with the profits used for productive purposes, Mr Hattersley said. Much of the new capital would have to come from private sources. But private profits must not be the preserve of owners and managers; workers must be given a vested interest in their enterprises, not just a share of the profit but a direct influence on company policy.

Letter from Sri Lanka

Ethnic strife is no storm in a teacup

Trimmed as prim as privet, fields of next tea bushes hold to the sides of the mountains no less vertiginous than a Rhineland weinberg. The tea leaves, the top two leaves and the newest shoot on each stem, are harvested once a week. The bushes are weeded once a month.

Sri Lanka's principal export thanks to an astonishing acceleration in auction prices. is more than making good the damage done to the country's economy by the recent ethnic violence.

But where there is tea in Sri Lanka, there are Tamils. The colonizing Europeans, looking for a return on their investment, came upon the notion of growing first coffee, which sickened and died, and then

tea, which flourished.

The cheerful Sinhalese wanted no more than to work their own land and let moist nature provide them with sufficient crops to feed themselves.

Across the 25 mile Palk Strait in the Madras Presidency - fortunately under the same ownership at the time, were teeming throngs of desperate landless coolies, prepared to put up with all kinds of discomfort in return

for a chance to earn a living.
They were Tamils, which seemed additionally convenient, for 11 or 12 per cent of the population of Ceylon were already Tamil, so they would fit in easily.

In fact, these Indian Tamils, were not like their cousins in the north and east of the island, the Jaffna and Batticaloa Tamils who claimed to have been on the island at least as long, if not longer than the Sinhala, and aspired to

middleclassness.
The plantation Tamils were mostly from a lowly caste, with little or no aspiration to

education or much else.

But to the Sinhalese chauvinists they were Tamils all the same, and they suffered from the disabilities increasingly inflicted on the minority

One of the earliest acts of the newly independent island state was to remove the possibility that the Indian Tamils could become a force in the new country's politics. They denied them citizenship. Hundreds of thousands of

people who had been born in Ceylon, and whose fathers had been born in Ceylon, suddenly became stateless, for they had no claim on Mr Nehru's India.

Later agreements between India and Sri Lanka did something to alleviate the problem, but there are still 90,000 stateless Tamils in the tea gardens, and one of the products of the current round table conference has been an agreement on their future.

In fact, despite Sinhalese dislike of all Tamils, President Jayewardene has been quite skilful at separating the plantation Tamils from the Jaffins Tamils.

The Ceylon Workers' Congress, a combination of trade union representing the estate workers, and political party. was one of the original constituents of the Tamil United Liberation Front but now is a supporter of the Government, Mr Savumia-moorthy Thondaman, the congress leader, is in the Cabinet as Minister for Rural Industrial Development, the first Indian Tamil in government since independence. Separation is not going to

solve 'our problems". Mr Thondaman said in his ministerial office last week. "Our problems are quite different from the Tamils in the north and east. The Indian Tamil preoccu-

pation, given a solution to the comes down to straight job The estate workers still live

in "line rooms", which they suspect were named after the lines to which the British tethered their horses. A family, sometimes two families, will share one windowless room 10ft by 12ft with a smoky kitchen built into a smaller verandah. They feel exploited by the

estate management. "Nothing has changed since the days when the gardens were privately owned", said a trade union organization here. Mr. Thondaman, indeed

recently led a successful strike against the Government Similar firmness was shown

over police harassment of young Tamils while looking or extremist Tamil Tigers. When 14 young men were arrested for questioning, 20,000 estate workers in the

district stopped work. The men were freed, "Don't create terrorism in the plantations in the way you created terrorism in the north," Mr Thondaman urged the Government. "Don't lager 11" make martyrs here."

The pound

Valette: the Perera | Nature notes

The autumn flocks of fraches-begin to be more noticeable, as birds that bred in Britain are joined by visitors from Europe. Twittering parties of siskins and redpolls feed on the birch and alder seeds: at present they are mostly, in the treetops, but as the seeds fall, the birds will go down to the ground

birds will go down to the ground with them.

Bramblings are arriving from Scandinavia: some of them fly straight across the North Sea from Norway to Scotland. They go wherever the beech mast is most abundant, usually linking up with chaffinches. Tree-sparrows are flocking in the fields: they can be told from house-sparrows by their chestnut, not grey, caps, and their black cheek-patches.

With the weather staying mild, many late summer flowers are still

many late summer flowers are still to be seen in patches—ragwort, ros-bay willow-herb, nipplewort, tor-mentil and bristly ox-tongue among them. On the plane-trees, the turning leaves form a rich pattern of bright browns and yellows; dangling between them are the hard seedballs, pale green with bright gree spikes. On the evergreen holm-oak spices. On the evergreen holm-oaks, the narrow green acorns still adhere to their small cups. A, common fungus now is the weeping widow, with webs of black spores hanging from its brown cap.
